# Editorial

BY HAROLD VAN DER HEIJDEN

Recently, three prominent composers passed away: Alberto Foguelman (Argentina), Hamlet Amiryan (Armenia) and Vitaly Kovalenko (Russia). Thanks to José Copié, Yuri Bazlov, Karen Sumbatyan, and Yochanan Afek, **EG** is able to honour these excellent composers in an appropriate manner by publishing extensive obituaries and some of their excellent studies.

Recently, Jana Sochneva, daughter of Alexey Sochnev, informed me that her father had suffered a stroke three years ago, and is still recovering. We sincerely wish him all the best and hope that reading **EG** and endgame study composition in general may contribute to his recovery.

I congratulate Yochanan Afek with the election of his Timman-60 JT study as study-of-the-year 2012. A great honour but also excellent publicity for our art, which is by the way the main intention of this selection.

Emil Vlasák writes about new EGTB formats. For me the *syzygy* tablebases meant a giant leap ahead as they (6EGTB) fit on a relatively very fast SSD drive which considerably speeds up calculation by computer engines. The only worrying thing is that one needs a special interface that is able to turn the 50-move-rule option “off”, which also is not the standard option. We await many incorrect cook claims based on a faulty setting. By the way, it is not a good idea to implement the 50-move in endgame study composition. That merely is a practical rule for OTB chess, and was originally invented to prevent unsporting players to continue the ending of e.g. K against K for a 1000 moves or more. Some people (...) have advocated implementation of that rule in endgame study composition, because they wanted to have the same rules for OTB play and endgame studies. Fortunately that has not ended up in the codex because, if so, we would have been faced with

fairy chess style studies in which the solution is move A, because it is a mate in 49 moves, while the thematic try B is wrong, since it is a mate in 51 moves. In addition, there are plans to change the 50-move rule into a 75-move rule... That would not retrospectively affect OTB games, but would affect endgame studies. A similar discussion about a “dead position” (also a practical rule) is included in our originals column.

In the Spotlight column in this issue there are the following remarks: “Amatzia [Avni] finds it unnecessary to publish every correction in **EG**. In his view it is sufficient to inform Harold so that he can include them in his next version of HHdb .... There are thousands of positions that need correction”. But I do not include unpublished corrections or originals in my database (there are a couple of exceptions also from the time when I was less strict and which I cannot undo for obvious reasons). The point is that I hope that (endgame study) editors apply a minimum standard of quality for what they publish, because a large proportion of the corrections I see unfortunately is (very) poor. Jarl Ulrichsen asked me to explain this in **EG** as it is not always easy for an editor to politely refuse publishing a correction. Therefore I should add that I do not want to insult people where I am convinced of their good intentions.

Examples of really horrible and not infrequent corrections are: addition of dead wood: a certain study with a (hypothetical) move 1.Ra1 has a second solution with 1.Rb1, and the correction is to add a bS at a1, so only 1.Rxa1 works. I have even seen examples in which almost every move in the correction is a capture of sprouting weed... There are also examples of studies that have a cook (e.g. 4.Se6 instead of 4.Sf5) and a refutation (5...Kh8 and White cannot win). In such cases some people propose that the study can be saved by making 4.Se6 the solution. But perhaps the “solution” of the

ending is sound, but as the thematic play that followed 4.Sf5 is lost, that is not a correction but a further destruction of the composer's work of art.

I propose some rules for corrections. I am not trying to invent new rules of chess but, just for clarity, I will number them. First, some "politeness" rules:

**P1)** a correction proposal should, wherever possible, always be sent first to the composer of the original, who is the one to make the final decision whether it is valid or not.

**P2)** a correction of a study belongs to the original source. Only if that is not possible (e.g. certain formal tourneys, original publication many years ago, magazine ceased publication) a correction may be published elsewhere.

**P3)** EG's cook hunter Mario Garcia regularly contacts composers when he finds a cook in their studies, and they sometimes submit a correction for publication *in the award* in EG. But I am not very happy with this practice, even if rule P2 was correctly applied. Say that a composer won a 1st prize in a tourney with study 1, Garcia cooks study 1, and the composer sends a correction 1A for inclusion in the award that is to be published in EG. It might well be that the judge would not have awarded 1st prize had the composer submitted 1A. But after publication of 1A in EG it may look like 1A won 1st prize. In my view, in such cases the cook should be mentioned in EG's award and the correction belongs to Spotlight (in a subsequent issue). In EG we have, to date, taken a liberal approach, but my intention is to apply this rule more strictly from now on.

**P4)** A correction of a study does not become the "property" of the corrector (some say: "my composition, after X"), even if the correction also slightly improves on the original. In my opinion the artistic idea is often more relevant

than the technical part (soundness). Of course, this rule is subjective, because some corrections/modifications add considerable thematic content. However, it seems to me that the corrector himself is not the one to decide here, and we should rely on the persons who are involved applying **P1-2**.

Then there are some aesthetic rules, which are more subjective. Of course, when someone manages to correct a (non-existent) faulty Babson task study almost everything will be allowed!

**A1)** A correction should at least have the same thematic content as the original study: see the example above. If a study has two main lines, the correction should also have these two main lines. If a correction results in loss of play (i.e. the solution has to be shortened; see e.g. S.6. in Spotlight), it is clearly inferior to the original. An AUW study correction omitting one of the thematic promotion lines is ridiculous. *Et cetera*.

**A2)** Addition of dead wood (especially inactive pieces being captured) should be avoided.

**A3)** Addition of extra material must be avoided. I often see "easy" corrections in which an extra pawn prevents a cook (e.g. winning material). The corrector has an obligation to explain to the editor what, without adding the extra material, he has tried to correct the study.

An ideal correction should (i) at least show the artistic content of the original study without the addition of extra material, (ii) be accepted by the composer of the original and (iii) be published in the original source as a correction.

I would welcome comments and suggestions for improving these rules by EG's readers. We will try to apply these correction rules in EG from now on.

EDITOR: ED VAN DE GEVEL

*“email submissions are preferred.”*  
*Judge 2014-2015: Luis Miguel González*

Recent troubles with my email made me wonder whether the phrase “email submissions are preferred” is really the best choice. In January I received an email from Peter Krug apparently resending an email with a study for this column. I checked but could not find the earlier email. I responded with an email thanking Peter for his entry. A month later, when clearing my spam filter, I found to my horror a new email from the Peter cancelling his entry since he had not heard anything back... Enough of complaints and let’s go to the studies that survived email transmission without problems.

In our first study Geir Østmoe shows us a Vallādao.

**No 19599 G. Tallaksen Østmoe**

e1d3 0100.14 3/5 Draw

**No 19599** Geir Sune Tallaksen Østmoe (Norway) 1.O-O Kc2 2.h4/i gxh3 3.Rf2+ Kb3 4.Rxf3+ Ka2 5.Rf2 Ka1 6.Kh2/ii b1Q 7.Rf1 Kb2 (Qxf1 stalemate) 8.Rxb1+ Kxb1 9.Kxh3 draws.

i) 2.h3? g3 3.h4 f2+ 4.Kg2 b1Q 5.Rxb1 Kxb1 6.h5 Kc2 7.h6 Kd2 8.Kf1 Ke3 9.h7 f3 10.h8Q g2 mate.

ii) 6.Rf1+? b1R 7.Rxb1+ Kxb1 8.Kh2 Kc2 9.Kxh3 Kd3 wins.

Martin Minski shows a study where the black defence dictates which action (g4 or gxh4) White should select to be successful.

**No 19600 M. Minski**

b5e4 0010.22 4/3 Win

**No 19600** Martin Minski (Germany) 1.Bd1/i h4 (f5; Bxh5) 2.Bc2+/ii and now:

— Ke5 3.g4 (gxh4? Kf6;) Kf4 4.Bf5/iii Kg3 5.Be6/iv Kxh3 (fxe6; g5) 6.g5+ Kg3 7.Bxf7 Kf4 8.g6 wins, or:

— Kf3 3.gxh4/v Kf4 4. Kc5 (Kc4, Kc6) Ke5 (f5; Kd-) 5.h5 f5 6.h6 Kf6 7.Bxf5 Kf7 (Kxf5; h7) 8.Bh7 Kf6 9.h4 wins.

i) 1.Bc2+? Kf3 draws, or 1.Kc5? Kf3 2.Kd6 Kxg3 3.Bd7 Kf4 draws.

ii) 2.g4? Kf4 3.Bc2 Kg3 4.Bf5 Kxh3 5.Be6 Kg3 6.g5 Kf4 draws.

iii) 4.Bb3? f5 draws, or 4.Kc5? Kg3 5.Kd4 Kxh3 6.Bf5 Kg3 7.Ke5 h3 draws.

iv) 5.g5? Kf4 (Kf3) 6.g6 fxc6 draws.

v) 3.g4? Kg3 (Kg2) 4.Bf5 Kxh3 5.Be6 Kg3 6.g5 Kf4 draws.

In the Pavel Arestov’s study White must end up on the right side of a mutual zugzwang to conclude with either a winning Q versus R+P endgame or a winning R+P versus R endgame.

No 19601 P. Arestov

c6b1 0400.42 6/4 Win

**No 19601** Pavel Arestov (Russia) 1.Ra3/i Rxc2+ 2.Kb7 (Kd5? Rxf2;) Rxb2+ 3.Ka8/ii Rxf2 4.Kxa7 zz Kc1/iii 5.Ka8 (Kb7? Rb2+;) Kb2/iv 6.a7/v Kxa3 (Rh2; Rxf3) 7.Kb8/vi Kb2/vii 8.a8Q Kc1 9.Qd5/viii wins.

i) 1.Ra4? (Ra5?) Rxc2+ 2.Kb7 Rxf2 3.Kxa7 Rxb2 draws.

ii) Thematic try: 3.Kxa7? Rxf2 zz, and 4.Ka8 Ra2 5.Rxa2 Kxa2, or here: 4.Kb6 Rb2+ 5.Ka5 f2 draw.

iii) Kb2 5.Kb6 Kxa3 6.a7 Rb2+ 7.Kc7 Rc2+ 8.Kd7 f2 9.a8Q+ Kb2 10.Qf3 wins.

iv) Rh2 6.Rxf3, or Rf1 6.Ra1+ win.

v) Try: 6.Kb7? Kxa3 7.a7 Kb2 8.a8Q Kc1 9.Qd8 Rb2+ 10.Kc6 Rc2+ 11.Kb5 Rb2+ 12.Kc4 Rc2+ 13.Kb3 Rb2+ 14.Ka3 Rd2 15.Qf6 Rd3+ 16.Kb4 Kd2 draws, or 6.Kb8? Rg2 7.Rxf3 Rg8+ 8.Kb7 Rg7+ 9.Kb6 Rg6+ 10.Kb5 Rg5+ 11.Kc4 Rg4+ 12.Kd5 Rg5+ 13.Kd4 Rg4+ 14.Ke5 Rg7 draws.

vi) 7.Kb7? Kb2 8.a8Q Kc1 draws.

vii) Rb2+ 8.Kc7 Rc2+ 9.Kd7 f2 10.a8Q+ wins.

viii) But not 9.Qc6+? Kd1 draws, nor 9.Qa1+? Kd2 draws.

Per Olin composed a study to illustrate a point about *dead positions*. To quote Per: “The chess rules say that a game ends immediately when there is a mate, stalemate or dead position; therefore I find it somewhat disturbing, and amusing!, that in endgames a dead position is continued up to stalemate....Perhaps this is a convenient moment for possible discussion; it

would be interesting to know what others think in this issue.”

No 19602 P. Olin

e8b8 3378.72 11/9 Draw

**No 19602** Per Olin (Finland) 1.Sc6+ Qxc6 2.dxc6 Sc5/i 3.d8Q+/ii Bxd8 4.Sd7+/iii Sxd7 5.bxa8Q+ Kxa8 6.Bg2 Bxe6/iv 7.c7+/v Bd5+ 8.Kxd8/vi Bxg2 9.c8Q+ Sb8 10.Qb7+ Bxb7 11.axb7+ draws by a dead position as White would be stalemate after the obligatory capture by the bK. *FIDE Chess rules 5.2b: The game is drawn when a position has arisen in which neither player can checkmate the opponent's king with any series of legal moves. The game is said to end in a 'dead position'. This immediately ends the game, provided that the move producing the position was legal.*

i) Sb6 3.d8Q+ Bxd8 4.Kxd8 Rc1 5.e7 draws.

ii) 3.bxa8Q+? Kxa8 4.e7 Bd5 or 3.e7 Bd5 4.bxa8Q+ Kxa8 5.d8Q+ Bxd8 6.Kxd8 Bxc6 7.Bg2 Bxg2 8.e8Q Rxe8+ and Black wins.

iii) 4.bxa8Q+? Kxa8 5.Kxd8 Sxa6 wins.

iv) Bc7 7.cxd7+ Kb8 8.e7 draws.

v) 7.cxd7+? Bd5+ 8.Kxd8 Bxg2 wins.

vi) 8.Kxd7? Bxc7 9.Bxd5+ Kb8 wins.

To disturb Per even more: in the forty odd years I have been playing OTB chess I have had my fair share of hard-fought battles that ended in K+B versus K or K+S versus K endings. None of them were declared drawn as a dead position and all were ended by an accepted draw offer... I certainly would not like to lose some beautiful stalemates because of a rule that seems to be added to satisfy some lawyers...

# Spotlight (40)

BY JARL ULRICHSEN

Contributors: Amatzia Avni (Israel), Marco Campioli (Italy), Gady Costeff (USA), Mario M. García (Argentine), Javier Rodriguez Ibran (Spain), Axel Ornstein (Sweden), Geir Sune Tallaksen Østmoe (Norway), Alain Pallier (France), Harold van der Heijden (The Netherlands).

In the special issue to honour John Roycroft (EG178 *John Roycroft Special*) Gady Costeff dedicated the following endgame study to the grand old man of endgame studies.

S.1. G. Costeff  
EG178, 2009

h8h6 0000.76 8/7 BTM, Win

1...g1Q 2.e8S Qg5 3.b8B Qf5 4.Bd6 Qf7 5.d8R, and White wins; cf. EG178#16982 and HHdbIV#75540.

Endgame studies featuring *allumwandlung* are rare, and showing this theme in a pawn study is quite exceptional.

In November 2013 I received an email from Gady in which he showed me a surprising example of the same theme (S.2).

I have not seen the solution, but the introduction is obviously 1...d1Q 2.e8S+ Kg6 3.a8B Qd4 4.c8R, and White wins.

Gady writes: "I doubt the composer was aware of my study but by shifting the matrix one file to the left he saves 4 (!) pawns, provides an extremely elegant setting and even

simplifies the play though the knight promotion now occurs with check. This study is such a vast improvement that is in a different class."

S.2. G. S. Tallaksen Østmoe  
*Die Schwalbe*, October 2013

g8h6 0000.63 7/4 BTM, Win

Østmoe is a strong Norwegian IM who published his first endgame studies a few years ago. He has already composed some impressive works and is obviously a coming man among Norwegian composers.

Whenever you see a composition that reminds you of a previous work it is natural to get suspicious and assume that the author has done little more than finding a better setting. Gady does not think of this possibility, but I decided to send an email to Østmoe and ask him if he knew Gady's study. Østmoe told me that he was not aware of it when he composed his version of the idea, but that he had seen it later in HHdbIV. As I know Østmoe personally I am convinced that this claim is true. When I informed Gady about Østmoe's answer he wrote: "I was not worried about authorship, just wished to share my appreciation for his excellent work." I for one appreciate this way of looking at compositions. On the other hand this does not change the verdict that the priority of having realized the idea belongs to Gady, and his study is of course an anticipation of Østmoe's work.

Here is a study that Gady created in his youth.

S.3. G. Costeff  
1st place 2nd WCCT, 1981

g7e7 o710.33 BTM, Draw

The main line runs: **1...Rg1+ 2.Kh8 Rf8 3.Re6+ Kd8 4.Re5 a4 5.Rd5+ Kc8 6.Rd4 a3 7.Rc4+ Kb8 8.Rc3**, and White draws; cf. EG78#5358 and HHdbIV#49048. As a matter of fact White does not draw because, recently, the composer found that **8...Rg3** wins for Black.

It is not unusual that composers overlook a refutation since they are so absorbed by their ideas that they become blindfolded; however, this was a tourney with many nations taking part, and it is surprising that nobody observed a cook that should not be too difficult to spot.

Fortunately it is easy to find a correction. Gady simply adds a white pawn on f2 and a black pawn on f3 (29xi2013). The f-file pawns preclude **8...Rg3**.

Our excellent cook hunter Mario M. García has sent me corrections of two faulty studies by Amatzia Avni. I had planned to publish both, but an email from Amatzia concerning these corrections made me reconsider my decision. Amatzia finds it unnecessary to publish every correction in EG. In his view it is sufficient to inform Harold so that he can include them in his next version of HHdb (HH: see editorial). On principle I do agree with Amatzia. There are thousands of positions that need correction, and it would be impossible to publish all of them in EG. I prefer corrections of endgame studies that have been reproduced in EG. They should be of a good quality and allow me to

write something about them. So in spite of Amatzia's comment I think that we should take a look at the following position.

S.4. A. Avni  
2nd prize *Shahmat*, 1982

h1h4 1320.34 7/6 Win

**1.Qh5+ Kxh5 2.e8Q+ Kh4 3.Qxe4+ Rxe4 4.Ba5 Rf4 5.Be1+ Kh3 6.Be6+ g4 7.Bxg4+ Rxg4 8.c8R Rd4 9.Rg8 Rd1 10.Rg1** wins; cf. EG99#7654 and HHdbIV#50116. In HHdbIV U. Blass and N. Elkies are credited with the cook **5.Bd5 Rf1+ 6.Kh2 g4 7.Be1+ Rxe1 8.d7**. The composer gave **8.c8Q Rh1+ 9.Bxh1 e1Q**, and in EG99 p. 714 we read that White is unable to win this position. This must be a mistake. White wins easily after **10.Qh8+ Kg5 11.Qe5+**. Now **11...Kh6** and **11...Kh4** are met by **12.Qf6+ Kh5 13.d7**. Black can win the pawn on d7 after **13...Qd2+ 14.Kg3 Qxd7**, but will find himself in a hopeless position after **15.Be4 Qc7+ 16.Kg2**. If Black tries **14...Qe1+** (instead of **14...Qxd7**) the checks will soon take an end. This means that **8.d7** is only another way of showing that **5.Bd5** is a cook [HH: but still this makes Blass & Elkies the first to claim correctly that **5.Bd5** is a cook!]. Mario is also credited with a cook. After **8.c8R** Mario's move **8...Rg7** looks strong. It is difficult to see how White can make any progression.

Mario proposes to add a white pawn on h2. This seems to prevent both cooks. If White tries **5.Bd5** then **5...Rf1+** leads to perpetual check as h2 is no longer accessible for the wK. And in the final position the extra pawn on h2 secures the win.

[HH: but the solution should end with **8.c8R** "and wins", as after **8...Rd4** many moves win (as White can afford to lose **wPd6**). Some of the

charm of the composition is lost: 9.Rg8 and 10.Rg1, which were the only winning moves in the original setting. Adding material and losing play is in my view not a successful correction].

In November 2013 Harold sent me an email: "I have some news regarding the version of Réti's study you discussed in EG192 p. 110. Recently I chanced on a reproduction in this version, in Jakov Vladimirov's nice book *1000 Priključenyi na Shakhmatnoi Doske (1000 Adventures on the Chess Board)*, Moscow 2006/7, page 159, diagram 338 (...). There I read that Dawson wrote about this study in *The Chess Amateur*, January 1922, of which I possess photocopies (...)."

Harold adds the following commentaries: "It is stated there that Dawson found the position in *Teplitz-Schönauer (Anzeiger?)* of 30x1921. The rook ending is supposed to be from a game played at Berlin. Of course, at the time, often such stories were told in connection with endgame studies. More interesting is the fact that Adamson, proposed moving the bR to a7 to make it sound (as you did in EG192). Further, the well-known version by Adamson (HHdbIV#08687) is given here in text. I would like to see *Teplitz-Schönauer Anzeiger* of 30x1921. The newspaper is digitally available on-line

<http://anno.onb.ac.at/cgi-content/anno?apm=o&aid=tsa>

but only until ii1920... And do not forget the *Deutsch-Österreichische Zeitung* of iiix1921 (not available on-line, as far as I know). Although much has been written about this study, before I see it in print in its original source, I cannot exclude the possibility that Réti had seen the draw in a Berlin game; this would also explain why he waited so long to publish it under his name in *Kagan's Neueste Schachnachrichten* 1922."

This is exciting and I wonder if one of our German readers would be able to check *Teplitz-Schönauer Anzeiger* of 30.x1921. Who accepts the challenge?

In his article on the Rice MT in EG195 Alain Pallier published a correction of one of

Kubbel's studies on p. 19. It turns out that a wrong version was printed in the article. The bB should *not* be on c8, but on g4 to prevent 1... Qg3. The former version with the bishop on c8 (*ChessStar* 3xii2011) was cooked by J. Polášek.

S.5. L. Kubbel  
Best End Game, Rice MT 1916,  
Correction by A. Pallier  
Original

a3a1 3041.21 5/4 Draw

**1.e7!** (1.Sb3+? Kb1 2.Bd3 Bf5 3.Sd2+ Kc1 4.Sb3+ Kd1 5.Sxc5 Bxd3 wins, or 1.Bd3? Bf5! 2.Bxf5 Qf6 3.Sb3+ Kb1 4.Sd2+ Kc1 5.Sb3+ Kd1 6.Bd3 Qe7 wins) **1...Bd7!** (1...cxd4 2.e8Q Qd6+ 3.Kb3 Be6+ 4.c4 Qg3+ and, e.g. 5.Ka4 Kb2 6.Qf8 Qb3+ 7.Ka5 d3 8.Ba4 Qxc4 9.Qf2+ Kc3 10.Qe1+ Kd4 11.Qh4+ and the B v B+P ending that follows is drawn or here 2...Qxc2 3.Qe1+ Bd1 4.Kb4 Kb2 5.Bc4 Qc3+ 6.Qxc3+ dxc3 7.Bd3 draws) and we're back in the solution as given in EG195. In short: **2.Bd3** (or 2.Sb3+ Kb1 3.Bd3) **2...Qd6 3.Sb3+ Kb1 4.e8S! Qg3 5.Sd6 Qxd6 6.c4+ Qxd3 stalemate.**

When I saw Alain's version I remembered that I had made a similar attempt some years ago. I even sent my version to Ed van de Gevel for publication, but Mario found a flaw. I do not remember the details, but I also involved Timothy Whitworth in my project. Our readers probably know that Timothy has written an excellent book, mentioned in Alain's article, on Kubbel's endgame studies, so Timothy showed great interest in my efforts to find a sound setting. But it was all in vain. I think that the unfortunate transposition of move 2 and 3 in Alain's version was a major problem in my setting too. I tried to solve it by adding a white and a black pawn on the h-file but, since I do

not like adding material that does not take part in the play, I ultimately left my work unfinished.

In **EG195 S.4.** I mentioned an endgame study by H. Rinck that had been cooked by Marco Campioli. I also mentioned two ways of eliminating the second solution proposed by Marco. HH added the comment that in 2012 Mario M. García had proposed to put the wR on d7. Marco has sent me a letter in which he shows that he proposed this correction in 2011. It appeared in Marco's book *Primi premi degli studiosi italiani / First prizes of Italian study composers*, Sassuolo 2011. A short review of the book by Alessandro Sanvito can be found in *Schacchi e Scienze Applicate* 30 (2012) p. 57 under the heading "Historical Chess Abstracts". Marco does of course concede that Mario must have found the same correction independently.

Marco has also sent me some corrections. I do not show them here, but I offer an interesting refutation of a supposed cook.

S.6. A. Grin, V. Korolkov  
*Shakhmaty v SSSR*, 1961

h7f8 o56o.3o 6/4 Win

**1.e4 Bxe4 2.Rf3+ Bxf3 3.Rg8+ Kf7 4.Rg7+ Kf8 5.g6 Bxd5 6.Rf7+ Bxf7 7.g7 mate.** Someone claimed in 1962 that 1...Bxg5 draws; cf. HHdbIV#32075. A correction appeared a year later in the same journal. The wRb3 was moved to c3 and bBc2 to b1; cf. HHdbIV#32074. I have no idea why 1...Bxg5 was regarded as a refutation, but the new setting indicates that it has something to do with wRb3 being *en prise*. This means that White cannot play 2.Rxg5. Marco points out that White can play 2.Rg8+ Kf7 3.Rg7+ Kf6 4.Rb6+ Ke5 5.Rxg5+ Kxe4 6.Rb4+. This is a 7-piece position so the result can be

checked in the Lomonosov tablebase, but it seems to be an easy win for White. I would like to add that there is another refutation of the supposed cook: White can also play 2.Rf3+ Ke7 3.Kg7 and now White is threatening to take the bishop on g5 next move. If Black plays 3...Bh4 then White wins the bB on c2 after 4.Rf7+ Kd8 5.Rd6+ Kc8 6.Rc6+. If 3...Bxe4 then 4.Rf7+ Kd8 5.Rxg5 leads to another 7-piece position that seems to be quite hopeless for Black. I conclude that the original setting was sound.

Axel Ornstein is a strong IM who has won the Swedish championship several times. He has sent me some comments on Spotlight 38 in **EG194**. Becker corrected two of his flawed studies, but Axel doubts that the corrections are sound. In **P.2.** he cannot find a win after 4...Bg6, and I am inclined to agree with him. White can win the black pawn on a5 after 5.Rg4 Bh5 6.Rg5 Be8 7.Rxa5, but the resulting endgame is a database draw. (Black can of course prolong the loss of the pawn by playing 5...Be8. But 6.Rg8 Bh5 7.Rg5 leads to the same position. So why waste a move?) After 6...Be8 White could try 7.Rg8 Bh5 8.Rb8, but then 8...Kd3 9.Ka6 Kc2 10.Kxa5 b3 is another database draw.

[HH: according to the 7-piece EGTB, the correction of **P.2.** is sound. The first four white moves given in **EG194** are unique, and after 4...Bg6, both 5.Rg4 and 5.Rh6 win, e.g. 5.Rg4 Bh5 6.Rg5 Be8 7.Rg8! Bh5 and now 8.Ka6 Kd3 (a4; Kb5) 9.Rg5 Be8 10.Rg3+ Kc2 11.Kxa5 b3 12.Kb4 b2 13.Rg2+ Kc1 14.Kc3 b1S+ 15.Kd3 which still looks like a draw but a 6EGTB win].

In **P.4.** Axel would like to know how the natural move 1.Bb3 is refuted. As **P.2.** and **P.4.** are based on the same idea it is not easy to see why 1.Bc4 wins and 1.Bb3 loses as 1.Bb3 corresponds to 4.Bg6 in **P.2.**

Axel adds that the outcome can be checked in the Lomonosov tablebase and expects that the answer will soon appear. The composer is of course welcome to defend his solutions.

In **EG194 P.9.** I showed a correction by Pal Benko. Axel is not convinced that this correction is sound. After 1.Sf3 Kf5 2.Sxh4 Kf4 3.Bd3 he claims that 3...e5 draws. The natural

continuation 4.d5 e4 5.Bc2 Kg3 6.Bxe4 Kxh4 7.Bxh7 leads to a database draw, and I do not see how White can improve his play.

The critical comment on #19282 in *EG194* Supplement has inspired Javier Rodriguez Ibran to search for a setting in which White cannot win in two ways after 7...Sa6. Javier adds a black pawn on e7 and a black pawn on h5. Now 7...Sa6 gives the desired mate, but Javier

prefers to regard 7...Sc6 8.Sd7 Ka6 9.Bxb6 Sb8 10.Sxb8+ Kxb6 11.Sd7+ Ka7 12.Se5 h4 13.Sc6+ K~ 14.Sxe7 h3 5.Sf5 h2 16.Sg3 as the main line. This however is not what the composers wanted to show.

As usual I call for the assistance of our readers to help me in making this column attractive and worth reading.

## Study of the Year 2012

The selection of “**The Study of the Year**” is organized by the World Federation for Chess Composition and aimed at introducing a single friendly endgame study to the general public. The study should appeal to chess players of various levels and encourage them to pay more attention to endgame studies. Composers were invited to submit a single study (either their own or by others) that was published (either

in a magazine or in an award) during the year 2012.

In all, 24 candidate studies were considered by an international panel of endgame study experts (David Gurgénidze, Oleg Pervakov, Gady Costeff, Ilham Aliev and Harold van der Heijden), who scored the studies independently. The scores (and all studies) can be found here: [http://akobiachess.gol.ge/study\\_2012.html](http://akobiachess.gol.ge/study_2012.html)

S.1. Y. Afek

2nd prize Timman 60 JT 2012

a2b8 3514.31 8/5 Win

**1. Rb7+** (1.Rxc8+? Kxc8 2.Re8+ Kc7 3.Bd6+ Qxd6 4.f8Q Qxf85.Rxf8 d2 6.Rf1 dxc1Q 7.Rxc1 Ra5+! 8. Kb2 Ra6 draws) **1...Ka8 2.Ra7+ Sxa7 3.Re8+ Sc8 4.Rxc8+ Ka7 5.Bc5+ Rxc5 6.Ra8+** (6.f8Q? Qg2+ 7.Ka3 Ra5+ 8.Kb4 Qd2+ 9.Kc4 Qxc1+ with perpetual check) **6...Kxa8 7.f8Q+ Qb8 8.Qxc5 d2 9.c7** (Qa5+? Qa7;) **9...dxc1S+**! A new bS is born on the square where his white counterpart was captured... **10.Kb1!** (10.Qxc1? Qxc7! 11.Qxc7) **10...Qc8!** (Qxb3+; Kxc1

**11.Qc6+ Ka7 12.Kxc1 Qh3! 13.c8S+**! and a new wS is born on the square where the bS was captured! (13.c8Q(R)? Qf1+ and stalemate by the black desperado queen; 13.c8B? Qxb3 14.Qc7+ Ka8) **13...Kb8 14.Sb6! Qxb3 15.Qc8+ Ka7 16.Qa8+ Kxb6 17.Qb8+** wins.

This is a study with a mutual Phoenix theme: both the bS and the wS are captured and re-born on the very same squares!

# Obituary

## Beating the time – Vitaly Kovalenko (23v1947 – 5iii2014)

BY YURI BAZLOV

The endgame study art has suffered an irreplaceable loss: the famous Russian chess composer Vitaly Kovalenko has died after a sudden heart attack in the seaside town Bolshoi Kamen (Far East region of Russia).

For me to speak about him today in the past tense is incredibly hard, not only because he was my friend; for nearly half a century Vitaly and I were bound by our common passion: chess poetry. We first met in 1965 when we were barely 18. Here is how he recalled our adolescent time in his last manuscript, dedicated to our collaboration, which he sent me by e-mail only a fortnight before he died: “We were still very green and had only learned the basics of chess composition. Communication over the

board helped us in acquiring much-needed experience... We could spend all night long thoroughly examining our favourite studies, analysing the most puzzling lines of these works and, of course, preparing and designing new ones”.

Yes, all was well. It is fair to say that, in general, in our cooperation I was the one who was truly green. We became enthusiastic about composition almost at the same time when we participated in solving events, and then, thanks to the collection of A. Gurvich, we discovered the wonderful world of the endgame study. However, Vitaly had already expressed himself as an artist and was ready to create serious chess paintings.

B.1. V. Kovalenko  
3rd prize *Vecherny Novosibirsk* 1963  
Correction: G. Kasparyan 1984

d4e1 o3z2.o2 3/4 Draw

1.Bc1 Rf4+ 2.Kc3! Ra4 3.Bc2 a2 4.Bb2 Ra3+! (4...a1Q 5.Bxa1 Rxa1 6.Kb2! and the bR is trapped!) 5.Bxa3 a1Q+ 6.Bb2! Qa2 7.Bb3! Qb1 8.Bc2! Qa2 9.Bb3! positional draw with perpetual pursuit of the bQ.

However, for Vitaly the most successful year on the creative area was 1967. In a large creative competition first announced in *Pri-morsky Krai*, its judge, the international master V. Tyavlovsky, noted that not only the two prize winners came from the Far East but two more got 1st and 2nd honourable mention. The best study:

B.2. V. Kovalenko  
1st prize *Tikhookeansky Komsomolets* 1967

d2e8 o4o0.o46 6/8 Win

1.Rb7 cxd6 2.Rxg7 o-o-o 3.Ra7 e5 4.Kd3 (Ke2) e4+ 5.Ke3 a5 6.Kd2 e3+ 7.Ke2 a4 8.Kd1 e2+ 9.Ke1 wins. Black is in zugzwang and loses a rook.

In the following year, Vitaly convincingly won the prestigious international tourney of the main Soviet youth newspaper *Komsomolskaya*

*Pravda* with at the time had a circulation of several millions. Behind him came leading composers like N. Kralin, A. Bor, Yu. Dorogov, A. Frolovsky, and others.

B.3. V. Kovalenko  
1st prize *Komsomolskaya Pravda* 1968

d2a2 o5o0.o13 4/5 Win

1.Kc1 b3 2.Rxc2 Ka1 (if 2...bxc2 then 3.Rxc2 Ka1 4.Rc6 Ra2 5.Rxf6 with a winning rook ending for White) 3.Rce2 Rc2+ 4.Rxc2 b2+ 5.Kd2 b1Q 6.Rh1! (6.Rc1? Qxc1+ 7.Kxc1 stalemate) 6...Qxh1 7.Rc1+ Qxc1+ 8.Kxc1 Kxa2 9.Kc2 and Black must resign.

Later, our life paths diverged and converged again. After obtaining a degree in engineering, Vitaly moved to the city Bolshoi Kamen, where he worked for more than forty years in senior positions at one of the largest marine dockyards in the Far East. His work, including frequent business trips, and a large family (together with his wife Irina, he raised four children!) left him little time for his favourite hobby, but somehow, miraculously Vitaly found a way to solve this problem. He left behind a huge chess legacy, including several books and more than two dozens articles. Vitaly collected all the published studies of Vitold Yakimchik, among which are also tones not widely known to endgame study friends. He made great efforts to find and obtain the archive of this outstanding Soviet chess composer, but in the end he did not have sufficient funds to finalize his hard work, which I am sure every one of us would look forward to.

It is almost unbelievable that with such employment, Vitaly published more than 750 studies; only Rinck and Pogoyants did more!

(HH: also Prokes and Gurgenzidze). Although studies predominated in his work, he also composed problems with the same passion, and in every genre with the possible exception of fairy chess. These were almost as close to his heart as studies. It is difficult to state the exact figure, but his output of chess problems was certainly in the hundreds.

Vitaly had no particular goal and never wanted to beat anyone: standard production was profound alien to him and he was a master of the material and his imagination and inventiveness were inexhaustible. It is no wonder that more than 80 of his studies were awarded prizes with almost 40 obtaining the highest distinction in Russian and international competitions. He repeatedly won medals in Russian championships as well as performing successfully in the WCCI, in one of which (2007-2009) he appointed judge along with two others. His best works were entered for the *FIDE Album*, which brought him the title of International Master of Chess Composition in 2007.

One of his more recent studies is:

B.4. V. Kovalenko  
3rd prize *Shakhmatnaya Kompozitsia* 1996

f2h1 1343.03 3/7 Win

1.Be4 Rf1+ 2.Kxf1 Sg3+ 3.Qxg3 Bh3+  
4.Qg2+ (great reply!) Bxg2+ (fxg2+; Kf2 zz)  
5.Kf2 h3 6.Bh7 (Bg6) Bf1 7.Kxf1 f2 8.Be4 mate.

Such studies with forced play featuring sacrifices and counter sacrifices as well mutual zugzwang motifs are also called study tasks. In this work the author managed brilliantly to combine everything to which he had himself selflessly been devoted throughout his unfortunately short life.

Naturally, being a co-author with Vitaly for such a long time, I cannot resist showing a few of our joint studies.

B.5. Y. Bazlov & V. Kovalenko  
1st hon. ment. *Krasnoe Znamya* 1971

d8f8 4040.10 4/3 Win

At first sight it seems that White should be able to win without much difficulty. For example, 1.Qf5+? Bf7 2.Bf6 and it looks like Black can only resign. But after the surprising 2...Qd4+! 3.Bxd4 there is a stalemate with a pinned bBf7. Strangely, the only way to win is a Q-sac at the first move...

1.Qf1+! Qxf1 2.Bd4! Qg2 (2...Kf7 3.h8Q Kg6 4.Qg7+ Kf5 5.Qf6+ K- 6.Qxf1) 3.h8Q+ Qg8 4.Qf6+! Qf7 5.Qh6+ Kg8 6.Qh8 mate.

Anatoly Kuznetsov was so pleased with this study that he included it in several of his books and articles.

B.6. Y. Bazlov & V. Kovalenko  
2nd prize *Shakhmatnaya Moskva* 1971

d3f5 0050.11 4/3 Win

1.Bc7! g4 2.Ke2 Bh4 (otherwise 3.h4) 2.Bd3+! Kg5 4.Kf1! (Black is in zugzwang. Bad is 4.Be4? gxh3 5.Bd8+ Kf4! With a draw) 4...gxh3 5.Bd8+ Kg4 6.Be2+ Kg3 7. Bc7 mate. An ideal mate with two active self-blocks.

During one of our meetings Vitaly showed me a central board position with almost equal material in which White sacrifices a rook and then delivers a beautiful mate by a knight. But it needed an interesting introduction involving play of the black pieces to the ‘necessary’ squares adjacent to the bK. At the time we considered it impossible to do this but a few years later (in 1986) we succeeded and the study won high distinction in a major international tourney:

B.7. Y. Bazlov & V. Kovalenko  
2nd prize Poland Chess Federation 40 AT  
1986

d1e6 0405.11 5/4 Win

**1.Se5! Rd6! 2.Kd2! Sd8 3.Rf5! Rd5 4.Rf8 Kxe5 5.Sg6+ Kd4 6.Sxe7 Se6! 7.Rf6, and:**

— **Rd6 8.Rf5 Sc5 9.Rd5+! Rxd5 10.Sc6 mate,**  
or:

— **Rb5 8.Sc6+! Kd5 9.Rxe6 Rb6! 10.Re5+! Kd6 11.Sa5! Kxe5 12.Sc4+! and 13.Sxb6 wins.**

The second line with lively piece play complements the first line which shows an ideal mate. In one of his books, the famous GM John

Nunn calls this one of the best studies of the 20th century, certainly very high praise, but such credit belongs primarily to Vitaly because he was the one who invented this beautiful idea which we jointly worked out to include the interesting piece battle.

The story of my friend would be incomplete if I did not mention another little-known side of his passion for chess (which he learned at the age of 6). Vitaly was not just good at chess, he was an excellent tournament player. When he still was a student, he made a candidate master norm, winning competitions for the Far Eastern Polytechnic Institute, and also won many chess tournaments. I remember that in August 1968 we both played against Botvinnik in a clock simul that the 6th world champion gave in Vladivostok against ten first-grade youngsters. Only three of them, including Vitaly, achieved a draw.

Despite his constant shortage of time, he somehow still managed to practice composition, as well as coaching and officially leading a team during championships and acting as judge. He also worked with children and taught them about his favourite subject in the junior sport schools. He left a trace in the hearts of Caissa’s fans which will be there for many years. Future generations of chess art lovers will learn from his studies, many of which will forever belong to the treasure of chess composition. We will remember him for his outstanding contribution to our art!

*(translated from Russian by HH).*

## The Pawn Endings of Vitaly Kovalenko

BY YOCHANAN AFEK

With the death of IM Vitaly Semenovich Kovalenko (23v1947- 5iii2014) the art of the endgame study lost another fine composer of the old classical school. He lived in the remote city of Vladivostok thus it was for us a rare and pleasant opportunity to meet him during the 51st annual composition congress in Jurmala (Latvia) in 2008.

He composed more than 500 player friendly studies (he also composed direct mate problems) and these were published all over the world, starting from 1963 until his last days; he was awarded with a number of prizes and other distinctions. Occasionally he worked together with other composers and his life-long cooperation with his celebrated hometown mate Yuri Bazlov was particularly successful, resulting in some 50 quality co-productions. In 2007 he was awarded the title of International Master for Chess Composition, a well-deserved recognition for a rich 50-year career.

His studies display a wide range of attractive ideas employing a large number of themes and motifs. Nevertheless, during his long career he always had a soft spot for pawn endings. Vitaly Semenovich used various motifs of the pawn ending, such as tempo-play, opposition, excelsior and under-promotion, to name just a few. Nevertheless, I have been personally more interested in those pawn studies that manage to double a basic element in two main variations on different files, ranks or diagonals. Even if they are sometimes not particularly beautiful, I still find them attractive when they create a kind of harmonious echo or, even better, as an echo chameleon. On top of their artistic

merits there are also more prosaic reasons to make them special: no matter how simple they are, they hardly ever appear in over the board practice. However, this is just healthy jealousy on the part of someone who fails to create such wonders himself.

Let us have a look at some examples. The stalemate is a natural and effective motif to start with:

A.1. V. Kovalenko  
2nd comm. Magadan 50 JT 1988

g5f7 0000.51 6/2 Draw

**1.h6 h2 2.h7 h1Q 3.f4**, and a) **3...Qxh7** stalemate!, or b) **3...Ke8 4.Kg6 Kf8 5.g5!** (5.f7? Qc6+! 6.f6 Qe4+ wins) **5...Qh2 6.f7 Qb2 7.f6 Qb1+ 8.f5 Qh1 9.h8Q+ Qxh8** stalemate!

Even if not the most exciting play it is still a perfect Chameleon Echo: all pieces are “climbing” one rank up to create the new stalemate and doing so change their colour.

The centenary of Nicolay Dmitryevich Grigoriev (1895-1938), the legendary pawn ending specialist, was celebrated in 1995 by a composing tourney. Here is one favourite of mine:

A.2. N. Grigoriev  
2nd *Shakhmatny Listok* 1929

h1b8 0000.32 4/3 Draw

**1.Kg2!** (1...b6? Kc8 2.Kg2 Kd7 3.b5 Ke6 wins) **1...Kc7 2.Kf3! Kd7** (Kb6; Ke4) **3.Kf4!** (3...Ke4? Ke6 4.Kd4 d5! 5.Ke3 Ke5 wins) **3...Ke6 4.Ke4!**, and now: a) **4...b6 5.Kd4! d5 6.Ke3 (Kc3) Ke5 7.Kd3 d4 8.Kc4! Ke4** stalemate, or b) **4...d5+ 5.Kd4! Kd6! 6.b6! Ke6** (6...Kc6 7.Ke5 Kxb6 8.Kxd5 Kb5 9.Kd6 Kxb4 10.Kc7 b5 11.Kb6 draws) **7.b5! Kd6 8.b4! Ke6 9.Kc5! Ke5** stalemate!

Kovalenko was probably inspired to commemorate the occasion with this entry:

A.3. V. Kovalenko  
1st/2nd special prize Grigoriev 100 MT 1995

a3e8 0000.84 9/5 Draw

Following the obvious key **1.Kb2** the solution splits into two symmetrical variations: a) **1...exd6 2.Kxc2 Kf7 3.Kd3 Kxf6 4.Ke4** (4.Kc4? Ke5 5.Kd3 Kd5 or 4.Kd4? Ke6 5.Ke4 d5+ 6.Kd4 Kd6 win) **4...Ke6 5.Kd4 d5 6.Kc5 Ke5** stalemate, or b) **1...exf6 2.Kxc2 Kd7 3.Kd3 Kxd6 4.Ke4 Ke6 5.Kf4 f5 6.Kg5 Ke5** stalemate.

It is extremely rare to show an echo built up by just using pawns as the raw material. That is why the rest of the examples already include the promoted queens. Next is the well-trodden

skewer shown by Kovalenko (and others) in a pair of symmetrical echoing thematic lines:

A.4. V. Kovalenko  
1st hon. ment. Mikhoap 35 JT 2006

d5c3 0000.34 4/5 Wi

**1.Ke6 Kxd4 2.Kd7** with two echo lines: a) **2...b5 3.Kxc7 b4 4.Kd6 b3 5.c7 b2 6.c8Q b1Q 7.Qc5+ Kxd3 8.Qf5+** and **9.Qxb1** wins, or b) **2...f5 3.Kxc7 f4 4.Kxb6 f3 5.c7 f2 6.c8Q f1Q 7.Qc5+ Kxd3 8.Qb5+** and **9.Qxf1** wins.

We conclude with the ultimate chess motif: mate! The highlight of this selection is this co-authored gem:

A.5. Y. Bazlov & V. Kovalenko  
1st hon. ment. Mkhedruli 1975

c4c1 0000.34 4/5 Win

**1.Kd3 Kd1 2.d5 h4 3.d6 h3 4.d7**, and: a) **4...h2 5.d8Q h1Q 6.Qd4** (avoiding the beautiful trap: 6.Qxf6? Ke1 7.Qa1+ Kf2 8.Qxh1 stalemate!) **6... Qf1+ 7.Kc3+ Ke2 8.Qd2** mate, or: b) **4...h2g2 5.d8Q g1Q 6.Qxf6 Ke1 7.Qe5+ Kf2 8.Qe2** mate.

Even if pawn endings were not as prominent in Kovalenko's works as they have been for Grigoriev or Zinar, he still made a significant contribution to this sub-genre. Rest in Peace, Vitaly Semenovich!

# Obituary

## Alberto Foguelman (30x1923 – 9xii2013)

BY JOSÉ A. COPIÉ

Alberto Foguelman, IM (FIDE), has passed away recently. We will undoubtedly miss this noble person with his love for chess, his sporty chivalry and notable human qualities. His commitment (perhaps we should say his loyalty) to the *Círculo de Ajedrez de Villa del Parque* (Chess Club of Villa del Parque in Buenos Aires) was notable. He once confessed that “... *in the fifties and sixties I was often invited to join a variety of chess clubs. But I never wanted to stop being a Villa del Parque chess player, because I just didn't want to switch allegiances ...*” I reflected this in the Second Volume of my *Historia del ajedrez argentino (History of Argentine Chess)*. This attitude characterized him, because he always made it a personal priority to promote the development of neighbourhood chess clubs. He did so by selflessly playing simultaneous chess matches or speaking to amateurs. Along with other pioneers back in the fifties and sixties, when he reached his top performance in high competition, he sought to democratize chess playing. His valour and intellectual honesty led to a lack of recognition among local decision makers. Despite that, he continued to struggle to heighten the art of Caissa, in favour of a democratic practice that would not only extol the achievements of this country in its golden age, but also see to it that the opportunities were available to all, even for those in the furthest reaches of the country. And that's why he earned the respect and love of those who could interpret the dreams and utopias of this gentleman who fought for us at the chessboard and throughout his life.

This notable chess player reached extraordinary heights in the national chess arena, becoming one of our most outstanding chess players. Not without a touch of irony, he would say: “... *I was certainly not a child prodigy* (Let

us not forget he was born in 1923); *from 1958 to 1965 I made significant progress and was entitled to consider myself among the best ten chess players in the country. But I should mention a particular circumstance: I was a contemporary of an exceptional group of players: Panno, Najdorf, Julio Bolbochán, Rossetto, Guimard, Raúl Sanguineti, Pilnik, Eliskases... it was hard to stand out ...*”

Although I've known Foguelman for more than fifty years, our friendship began to flourish when we would meet at the International Friends Day celebrations organized year after year by the great composer and engineer Oscar J. Carlsson (1924-2011). Others at these encounters were Prof. Zoilo R. Caputto, Luis M. Parenti (1904-2000) and Gaspar D. Soria (1917-2006). We began exchanging points of view regarding my magazine *Finales... y Temas*, and even composed jointly some Studies. I believe our last chess activities took place last year when we sent a pair of Studies to compete in the 5th international tourney *Zhigulovskie Zori*, that took place in Russia, and in *Sinfonie Scacchistiche* 2013-2014, organized in Italy by local composers. These activities led him to correspond frequently with me. I actually have his last letter dated August 25, 2013 where among other things he shared his views on a new Study we were composing together.

I personally met maestro *Alberto Foguelman* during a simultaneous chess match he played along Eduardo Scanavino in Buenos Aires. This was on May 26, 1962; that same year, and for the second time in his career, my friend earned second place in the Argentine chess championship, whereby he represented the country at the Varna Olympics that took place in that Bulgarian city between September and October of that year, with a spectacular 83.3%

score, without losing a single game; Argentina thus earned third place among 37 countries, after the Soviet Union and Yugoslavia. He was the only Argentine not to lose a single game at these Olympics. I learned to appreciate the power of his game and his sporty gentlemanliness on more than one occasion. I followed his career quite closely, which shined from 1955 to 1965.

Foguelman was born in the city of Buenos Aires, but was raised in the city of Mercedes till he reached his 20th birthday. His older brother taught him to play chess when he was 6 years old and when he turned 13 he played at an open tournament there. He was a self-taught chess player, having never taken classes with a teacher. As a top chess player he participated in 13 Argentine championships where he twice earned second place. He also participated in two FIDE Olympics and in various significant master tournaments.

Alberto Foguelman authored three chess books edited by himself: *“Ajedrez de lujo,”* Buenos Aires, 1978, *“Damas Cazadas,”* Buenos Aires, 1988 and in 2007 his third and last book, a brief treatise entitled *“Selección de sus finales artísticos (período 1984-2007),”* a work containing a selection of 42 studies of his own.

He slowly left active practice, mainly for health reasons, and began to compose end-game studies in the early 1980s, his first composition being dated 1984. He displays a high concept of beauty in chess; he differentiates the spectacular, which is often understood as brilliance, from subtlety, which he prefers as being essentially pure. He values a mistake insofar as it enables materializing beauty in a chess match. This implicit or underlying praise towards an error is motivated and justified if it breaks the absolute balance of forces in dispute, thus unleashing the harmonic process of “putting together” a work of art. Here, he definitely

privileges, above all, an elaborate positional web where manoeuvres are subordinated to a global plan and not to a combination of isolated manoeuvres regardless of how spectacular they may be. Undoubtedly, beauty will be proportional to the mistake, to its quality. These ideas certainly come to the surface in Foguelman when he composes, insofar as he endows his works not only with his broad experience as an active chess player, but also with the finesse he brings to the art of chess playing”.

Following, we present a brief selection of Foguelman’s studies, composed in his later years, but we will not bid him farewell because he will always be with us, through his games, his studies, his works and, above all, through the most dignifying example of a life conveyed to peers and to future generations.

## Hamlet Gehamovich Amiryan

(11Xi1934 – 1X2013)

BY KAREN SUMBATYAN

My friend and colleague Hamlet<sup>(1)</sup> (1) Amiryan passed away at Sochi Airport while returning to Yerevan, Armenia's capital, after a break and therapy. His heart... Some years ago he had had a cruel infarct. Armenia has lost its second (after Henrikh Kasparyan) prominent study composer, full of original ideas which could be realized in the future by young ambitious Armenian Didukhs, Pervakovs and Vysokosovs (where are you, guys?)

He was born into a typical family of Yerevan intellectuals: his father was a lawyer and his mother a teacher of Armenian language and literature. Hamlet studied polytechnics, became a planning engineer and worked all his life in various research institutes. Apart from chess, which was evidently his real passion, Amiryan was very strong at table tennis and in that even achieved the second rank of Soviet Master of Sports!

The happiness of Hamlet's life, as he used to say, was his family. He was a careful father

for his two daughters and as grandfather for his two grandsons, already Muscovites, who came to Yerevan for long vacations. His elder daughter, Anush, says that the principal subject of their father's lessons was honesty. He often played with her and her sister in different games including, of course, chess but he but never insisted that they studied because he always respected their right to choose their own way (as a result, both girls chose the medical profession and are working in Moscow). Nothing could really bother the head of an Armenian family, but if you have two little children something can happen, can't it? Anush remembers how the whole family was trying to find the chess pieces which were suddenly missing, and how Hamlet was upset to see the destroyed position on his chessboard...

It is really impossible to say how many studies Amiryan composed. At the end of his life he had time to publish his selected works (over 400 studies and some problems), but I'm sure that the content of his numerous and famous scrap books is much richer. When, once in Yerevan, I was showing him some new Russian studies, Hamlet used to say "I've got the same thing" and after checking his scrap books he found it! This heritage should certainly be studied and corrected.

Hamlet Amiryan and the PC is a special topic. He composed all of his life without the assistance of computer programs. And that explains why the publication of a new composition by Amiryan was a real gala day for Russian and EG "study killers". Did he really care? I don't think so. All the incorrect studies took their worthy place in his personal Album.

We met for the first time during the summer of 1984: I will never forget that day. I gathered

---

(1) Hamlet – of course, from Shakespeare. Foreign names are very popular to my compatriots who never miss the opportunity to show that they belong to European civilization. That's why Armenians usually thank by saying *merci* instead of the much longer local *shno-ra-ka-lu-tsun*, and you can easily meet a Napoleon or a Medea in an up-country Armenian village. Our great poetess Silva Kaputikyan explained in one of her famous rhymes that Armenians love the name of Hamlet because his "to be or not to be" became the main question of our people who survived in spite of awful historical circumstances. OK, but what about poor Ophelia? A lot of Armenian girls have this name and it's really hard to understand the intention of their parents and let's not forgive some Armenian Laertes's (as I remember, the destiny of Ophelia's brother wasn't happy either but this name also sounds good); what about them? I guess that my grandparents didn't admire Shakespeare. That's why they named my uncles Alexandre and Romain in honour of Alexandre Dumas and Romain Rolland and my mother Jeanna – in honour of Jeanne d'Arc.

up all my courage before visiting the Yerevan Chess Club in order to see Henrikh Kasparyan who was teaching young chessplayers there. To my surprise, Henrikh Moiseevich knew my first studies and we talked a lot about life and studies. He contacted somebody by phone and within an hour I had the opportunity to meet other Armenian composers who were invited to a cup of coffee with “a prominent visitor from Moscow”. Kasparyan was the Mount Everest there and it was easy to sense the large common respect for him. Hamlet was really happy to live at the same time and place with Henrikh the Great; he collected all of his books and always asked his opinion.

Henrikh Kasparyan, Serguei Varov, Hamlet Amiryan... Who will replace them in my Armenia?

(The author is grateful to Anush Amiryan for the information presented)

**1.a6 (Bb6? Rg5;) 1...Rb8+ (Ra5; a7) 2.Kh7! Kg2 3.a7 (3.g5? Kxf2 4.g6 Rb3 5.g7 Rh3+; 3.Bc5? Ra8 4.a7 Kf3) 3...Ra8 4.Bb6! (Thematic try: 4.Bc5? Kf3 5.g5 Ke4 6.g6 Kd5 7.g7 Kc6 zz 8.Be7 Kb6! 9.Kh6 Rg8! 10.a8Q Rxa8 11.Bf8 Ra1 draws) 4...Kf3 5.g5 Ke4 6.g6 Kd5 7.g7 Kc6 8.Bc5! zz Kb7 9.Bf8 wins.**

This is my favourite Hamlet study: OK, now we can find the “computer zz”, but what harmonic play, and what a fine refutation of the thematic try! Of course, the correct move 4.Bb6 is less paradoxical than 5.Bc5 with the wB is running

away as far as possible. I tried to do it vice versa several times, but without success.

1.b6+ Ka8! 2.Qd5! Rg6! 3.Qd8+ Bb8 4.Qd4! Be5! 5.Qxe5 Rxb6 6.Qh8+! Ka7 7.Qd4 Ka6 8.Qa4 mate.

And, finally, Amiryman's best... unsound study. His beautiful idea is destroyed by the beautiful cook 4... Ba7!! (found by Jürgen Fleck and reported in EG124). Unfortunately, the problem is not just in the introduction. Could this study be corrected? (HH: There are more problems here: White can win by 2.Qh8+ Bb8 and now not 3.Qxg7 stalemate as intended, but the mysteriously looking move 3.Qh5! In the main line, on the 3rd move, there is a similar winning move with 3.Qc5. White will eventually check on a5 and a7, forcing the bK to c8, and then on a8, forcing the bB to b8. A sample line is: 3.Qc5 Bd6 4.Qa5+ Kb8 5.Qd5 Ka8 6.Qe4 Rg8 7.Qa4+ Kb8 8.Qa7+ Kc8 9.Qa8+ Bb8 10.Qa4! and Black cannot keep the position, e.g. Rd8!? 11.Qg4+ Rd7 12.Qc4+ Kd8 13.Qg8+).

History

## Study tourneys from the past - Catalonia (1914-1916)

BY ALAIN PALLIER

*2014 is a crucial year for Catalonia: a self-determination referendum is announced for November (except if the crisis in Spain makes its postponement necessary). Why in 2014? Three centuries ago, in September 1714, Barcelona surrendered to the Bourbon army: it was the end of the War of the Spanish Succession (1701-1714) bringing the Habsburgs and their allies into conflict with the Bourbons. It was also the end of the first Catalan autonomy (Generalitat de Catalunya). Today, 11 September is the National Day of Catalonia.*

By chance, exactly one century ago, the first study tourney organised in Spain was a Barcelona initiative. It was followed by a second one, in 1915-1916.

So far, study tourneys had mainly been the business of countries of Western and Central Europe, or of Scandinavia (with the notable exception of the Australian *Melbourne Leader* tourney in 1903-1905). In southern Europe, especially in Spain, there was a strong tradition of problem tourneys. The country had some leading composers, with problemists like Valentin Marin (1872-1936) – in Catalan Valenti Marín i Llovet – and José Paluzie y Lucena (1860-1938) – in Catalan Josep Paluzie i Lucena. There had been no study composer until in 1900 the Frenchman Henri Rinck moved to Catalonia, near its capital Barcelona, for professional reasons.

The first of these tourneys was announced in chess magazines (e.g. the *Deutsche Schachzeitung*, February 1914) and in *Stadium* no. 66 (April 30, 1914), a magazine published in Barcelona between 1911 and 1930 and devoted to sports, with a short-lived chess column. Its closing date was 15th May 1914. A tourney for two-movers was announced at the same time. Both were organized on the occasion of the

first chess championship of Catalonia (25th January to 12th April 1914). The judge of the study section, Esteban (Esteve in Catalan) Puig y Puig, was among the participants. In 1913, he had won the Barcelona championship.

The name of Puig y Puig is now well known to our readers if they can recall the articles about the *La Stratégie* 1912-1914 tourney (see **EG**192-194). The Spanish cook hunter had just fought a tough battle lasting for months with the organizing committee of that tourney trying to have Holm's study eliminated from the award to give priority to the study of his friend, Henri Rinck. Some weeks later, he exploded in anger in *Stadium* (no. 69, 30th June 1914, pp. 546-7 – remember that the final award had been published on 5th May 1914). He wrote that the tourney had ended with full triumph for Rinck but that the final result (Rinck's study, first-ranked in the award, but with a second prize) was contrary to the rules of the tourney. He also insisted on the presence of flawed studies by Kleindinst, De Villeneuve-Esclapon and Karstedt (see **EG**194) and concluded with a damning statement about Marcel Lamare that does not need to be translated from Spanish: the cause of all that was the "manifiesta incompetencia del Director del Torneo". With this new tourney, Puig y Puig had his hands free to act as he pleased.

There is some vagueness in the naming of the tourney. Caputto rightfully writes in *El Arte des Estudio de Ajedrez*, Vol. 3, p. 52): "Campeonato 1914 (Barcelona)". Also Kasparyan is correct (*Domination*, Vol. 1 and 2) stating (in Russian): "Konkurs v Barcelone". The tourney was linked by its organizers to the first chess championship of Catalonia; but for several authors (Bondarenko, T.R. Dawson, C.E.C. Tattersall), named it the "Barcelona Chess Club Tourney". But *El Club de Ajedrez Barcelona* was

founded some years later, in September 1921. Even worse, Frédéric Lazard, in his 1929 collection, seems to have forgotten that he had sent his entry to Spain and gives the... *Chess Amateur* as the source for his prizewinning study!

The award was published by Thomas R. Dawson in his column of the *Chess Amateur*, in November 1914. Puig y Puig had received 18 entries from 9 composers (one remained anonymous). Participation was just satisfying: of course Henri Rinck was present. Maybe the outbreak of WWI explains why composers gave priority to other concerns. Tattersall, in the 1915-16 *Year Book*, was choosy and wrote: "We give five of the successful studies, and, of course, they are of great merit, but still the work as a whole cannot be considered to be as good as one expects in a competition of this magnitude".

- 1st prize: H. Rinck (France)
- 2nd prize: L.B. Zalkind (Russia)
- 3rd prize: F. Lazard (France)
- 4th prize (equal): H. Rinck (France)
- 4th prize (equal): L.B. Zalkind (Russia)
- 1st honourable mention: W. Queckenstedt (Germany)
- 2nd honourable mention: H. Keidanz (USA)

P.1. H.Rinck  
1st prize Barcelona ty 1914

c2d5 0310.65 8/7 Win

**1.a5 Rxb7** (Kc6 2.a6 Kb6 3.Sxe5 Kxa6 4.Sd7 Rxb7 5.Sxc5+ wins) **2.e4+ Kxd4 3.Sd8 Rb5** (3... Rb3 (Rd7, Rh7) 4.Se6+ Kxe4 5.Sxc5+ (Sxg5+) win) **4.a6 c3** (Rb6 5.a7 Ra6 6.Se6+ Kxe4 7.Sxc5+, or Kxe4 5.Kb7 Rb4 (Rb6) 6.a7 Ra4 (Ra6) 7.Sxc5+ win) **5.dxc3+ Kc4** (Ke4 6.Sb7 Rb6 7.a7 Ra6 8.Sxc5+ wins) **6.Sb7 (Sf7) Rb6 7.a7 Ra6 8.a8Q+ (Sd6+)** wins.

Dawson commented on this study as follows: "the domination of the Rook's cross (14 squares) in an economical way by ONE SINGLE KNIGHT was realised in a masterful way and for the first time".

The second prize was won by Lazar Borisovich Zalkind (1886-1945), a young Russian composer of problems and studies, who had begun a successful career some years ago (I will devote an article to him later this year). Some months earlier, none of his entries had been rewarded in the *La Stratégie* tourney, but here, like Rinck, he submitted two studies and both of them were prizewinners:

P.2. L.B. Zalkind  
2nd prize Barcelona ty 1914

h1c6 0400.44 6/6 Win

**1.g7 Rg6 2.d5+ Kxd5** (exd5; f5) **3.f5 exf5 4.Rf6!** (Now some sources give 4...Rg3 as the main line, with 5.Rf8 b4 6.g8Q+ Rxc8 7.Rxc8 b3 8.Rg7 Kc4 9.Kxh7, but there are duals: 5.Kh2 and 5.Rxf5+, found by Jarl Ulrichsen. In fact, Zalkind's solution simply ran **4...Rxf6 5.g8Q** wins.

Frenchman Frédéric Lazard, once more time, mounted on the podium.

P.3. F. Lazard  
3rd prize Barcelona ty 1914

e3b1 0042.03 4/5 Draw

**1.Bd4 Kc2 2.Bxb2 Bxb2 3.Sb6! Bc1+ 4.Ke2 5.Sa4!** and the mate threat allows White to save the day.

The second tourney in Catalonia was announced in 1915, in main chess magazines but also in *Stadium* (30th October 1915), two weeks after the announcement of a problem tourney for two-movers. The judges were two Spanish amateurs, don Juan Clusella and don Leopoldo de la Fuente (M. Clusella had invented a new problem theme for the two-movers tourney). These events are known as the *Sala Imperio* tourneys: it was the name of a performance hall (for theatrical plays and film projections), located in Diputacio Street, not far from the Plaça de Catalunya, and was in operation from 1909 to 1918. Its coffee room was attended by amateur chess players and by problem *aficionados* since solving contests were organized there. It was also the venue of the first Catalan chess championship the previous year as well as of the Barcelona championships in 1910 and 1912. The closing date was 1st April 1916 with the results to be published one month later. Each participant could submit a maximum of 3 studies. Three money prizes (50, 30 and 20 pesetas) were available.

Tattersall, in the same *Yearbook*, found that the *Sala Imperio* tourney was “unexpectedly interesting”. At least it was a tourney requiring studies with queen against two rooks. Tattersall did not stress this novelty: the *Sala Imperio* tourney was the first thematic tourney ever: with this kind of imposed material, it was *de facto* a domination theme tourney for win studies, even if draw studies were not forbidden. In his long career, Rinck composed ten studies with this kind of material (GBR classes 3200.00 or 1600.00), eight of which are win studies. In the 1920s there were some other tourneys with imposed material such as *Sydsvenska Dagbladet Snällposten* 1924 and 1925 or *Basler Nachrichten* 1924, all dominated by Rinck. It was not until 1931 that the first fully thematic (and specific) tourney for studies only but with a problem theme took place. However, the *Chess Amateur* 1923-1924 composition tourney, for asymmetric problems (i.e. problems with a symmetrical

position but an asymmetric solution), had a study section. Three endgame study composers participated: H. Adamson, T.R. Dawson and the specialist of *asymmetry*, Wolfgang Pauly – apparently his only foray into the field of study.

The award was published in May 1916 in *La Stratégie* which is why some authors, such as Kasparyan in ‘Domination’, give *La Stratégie* 1916 as the source. As usual, Rinck did not miss the date. His three entries won all three prizes (and the 100 pesetas), a perfect score. Only two other composers were rewarded: the Russian Lazar Zalkind again, with the second honourable mention, and the Frenchman Anatole Mouterde (1874-1942) with 1st and 3rd honourable mention.

Mouterde is one those minor composers for which one has ambiguous feelings : he began composing in the 1910’s and sent his first studies to *La Stratégie* for the 1912-14 tourney but to no avail. However, he quickly obtained some good results, with a prize and a mention in the 1914-15 *Sydsvenska Dagbladet Snällposten* tourney. Another notable success was his second prize in the 1916-17 *Chess Amateur* tourney but he was less successful in the post-war years and it seems that he lost his inspiration. Rinck had a notable influence on him: Mouterde also tried to ‘exhaust’ a material balance by composing a series of studies but his attempts were not fully convincing. His analytical skills and his talent were clearly inferior. Mouterde simply could not rival Rinck. For instance, when he published a batch of 30 studies, with BSS versus R, in the *Schweizerische Schachzeitung (Revue Suisse d’Echecs)* of April 1921, no less than 16 of these 30 were seriously flawed (with duals, second solutions, cook and busts). Another series with heavy pieces (win studies, with level material, QR vs QR, in *La Stratégie*, in November 1922 and January 1923) gave results which were no better: only 6 out of 15 were sound. After 1924, Mouterde gave up composing.

Mouterde was an industrialist and belonged to a wealthy family from the Lyon bourgeoisie. He had other interests: before his composing period, he had written and published three

collections of poems: *Les Mouettes Lyonnaises* (1907), *Chrysalide et Papillon* (1907) and *Les Bonnes Pensées* (1908). After WWI, he wrote another book, *Théâtre de guerre*, which was published in 1919. In a letter to Marcel Lamare, he compares chess composition with poetry. He also wrote articles about chess, mainly in *La Stratégie*. As a player, little is known about him but he did take part in the 1925 French Championship (subsidiary tournament). His death was announced after WWII.

Below, I give two of the prize-winners by Rinck together with the honourable mentions:

P.4. H. Rinck

1st/2nd prize *Sala Imperio* 1915-1916

d6a7 1600.00 2/3 Win

**1.Qh7+ Ka6 2.Qd3+ Ka7 3.Qb5** (3.Kc7? Rb8! 4.Qe3+ Ka8 draws) **3...Rf4 4.Qa5+ Kb7 5.Qd5+ Kb8 6.Qe5 Raa4 7.Kd7+** wins.

In his 1918 collection, Rinck rotated the position (Kf5, Qa1; Kg8, Rd8, Rh8) so that Black's forces are on the 8th rank. Several losses of time are possible but anyway the wQ must go to d5 square and set a battery with Qe5 next move.

P.5. H. Rinck

3rd prize *Sala Imperio* 1915-1916

c3b6 3200.00 3/2 Win

**1.Re6+ Kb5 2.Re5+ Ka4 3.Re4+ Ka3 4.Kc4+** the first battery. **4...Ka4 5.Kd5+** the second battery. **5...Kb5 6.Rb3+ Ka5 7.Ra3+** wins. Simple and effective!

P.6. A. Mouterde

1st hon. ment. *Sala Imperio* 1915-1916

c1h3 3200.00 3/2 Win

Mouterde's solution runs: **1.Ra3+ Kg2 2.Rd2+ Kf1 3.Ra1! Ke1 4.Rh2 Qf6 5.Kc2+** (but here there is 5.Kb1! found by HH, EG147, 2003) **5...Qxa1 6.Rh1+** wins.

But the study can be saved if we amend the solution with a different third black move: **3...Qf6 4.Kb1! Qc3 5.Ka2+!** wins, but not 5.Rc2? Qb3+. Of course, this was not Mouterde's idea... [HH: and hence not a valid correction].

P.7. A. Mouterde

3rd hon. ment. *Sala Imperio* 1915-1916

d6d8 1600.00 2/3 Win

**1.Qd4! Rh7 2.Qf6+ Ke8 3.Qg6+ Rf7 4.Qg8+ Rf8 5.Qe6+ Kd8 and 6.Qd7 mate** (the shortest win, but 6.Qe7+ Kc8 7.Qc7 mate and 6.Qd5 Rb8 7.Qa5+Ke8 8.Qh5+ Kd8 9.Qd5 etc. also win).

Alas, 2.Kc6+ is a second solution: **2...Ke8 3.Qe4+ Re7 4.Qg6+ Kf8 5.Qf6+ Rf7 6.Qh8+** and **7.Qxa8** (M. Campioli, *EBUR* 1999). And, in the main line, **4.Qe4+**, winning bRa8, is obvious!

Thanks to the examination of the mottoes, we understand that Zalkind entered threes compositions ('A', 'B' and 'C'): here is the study that was considered as the best one by the judges:

P.8. L. Zalkind  
2nd hon. mention *Sala Imperio* 1915-1916

a3b1 1600.00 2/3 Win

1.Qb3+ (1.Qb4+ ? Kc2 2.Qc4+ Kd2 draws)  
1...Kc1 2.Qc3+ Kd1 3.Qd3+ Kc1 4.Kb3 Rh2  
5.Qc3+ Kd1 6.Qa1+ and White wins.

Several years passed before any other tourneys were organized by Catalan newspapers: in 1929, *La Nau* and in 1935 *L'Opinio*. Of course, Puig y Puig was involved in both. Today, unfortunately, in Catalonia (and more broadly in Spain), study tourneys seem not to be ongoing stories...

## Lomonosov tables

### Technical info

In EG189 and EG192 we introduced the Lomonosov tables – the first publicly accessible 7-piece EGTBs. The ChessOK company now provides 525 endings with 4+3 pieces plus 350 endings with 5+2 pieces, occupying 140 Terabytes of disc space. The endings with 6+1 pieces are omitted; those were generated, but their importance is negligible and they would need more expensive Terabytes.

To access the Lomonosov tables you need the Aquarium 2014 software with a legitimate licence number. There are packages with the world-best engine *Houdini 4* (57 € for the standard and 86 € for the professional version), but also the cheap standard Aquarium 2014, priced at 28 € is sufficient. Access is granted until the end of 2014. By the way, my Aquarium 2012 access should have finished in 2013 but in February 2014 it was still working.

In addition, from February 12th 2014 onwards, legitimate users of Aquarium and ChessAssistant (another ChessOK product) have an alternative web-browser-based access. The interface has been slightly improved but you still cannot test duals automatically.

The leading company ChessBase unfortunately does not seem to work with the 7-piece EGTB at all.

### En passant bug removed

In December 2013 I discovered a fatal en passant bug in the Lomonosov tables.

In V1 Lomonosov says: Black mates in 55: 1... b5 2. Ke5 Bb7 3. Bd6 Kg6 4. Bb4 Kf7 5. Kd4 Bg2 6. Bd2 Ke7 7. Bb4+ Kd7 8. Kd3 Kc6 9. Kc2 Be4+ 10. Kb3 Sc5+ 11. Kc3 Sd3. But after 2.axb6 it is an easy draw. It was quite a shock for me; should all the Terabytes be re-generated again?

## EGTB news

BY EMIL VLASÁK

V1) Emil Vlasák

a side-line from an unpublished study

d6h6 0043.11 3/4, BTM wins

Victor Zakharov from the Lomonosov team reacted almost immediately: fortunately, the problem was not in the files but only in the interface and it even proved possible to correct the bug on the server side without any need for users to update Aquarium.

It was also officially confirmed that Lomonosov bases (like Nalimov ones) don't support castling. If you enter a position with castling rights you get the response "NO INFO".

### Examples from praxis

As is usual in EGTB articles, this part is not too cheery for composers and analysts.

(V2) 1.Bf2! Kd6 2.Sxe5 Kxe5 3.Bg3+ Sf4+ 4.Kf3 Rb4 5.Kg4 positional draw No.1, 1...Sf4+ 2.Kf3 Sg6 3.Sxe5 Sxe5+ 4.Ke4 Kd6 5.Bg3 Rb5 6.Kf5 positional draw No.2 or 4...Sf7 5.Bg3+ Sd6+ 6.Kd5 Rb6 7.Ke6 positional draw No. 3.

Surely it must have taken a lot of time to synthesize three echo Villeneuve-Esclapon positions in such a nice economic way? However, at first sight Black is too strong here and therefore the study is a clear candidate for Lomonosov checking. Yuri and David, I am very sorry, but Black wins after 1...Sf4+ 2.Kf3 and now 2...Rb3+ 3.Ke4 Sd3, for example 4.Be3 Rb4+ 5.Kf5 Kd6 6.Bh6 The point is 6.Sxe5? Rb5! 6...

**Rb1 7.Se3 7.Bg7 Rf1+ 8.Ke4 Rf4+. 7...Re1 8.Bf8+ Kc6 9.Bh6 Rh1 10.Bg5 Rh3 11.Sc4 Rh5 12.Se3 12.Kg4 Rh2 13.Kf5 Kd5 14.Se3+ Kd4. 12...Kc5 13.Kg4 Rh2 14.Kf3 Kd4 (EG#19459).**

V2) Yuri Bazlov  
1st prize Gurgenzidze 60 JT 2013

g2c7 o314.01 3/4 Draw?

The prominent EGTB user John Nunn used the Lomonosov tables to check the endings in the cult chess book “Theory of Rook Endings” by Levenfish and Smyslov from 1957. John writes in *ICGA Journal*: *The point of checking this book against the tablebases is not to gleefully point out mistakes by noted experts, since errors are inevitable when writing ambitious chess books, but to discover new and interesting ideas. If two high-calibre endgame specialists missed something, then it is likely to be an idea which is both subtle and counter-intuitive, and therefore a valuable addition to endgame understanding.*

The R+2P vs R+P section contains roughly 60 positions and 7 positions (a little over 10%) have the wrong result. I will give four examples from Nunn’s text.

(V3) L&S first checked a similar position shifted one rank higher in which White easily wins by zugzwang. In V3 Black has a more space and the authors could not find the win. But there again is a zugzwang: **1.Ra5 Kh6! 2.Ra6+!!** The only move not seen by L&S. **2...Kh7 3.Rf6 Rg7 4.Rf5** Transferring the move to Black. The triangulating move **4...Ke5** is also possible. **4...Kh6 5.Rf8 Kh7 6.Kf5** zugzwang: **6...Rg6 7.Rh8+ [HH: HHdbIV#10433** has most of this line as the solution, so someone must have found this earlier].

(V4) L&S evaluate V4 as a draw after **1...e3 2.g4!! fxg4+ 3.Kg3 Re2 4.Re8 Re1 5.Re5+ Kf6 6.Re8 Kf5 7.Re7** positional draw. But after the paradoxical **2...Kf4! 3.Rxf5+ Ke4 4.Rf1 e2 5.Re1 Kf3 6.Kh4 Kf2 7.Rb1 e1Q 8.Rxe1 Kxe1 9.g5 Rg2** Black wins.

(V5) According to L&S, Black to move loses: **1...Ke5 2.Kb2 Rg3 3.Rb4 Kd5 4.a5**. But **3...f5! 4.Rb5+ Kd4 5.gxf5 Rf3** surprisingly is a positional draw, for example **6.a5 Kc4 7.Re5 Rf2+! 7...Kd4 8.a6! Kxe5 9.a7. 8.Ka3 Rf3+ 9.Ka4 Rf1**.

John Nunn missed here an interesting mystery: in addition to the computer move **3...f5!** there are even two “human” defending plans which are sufficient to draw: **3... Rg2+! 3.Kc1 Kd5** winning an important tempo and **3... Rg2+! 3.Kc1 Rg1+** with perpetual motifs, for example **4.Kd2 Rg2+ 5.Ke3 Rg3+ 6.Kf2 Ra3**. Yes, John was excited with this nice defence but why did the two endgame specialists not examine such obvious ideas?

V3) Levenfish and Smyslov  
1957

f4h7 o400.21 4/3 Draw?

V4) Lyskov - Seleznev  
Moscow 1957

h3g5 o400.12 BTM Draw?

V5) Levenfish and Smyslov  
1957

c2d5 o400.21 BTM  
White wins?

V6) Levenfish and Smyslov

1957

e6c8 o4o2.21 BTM, Draw?

V6 is a more complicated case. L&S announced a draw after **1...Rh6+ 2.Rf6 Rh8 3.Rf7 Rh6+ 4.Kd5 Rh1 5.Ra7 Rd1+ 6.Kc5 Rc1+ 7.Kb6 Rb1 8.Rc7+ Kd8 9.Rc4 Ra1 10.Kc6 Rb1 11.Rh4 Rc1+ 12.Kb6 Ra1**. But there is **5.Kc6!! Rc1+ 6.Kb6 Rb1 7.d7+!!** A nice move! **7...Kd8 8.Rf4 Ra1 8...Kxd7 9.Kxa6 Kc6 10.b5+ Kc7 11.Rf7+ Kb8 12.Kb6 Kc8 13.Rf8+ Kd7 14.Rb8. 9.Kc6 Rc1+ 10.Kb7 Ra1 11.Rf6!!** Here do you see the point of 7.d7. **11...Rb1 11...Kxd7 12.Rxa6 Rb1 13.Rb6 Rb2 14.b5 Rb1 15.Ka7. 12.Rb6 Kxd7 13.Kxa6 Kc8 13...Kc7 14.Rb7+ Kc8 15.b5. 14.Ka7 Ra1+ 15.Ra6 Rb1 16.Rc6+ Kd7 17.Rc4 Kd6 18.Kb6.**

Let me add another interesting finding. To discover these bugs in the L&S book you don't need the Lomonosov tables at all. My good friend *Houdini 4* is able to find all key moves – several ones immediately (**2...Kf4!** in V4) and another (**5.Kc6!** with **7.d7!** in V6) in minutes.

### Syzygy tablebases

#### Why not Nalimov?

We have the classic *Nalimov* tablebases. They have been tested by many people for a long time, are widely supported by engines, and the 6-piece EGTBs are available both on-line and off-line. Do we need a new format?

A standard user can download and use the Nalimov files free of charge but developers are in a slightly more complicated situation. If you intend to distribute a new chess engine or chess GUI with the Nalimov access code, you will need permission from both Eugene Nalimov

and Andrew Kadatch and they are not easy to contact.

#### Gaviota and other

That's why many new engines (include *Houdini 3*) are using *Gaviota* bases instead, which were generated by Miguel A. Ballicora, Spain. In addition, the Ippolit family of engines have their own tablebase format named *Robbobases*, created by Roberto Pescatore.

#### Bitbase concept

In addition, a *bitbase* concept was invented. The bitbases for every position contain only an evaluation and not the metrics (length to the mate, conversion, etc...). Therefore bitbases are relatively very small and fit on an SSD or even in RAM and as a result are unbeatable in access speed.

Bitbases are excellent for analysing non-EGTB positions. The engine calculates lines and has very quick access for a perfect evaluation of EGTB-positions during calculation.

But after an EGTB-position appears on the board, bitbases suddenly are helpless. Obviously they can still suggest moves not spoiling the win, but without metrics it is impossible to find a working winning way. The game usually falls in infinite cycles.

Hence bitbases are only an add-in to classic tablebases needing to download and manage other engine-specific files. Several examples: Shredderbases, Scorpio bitbases, Robbo Triplebases.

#### Metrics and 50-move-rule

Nalimov uses a DTM metric i.e. with every winning position Depth-To-Mate information is stored. As a mate is the ultimate goal in chess, it seems to be the most logical choice. But DTM metric cannot take the 50-move rule into account. There are probably rare winning positions that cannot be won in a correspondence game when using Nalimov.

#### Introduction to Syzygy

Ronald de Man (alias Syzygy) is a Dutch mathematician, computer scientist, chess

programmer (Sjaak engine) and an important person in the Linux world. Ronald took lessons from all “great predecessors” and developed his own tablebase format. Here is a short list of Syzygy advantages:

(1) The generator is released under the **GNU General Public License** Version 2 so the probing code is released without restrictions.

(2) The probing code is *thread-safe*. It speeds up parallel access of deep engines. Nalimov never considered such a problem.

(3) Syzygy uses the **DTZ metrics**. DTZ is for Depth To Zeroing move. Zeroing move (a pawn move or a capture) resets the 50-move-rule counter, so this rule can be taken to account.

(4) The bitbase concept is integrated. For every constellation there are two files – WDL (Win-Draw-Loss) and DTZ (Distance-To-Zero). The WDL file is an enhanced bitbase file – unlike the predecessors it returns 5 different results: win with 50-move rule, win, draw, loss and loss with 50-move rule.

(5) The compression of Syzygy files is fantastic:

Syzygy	WDL	DTZ	Nalimov
5-piece	378 MB	561 MB	7 GB
6-piece	68.3 GB	81.9 GB	1.2 TB

To achieve such a result Ronald didn't use any of the several available general compression algorithms but developed his own specially for this purpose.

He used a lot of tricks to save disc space. There are many cases when the information stored is of the “don't-care” type, for example positions with a winning/drawing capture or illegal positions. Ronald didn't use zeroes here but tuned the values to get the best compression. For similar reason he also tuned the pieces order. And, finally, the DTZ information leads to a better compression, too.

### The DTZ play

If you have an EGTB-position on the board, the DTZ-optimal play – although leading to the goal – is often very unnatural. Therefore,

the author suggests letting the engine search for the winning moves until they decrease the DTZ and only if they don't decrease, the engine has to switch to DTZ-optimal play.

### Syzygy praxis

Joshua Shriver generated the 5+6-piece EGTB using an i7-3770 machine with 32G RAM. The time needed was about 14 days plus 4 days for verification. The download link is now available also for 6 pieces.

The initial tests were done using a specially adapted *Stockfish* engine but that is not necessary anymore; Houdini 4 supports Syzygy bases and as a consequence also the *Fritz 14* GUI does.

However, several start-up problems were encountered, the most serious seemingly the DTZ indication which is not intuitively comparable with Nalimov DTM. One of my future columns will probably be devoted to practical examples and tests using Syzygy.

# Gia Nadareishvili MT 2013

This theme tourney attracted 23 studies by 16 composers. The prescribed theme was: “Positional draw of rook and knight or bishop against queen and rook. No pawns allowed in the final position”. The judge, Iuri Akobia (Georgia), was somewhat disappointed at the low number of submissions, which he explains that “it must have been difficult to find new schemes for such a theme”. Unfortunately, he included no less than 17 studies in the award; c.f. “I must admit that in this award some studies are included with ‘not very nice’ developments of known schemes”.

Remarkably, three composers independently came up with the same original final position based on zugzwang. They were all ranked first prize.

# EG Subscription

Subscription to **EG** is not tied to membership of ARVES.

The annual subscription to **EG** (Jan. 1 – Dec. 31) is **25,00** euro for 4 issues.

Payable to ARVES (Brialmontlei 66, B-2018 Antwerpen, Belgium) :

- IBAN : NL19 INGB 0000 0540 95
- BIC : INGBNL2A
- ING Bank NV, POB 1800, 1000 BV Amsterdam

If you pay via eurogiro from outside the European Union, please add **3,50** euro for bankcharges.

Payment is also possible

via Paypal on <http://www.paypal.com> to [arves@skynet.be](mailto:arves@skynet.be) (please add 1 euro for transaction fees)

And from outside Europe :

postal money orders, USD or euro bank notes (but no cheques)

to the treasurer (please, not ARVES or **EG** !)

**New!** Subscribers in Great Britain can pay via Paul Valois. They can write him a cheque for **£22** (payable to Paul Valois, please) for one year's subscription to **EG**. His address is 14 Newton Park Drive, Leeds LS7 4HH.

It is of course possible with any kind of payment to save bank charges by paying for more years or for more persons at the same time, as some subscribers already do, or in cash at the annual World Congress of Chess Composition (WCCC) run in conjunction with meetings of the World Federation of Chess Composition (WFCC).

For all information, **especially change of address**, please contact the treasurer:

Marcel Van Herck  
Brialmontlei 66, B-2018 Antwerpen, Belgium

“This shows reciprocal zugzwangs resulting in stalemate. The distinction is for the precise trendy discovery rather than for its artistic merits”.

# Probleemblad 2011-2012

Siegfried Hornecker (Germany) judged this informal tourney and was saddened by the low quality of the studies. Klaus Rubin assisted in checking for soundness and anticipation. After this pre-selection, ten studies of unpleasant quality remained.

The award appeared in *Probleemblad* vii-ix2013 with a three month confirmation time.

**No 16934** Yochanan Afek (Israel/the Netherlands). 1.Rb7+, and:

- Ka6 2.Bb5+ Qxb5 3.Sb4+ Ka5 4.Sc6+ Ka4 (Ka6; Ra7 mate) 5.Ra7+ Kb3 6.Sd4+ wins.
- Ka8 2.Rb4 Qf7+ 3.Bd7 Qxa2 4.Bc6+ Ka7 5.Rb7+ Ka6 6.Bb5+ Ka5 7.Ra7+ and 8.Rxa2 wins.

“This 6-piece ending with its two variations is the best of all the studies in this tourney. Both variations lead to winning the bQ for two minor pieces, along with the silent move 2.Rb4 after 1...Ka8. Unfortunately, the play is very forced and without other points”.

HH: this study was composed for the Tata Steel solving event (and solver friendly!).

**No 16935** Andrzej Jasik (Poland). 1.h8Q/i Rxh8 2.Sxh8+ Kh7 3.g6+ Kg8 4.Bh4/ii Sg5 5.Bxg5 hxg5 6.d7 d1Q/iii 7.f7+/iv Kf8 8.d8Q+ Qxd8 stalemate.

i) 1.h8S+? Kh5 2.Sxd8 d1Q 3.fxg7 Qa1+ 4.Ke6 Sxg5+ 5.Kd5 Qxg7 wins.

ii) 4.f7+? Kf8 5.Bh4 Sg5 6.Bxg5 hxg5 7.d7 d1R wins, but not d1Q? 8.d8Q+ Qxd8 stalemate.

iii) d1R 7.Sf7 Rxd7 8.fxg7 draws.

iv) 7.d8Q+? Qxd8 8.f7+ Kxh8 wins.

“The solution is not very interesting and leads to a stalemate. However, there are two tries with minor promotions (1.h8S? 4.f7+? ... 6...d1R!). 4.Bh4 nicely avoids that pitfall”.

**No 16936** Gerhard Josten (Germany). 1.Se6+ Ke5 2.Sc5 d2 3.Kc2 Ra2+ 4.Kd1 Kd4 5.Se6+ Kc3 6.Sd5+ Kc4 7.Sb6+ Kb5 8.Sc8 b3 9.Sd6+ Kb4 10.Se4 Ra1+ 11.Kxd2 b2 12.Sc3 Rc1 13.Sc7 Kb3 14.S7b5 Rf1 15.Sd4+ Kc4 16.Sde2 Kb3 17.Sd4+ draws.

“I do not see much artistic content in this study, although the knight manoeuvres are interesting. The special commendation is awarded for its contribution to endgame theory”.

# Hillel and Yoel Aloni 75 JT 2013

34 studies by 17 composers from 13 countries took part in this thematic tourney. The theme was: “a win-study is required, created by just one change in the initial position. More than two phases are allowed, but a zero-position is forbidden”. Yochanan Afek initiated and organized the tourney, Amatzia Avni was tourney director and HH was consulted for anticipation vetting.

The twin brothers judged the tourney and wrote: “Excluding one outstanding work, the rest of the submitted studies were a bit disappointing. After careful consideration and necessary investigations, we decided that only 6 studies met the criteria which justify inclusion in the award”.

The (final?) award appeared in *Variantim* no.61 xii2013.

“In this study (which resembles a more-mover), each piece has a defined role, while the juicy position is about to explode in artistic tactics. White intends a mate in two (1.cxd7+) which forces Black to defend energetically, starting with a knight sacrifice. As play continues, black promotions emerge, some lines ending by sacrificing the new queens to open up the position. On his ninth move White employs a new factor: 9.Sg6! (‘you too, Bruknightus?’), when the fearless knight contributes towards mate-threats in a field full of queens! It is only at move 11 that the secret of this bold knight is revealed; sacrificing itself, together with the bS sacrifice on the very first move, paving the path to force stalemate – a first in a series. In the second phase, the wS is placed at the heart of black’s promotions system, but this time, due to its proximity to the main action, it starts its role – and ends it – already in the third move, disrupting Black’s defensive options. On the 14th move, a promoted phoenix-like wS reappears, forcing a perpetual check! The composer

could have been contented with these twins, but he made a third phase: Once again, the wS is on the board's margins, yet it assists in a dual avoidance and later on in stalemate prevention. It should be noted that white's grandiose winning move (12.Rd8!!) would have been meaningless, were it not for the presence of the wS! The study reminds us the grand composing style of Gady Costeff...".

"In both phases white must sacrifice his two pieces in a struggle to prevent a black promotion; but that is just an introduction. In phase A, a long and wonderfully precise contest occur between king and two pawns vs. king, bishop and knight, leading to a piquant ending when white is saved by promoting a pawn (which made an Excelsior!) to a knight. In phase B, things are simpler; precision here lies in the thematic try on the first move (1.Ra5+?). The wR manoeuvres to prevent promotion and the

white monarch forces a draw by double-threatening two pieces".

vii) 6.Kc8? Sc4 7.e8Q Sb6 mate.

"Black's material advantage is enough to ensure victory. White will rely on his passed e-pawn and threats on the back rank, but an immediate pawn push fails. In phase A, White overcomes the temptation to capture a knight, and takes the black pawn instead, using the weakness of black's back rank to win a piece or, alternatively, to exchange rooks. In phase

B, the Sb1 turns out to be a vital aid for delivering mate to the wK, in tries on the first and on the fourth move. On the other hand, this very placement on b1 enables White to capture the knight, using the power of pa6. In phase C, both thematic tries in the previous phases (1.Kc7) become the actual solution, while the former solutions turn out to be a try. In this phase, Black is obliged to force a draw by perpetual check”.

**No 16940** P. Arestov

v) 2.Kg1? Qxa7+ 3.Kxf1 Qf2 mate.

vi) 7.Bc5? Bf1 8.e7 Bb5

“Black’s immediate threat of mate in two (1... Qd2+ / Qa2+) dictates energetic introductory play which ends in the exchange of queens, the

loss of wPf6 and an ending ostensibly lost for White.

Only the strained position of the wK makes it possible for his bishop to enforce a classic stalemate. There is an interesting symmetry between the two phases, as the wB “plays” on two parallel ladders, including two self-sacrifices which cannot be accepted because of a resulted theoretical drawing position. Another point of interest is the precise play of the wK. In Van der Heijden’s view, this matrix is better expressed in a study with two main lines, rather than a twin study, and we concur”.

“White’s slight material plus is in itself insufficient to ensure victory, therefore, the activation of the white monarch is essential. White calculates the way forward with utmost care, effectively implementing the pin-effect of the bishop pair. In phase B, play is utterly different, because of a switch between a wB and wS. In our view, such changes harm the thematic connection between the two phases – something that was in the core of the thematic demand of this tourney. In the absence of a pin option by a bishop pair, here White must seek salvation based on manoeuvres by his knight pair to stop the black promotion threats”.

# 16th Ukraine Team Championship 2013

Lubos Kekely (Slovakia) judged this theme tourney. The theme was: “At least one double-pin stalemate (pieces, not pawns). Triple pin stalemates are not allowed”. HH wonders whether four pin stalemates would...

Siegfried Hornecker (Germany) was consulted for anticipation vetting, and the judge also considered remarks made by the competing teams.

## 3rd Maroc Chess 2013

Richard Becker (USA) judged the study section of the 3rd Maroc chess composition tourney. 15 studies participated.

“Some of the excluded studies had interesting points but they do not appear in the award because they exhibited unartistic introductory play. These introductions contained a lot of analysis and many exchanges of material, but none of them were interesting or thematic. I consider such introductions to be a violation of the fundamental principle of economy. In the other genres, composers agonize for weeks to find a way to eliminate a single pawn from their settings. Contrast this with studies where some practitioners add many unnecessary pieces just to make their solutions longer”.

No 16968 Y. Afek & M. Minski  
prize

a4c2 1303.23 5/5 Win

No 16968 Yochanan Afek (Israel/the Netherlands) & Martin Minski (Germany). 1.Sc6/i bxc6 2.Qg8/ii h1Q 3.Qa2+ Kxc3 4.h8Q+ Rd4+/iii 5.Qc4+ Kxc4 6.Qxh1 Kc5+ 7.Ka5 wins.

i) Thematic try: 1.Qg8? h1Q 2.Qa2+ Kxc3 3.h8Q+ Qxh8 and now 4.Qa1+ loses to Kc4 5.Qxh8 b5+ 6.Ka5 Ra3 mate. Try: 1.Qf8? h1Q 2.h8Q Qa1+ 3.Qa3 b5+ 4.Kb4 c5+ and Black wins.

ii) 2.Qf8? h1Q 3.h8Q Qd5 4.Qh2+ Rd2 5.Qh7+ Rd3 6.Qf2+ Kxc3 7.Qe1+ Kc2 8.Qe2+ Kc3 draws.

iii) Qxh8 5.Qa1+ Kc4 6.Qxh8 wins.

“The winning study is of the logical type. The knight sacrifice 1.Sc6! changes the position so that later the skewer 5.Qa1+ can succeed. This is not a “modern thematic try” in the strictest sense, because there are two differences between the critical positions in the main line and in the thematic try; namely, the presence of the wS on d8 and the shift in the position of

the b-pawn. A requirement of a modern thematic try is that it has only a single, small difference compared with the main line. The logic in this study is more akin to what is sometimes seen in more-movers, in which a white unit moves from a remote square and is sacrificed to decoy a black unit. Such a sacrifice can be a weak expression of logic in a more-mover if it feels like an afterthought, added in an effort to create one more layer of “foreplan”. In this study, the sacrifice feels built-in and organic to the theme. A second sacrifice on the fifth move, this time the Queen, helps lift the study to a good level of artistry”.

honourable mention

b1f5 0313.41 6/4 Win

No 16969 Bernard Delobel (France). 1.Ba5/i Rc8 2.g8Q Rxg8 3.c8Q+ Rxc8 4.Bd8 Rb8+ 5.Ka2/ii Ra8+ 6.Kb3 Rb8+ 7.Ka4 (Ka3) Ra8+ 8.Kb4 (Kb5? Se4;) Rb8+ 9.Ka5 Rb5+ 10.Kxb5 Se4 11.Bb6 (Ba5)/iii Kf6 12.e8S+ wins.

i) 1.Bh6? Rg8 2.c8Q+ Rxc8 3.g8Q Rxg8 4.Bf8 Rg1+ 5.Kc2 Re1 and Black wins.

ii) 5.Kc2? Rc8+ 6.Kb3 Rc3+ 7.Kxc3 Se4+ draws.

iii) 11.e8S? Sd2 draws.

“The next study is in the classical style: it is competently constructed and has a pleasant mix of known elements. Good humour is on display here, particularly in the symmetrical try but the study does not reach the level of a prize, due mainly to the dual on move 11. While the wK’s dual on move 7 is only minor, the wB’s dual is more serious, as it happens at the climax of the study”.

“The final study is a commendable example of the analytical type. It is not easy to see all the subtle points and tempo play that will allow White to hold the position. I find the study mildly interesting, but not memorable due to a lack of high points (sacrifices, stalemates, surprise moves, etc.). Also, the exchange of the rook for the pawn at the beginning does not make for an optimal introduction”.

Abdelaziz Onkoud (Morocco) at Batumi 2013  
(Photo: LP)

# 18th Russian Team Championship 2013

The theme of the tourney was: "Mutual active sacrifice of major pieces (Q, R). The pieces should be sacrificed without capture, but check is allowed, and should be captured immediately". Two additional explanations were given: (i) a promotion is not considered to be a sacrifice and (ii) the two sides do not necessarily have to sacrifice the same piece.

**No 16971** Oleg Pervakov (Russia). 1.Qg5/i Qf4 2.a8Q/ii Rxa8/iii 3.Qxf4 g2+ 4.Kg1 Bf2+ 5.Kxf2 g1Q+ 6.Kxg1 a1Q+ 7.Kf2 Ra2+ 8.Se2/iv Qg1+ (Qf1+) 9.Kxg1 (Kxf1) Ra1+ 10.Sc1/v Rxc1+ 11.Re1/vi Rxe1+ 12.Kf2 Re2+ 13.Kf1/vii Rf2+ 14.Kg1/viii Rg2+ 15.Kh1 wins.

5.Qc1+ Qe1 6.Qxc2 zz Qa1/iv 7.Qf5+/v Ke2+  
8.Kh2 draws.

i) Thematic try: 2.Qf4+? Sf2+ 3.Rxf2+ Qxf2  
4.Qc1+ Qe1 5.Qxc2 h4 zz wins, e.g. 6.Qg6 Kf2+  
7.Kh2 Qe5+ 8.Kxh3 Qg3+ 9.Qxg3+ hxg3.

ii) Qf2 3.Qa6+ Ke1 4.Qa5+ draws.

iii) Ke2 5.Qd2+ Kxd2 stalemate.

iv) Qg3 7.Qe2+, or Qe3 7.Qc4+ Kf2 8.Qxh4+  
draws.

v) 7.Qd3+? Kf2+ 8.Kh2 Qg1+ 9.Kxh3 Qg3+  
10.Qxg3+ hxg3, or 7.Qd2? Qa8+ 8.Kh2 Qg2+  
9.Qxg2+ hxg2 wins.

“The Serbian endgame study trio has created a memorable work on mutual zugzwang with stalemate motifs. The authors have provided a complete analysis of the position, which we omit”.

**No 17010 I. Aliev**  
special prize

h7g4 4672.31 8/7 Draw

**No 17010** Ilham Aliev (Azerbaijan). 1.Bh5+  
Kxh5 2.e8Q+ Kg5 3.Sdf7+/i Bxf7 4.Sxf7+ Qxf7+  
5.Qxf7 Rh2+ 6.Kg8 Rh8+ 7.Kxh8 Bc3+ 8.d4  
Bxd4+ 9.e5 Bxe5+ 10.Qf6+ Bxf6+ 11.Kh7 Rh2+  
(Rxa8 stalemate) 12.Kg8 Rh8+ 13.Kf7 Rh7+  
14.Kg8 (Ke8) Rh8+ 15.Kf7 Rxa8 stalemate.

i) Thematic try: 3.Shf7+? Kf4, avoiding the  
main line.

“This is a somewhat amended version of the original study: it has now become more dynamic and close to a practical game. The solution starts with a bishop sacrifice after which wPe7 promotes to queen with a check. This is a bright double stalemate study with numerous sacrifices, improving on a 2000 study, the solution of which began with Black’s 5th move here. The judge found it possible to award a special prize to this new work”.

**No 17011 M. Hlinka & J. Polášek**  
special prize

fic1 0017.02 3/5 Draw

**No 17011** Michal Hlinka (Slovakia) & Jaroslav Polášek (Czech Republic). 1.Be3+/i Kd1  
2.Kg2 Sg3 3.Kxh2 Sf1+ 4.Kh1 Sxe3 5.Sc8 d5 6.Se7  
d4 7.Sc6 d3 8.Se5 d2 9.Sf3 Sxf3 stalemate.

i) 1.Kg2? Sxf2 2.Kxh2 Sfe4 3.Kg2 Kb1 4.Kf1  
Sg3+ 5.Kf2 Sf5 6.Ke2 Kc2

“This is almost a miniature with elegant play ending in a “Czech” model stalemate; it is a correction of a 1988 study by Hlinka (EG#8636)”.

**No 17012 V. Aberman & M. Muradov**  
1st honourable mention

h2h6 0082.01 5/4 Win

**No 17012** Muradkhan Muradov (Azerbaijan) & Victor Aberman (USA). 1.Sf8 Bf6 2.Be3+  
Kg7 3.Sd7 Bd8 4.Sxe5, and:

— Bf6 5.Shf7 (Shg6? Be4;) Bd5 6.Bh6+ Kg8  
7.Bg5 Bg7 8.Sh6+ wins, or:

— Bc7 5.Sg6 (Sf7? Bd5;) Be4 6.Bf4 Bd8 7.Sh8  
Bd5 8.Bg2/i Bb3 9.Shg6 Bc2 10.Sc6 wins.

i) 8.Seg6? Bf6, or 8.Shg6? Be4 9.Sh8 Bd5.

“This shows an interesting piece struggle requiring accurate move choice and with a pronounced switch-back problem theme, including the return of the wS to the corner.

However, White's material advantage is too large even if it requires subtle manoeuvres to maintain it".

**No 17013** R. Becker  
2nd honourable mention

e4e2 0315.02 4/5 Draw

**No 17013** Richard Becker (USA). 1.Sg6/i Sf3 2.Sxf4+ Kf1 3.Bb6/ii Rxh1 4.Kf5 Sh2 5.Kg5 g3 6.Kh4 g2 7.Kg3 g1Q+ 8.Bxg1 Kxg1 9.Se2+/iii Kf1 10.Sd4 zz Kg1/iv 11.Se2+ Kf1 12.Sd4 positional draw.

i) 1.Kxf4? Sf1 2.Sg3+ Sxg3 3.Kxg3 Rxh8 4.Kxg4 Rg8+ 5.Kh3 Rxg1 wins.

ii) 3.Be3? Rxh1 4.Kf5 Sh2 5.Kg5 Ke1 6.Kh4 Sf1+, or 3.Bc5? Rxh1 4.Kf5 g3 5.Kg4 Sd2 6.Kxg3 Se4+ 7.Kf3 Sxc5, or 3.Sf2? Re7+ 4.Kf5 g3 5.Kf6 Re8 6.Kf7 Re3 7.Sg4 Re4 win.

iii) 9.Sh3+? Kf1 10.Sf4 Ke1 11.Kg2 Rf1 wins.

iv) Rg1+ 11.Kxh2 Kf2 12.Sf5 draws.

"The introduction is very interesting but the final positional draw with mutual zugzwang motifs is, unfortunately, not quite original".

**No 17014** V. Kovalenko  
3rd honourable mention

h5h8 3403.50 7/4 Win

**No 17014** Vitaly Kovalenko (Russia). 1.g7+ Kg8 2.g6/i Rh4+ 3.Kg5/ii Rxh6/iii 4.f7+ Kxg7

5.f6+ Kh8/iv 6.g7+/v Kh7 7.g8Q+ Sxg8/vi 8.f8S++ Kh8 9.Rh7+ Rxh7 10.Sg6 mate.

i) 2.Rxe7? Rh4+ 3.Kxh4 Qh1+ 4.Kg3 Qg1+ draws.

ii) 3.Kxh4? Sxg6+ 4.fxg6 Qa4+ draws.

iii) Rg4+ 4.Kxg4 Qa4+ 5.Kg5 wins.

iv) Kf8 6.fxe7+ Kg7 7.e8S+ Kf8 8.g7 mate.

v) 6.Kxh6? Sxg6 7.Kxg6 Qf8 8.Re7 Qxe7 9.fxe7 stalemate.

vi) Qxg8+ 8.fxg8Q+ Kxg8 9.Kxh6 wins.

"Although legal, the position of the five white pawns is highly unlikely, especially in view of Black's large material advantage. Despite the pawns' modest capacities, White uses them for a win. The composer has corrected a 2001 study (HHdbIV#68483)".

**No 17015** M. Garcia  
4th honourable mention

c8f8 0170.12 4/5 Win

**No 17015** Mario Garcia (Argentina). 1.a7/i g3+/ii 2.Kc7 Bxa7 3.Rxa7 d3 4.Kd6 d2 5.Rf7+/iii Ke8 6.Re7+ Kf8 7.Bb3 g2 8.Rf7+ Kg8 9.Ra7+/iv Kh8 10.Ra1 Bg4 11.Rg1 wins.

i) Thematic try: 1.Kc7? d3 2.a7 Bxa7 3.Rxa7 d2 4.Ra8+ Ke7 5.Rd8 g3 6.Rxd2 g2 7.Rd1 Kf6 8.Kd6 Kg5 9.Ke5 Kg4 10.Ke4 Kg3 draws.

ii) Bxa7 2.Rxa7 g3+ 3.Kd8 g2 4.Rf7+ Kg8 5.Ke7 Kh8 6.Rf8+ Kh7 7.Rg8 wins.

iii) 5.Bb3? d1Q+ 6.Bxd1 g2 7.Bb3 Be6 8.Ra8+ Kg7 9.Bxe6 g1Q 10.Rg8+ Kf6 11.Rxg1 stalemate.

iv) 9.Rf1+? Kg7 10.Rg1 Kf6 11.Bd1 Kf5 12.Kd5 Kf4 13.Kd4 Kg3 draws.

"It looks as though White will easily achieve victory by winning one of the bishops but it is in fact necessary to act accurately and prudently up to the decisive moment in order not to be left with nothing".

**No 17016** L. Katsnelson  
special honourable mention

h6d8 o430.21 4/4 Win

**No 17016** Leonard Katsnelson (Russia).  
1.Kg7 Rf7+ 2.Kxg6 Rf8 3.Kg7 Rf7+ 4.Kxg8 Rxf6  
5.h5 Ke7/i 6.Rh7+ Ke6 7.h6/ii Rg6+ 8.Kf8 Rf6+  
9.Ke8 Kf5 10.Rf7 Kg6 11.h7 Ra6 12.Rf6+ Rxf6  
13.h8Q wins.

i) Ke8 6.Kg7+ Ke7 7.Ra8 Rf7+ 8.Kg8 Rf6  
9.Ra7+ Ke8 10.Kg7 Rf1 11.Ra6 Rf7+ 12.Kg6 wins.

ii) 7.Ra7? Kf5 8.Ra5+ Kg4 9.Kg6 Rb6. 7.Rg7?  
Kf5 8.Kh7 Rf8 9.h6 Kf6 10.Rg1 Ra8 11.Rf1+ Kg5  
draw.

“This has a curious introduction leading to an interesting ending with a far-off White passed pawn; it is a re-working of a 1973 study (EG#2676) with a laconic 6-move solution”.

**No 17017** B. Ilincić M. Miljanić & I. Aliev  
special honourable mention

h8c4 o147.21 6/5 Draw

**No 17017** Borislav Ilincić, Mirko Miljanić (Serbia) & Ilham Aliev (Azerbaijan). 1.Rf7 Sf6/i  
2.Rxf6 Bb2 3.d4/ii Bxd4 4.Kg8/iii Bxf6 5.gxf6  
Sh5/iv 6.f7 Sf6+ 7.Kh8 Sd7 8.Sc5 Kxc5 9.Bg1 fx-  
g1Q 10.f8Q+ Sxf8

i) Bb2+ 2.d4 Bxd4+/v 3.Kg8 Sf6+/vi 4.gxf6  
f1Q 5.Bxg3 Qg2 6.Sd6+ Kd3 7.Sf5

Sxf6+ 7.Bxf6 f1Q 8.Bc3 Qf2

iii) 4.Sd6+? Kd3 5.Kg8 Bxf6 6.gxf6 Sh5 7.Be5  
Sxf6+ 8.Bxf6 f1Q

iv) Sf5 6.Sd6+ Sxd6 7.Bxd6 f1Q 8.f7

v) Sf6 3.Rxf6 Bxd4 4.Kg8 Bxf6 5.gxf6 Sh5 6.f7  
Sf6+ 7.Kh8

vi) Bf6 4.Bxg3 f1Q 5.Sd6+ Sxd6 6.Bxd6 Qg2  
7.Rxf6

“This is a good reworking of a previous study (EG#19321) which started with the brutal key 1.Rxf6”.

**No 17018** M Zinar  
special honourable mention

h2h5 o544.83 13/7 Win

**No 17018** Mikhail Zinar (Ukraine). 1.fxg8Q  
Rxc8 2.f7 Rh8 3.f8Q Rxf8 4.e7 Rh8 5.e8Q+ Rxe8  
6.d7 Rh8 7.d8Q Rxd8 8.c7 Rh8 9.c8Q Rxc8 10.b7  
Rh8 11.b8Q Rxb8 12.a7 Rh8 13.a8Q Rxa8 14.Sc4  
(Sc6) wins.

“This shows sequential promotion of 7 pawns to queen in the form of a systematic movement. The study is present on G. Popov’s website dealing with records”.

**No 17019** A. Skripnik & M. Hlinka  
1st commendation

a7f4 3130.41 6/4 Win

**No 17019** Anatoly Skripnik (Russia) & Michal Hlinka (Slovakia). 1.d8Q c2 2.Qd6+/i Kg5 3.Rg6+ Kxh5 4.Rh6+ Kxh6 5.f7+ Kh7 6.f8Q Bxb6+ 7.Qxb6 Qd7+ 8.Ka8/ii c1Q 9.Kb8 zz Qcc6 10.Qb1+ Qg6 11.Qh1+ wins.

i) 2.Qc7+? Be5 3.Qc5 Qd7+ 4.Ka6 Qd3+ 5.Ka7 Qd7+ 6.Ka8 Qa4+ draws.

ii) 8.Kb8? c1Q zz, draws.

“Despite the complete material equality in the final with two pairs of queens each, White wins by passing the move to Black”.

**No 17020** P. Krug & M. Minski  
2nd commendation

f1c8 4413.03 4/7 BTM, Draw

**No 17020** Peter Krug (Austria) & Martin Minski (Germany). 1...f3 2.Bh3+/i Sxh3 3.Qg4+/ii Kb8 4.Qg3+/iii Ka8/iv 5.Qg8, and:

— Qxg8 6.Re8+ Qxe8 stalemate, or:

— Qb8 6.Qh8 Ra2 7.Re8 Rf2+ 8.Ke1 Re2+ 9.Kf1 Rxe8 10.Qa1+ Qa7 11.Qxa7+ Kxa7 stalemate.

i) 2.Qg4+? Kb8 3.Qg3+ Ka8 4.Kxg1 fxc2, or 2.Bxf3? Sxf3 3.Qg4+ Kb8 4.Qxf3 Ra2, or 2.Kxg1? fxc2 3.Qf7 Qd4+ 4.Kxg2 Qd5+ 5.Qxd5 cxd5, or 2.Bh1? Ra2 win.

ii) 3.Re8? Ra1+/v 4.Qxa1 Qxe8 5.Qa8+ Kd7 6.Qxb7+ Ke6 7.Qb3+ Kf5 8.Qd5+ Qe5/vi 9.Qd3+ Qe4 10.Qd7+ Qe6 wins.

iii) 4.Qg8? Qxg8 5.Re8+ Kc7, avoiding 5... Qxe8 stalemate.

iv) Sf4 5.Qxf4+ Ka8 6.Qd4 Qg8 7.Qg4 Qh8 8.Qh4 positional draw.

v) Qxe8? 4.Qc7+ Kxc7 stalemate.

vi) cxd5? stalemate.

“This is a multiple stalemate study but the stalemates themselves are not very interesting”.

**No 17021** P. Arestov  
3rd commendation

d4c2 0131.23 5/5 Win

**No 17021** Pavel Arestov (Russia). 1.Rh1 fxg3 2.Rxh3 h4 3.Rxh4 g2 4.Rg4 Be3+ 5.Kc4/i g1Q 6.Rxg1 Bxg1 7.Sc5 Be3 8.a4 Bd2 9.Sd3 Ba5 10.Kb5 Bc3 11.Sb4+ Kb3 12.a5 Bxb4 13.a6 wins.

i) 5.Kxe3? g1Q+ 6.Rxg1 stalemate, or 5.Ke4? g1Q 6.Rxg1 Bxg1 stalemate.

“White shattering Black’s hope for a stalemate, winning the minor piece ending in which the knight proves to be an advantage over the long range bishop, supporting the wP from its initial square through to promotion”.

**No 17022** I. Aliev  
special commendation

h1h5 0000.21 3/2 Win

**No 17022** Ilham Aliev (Azerbaijan). 1.f6 Kh6 2.Kg2 Kh7 3.Kf3 Kg8 4.Ke4 Kf8 5.Kd5 (Ke5? Kf7; zz) Kf7 6.Ke5 zz Kf8 7.Ke6 Ke8 8.f7+ Kf8 9.Kf6 g5 10.Kxg5 (fxg5? stalemate) Kxf7 11.Kf5 wins.

“This is a pleasant miniature pawn study with a not too difficult, but amusing, solution”.

## ARVES 25 ANNIVERSARY TOURNEY

The Dutch-Flemish Association for Endgame Study  
(Alexander Rueb Vereniging voor schaakEindspelStudies) ARVES  
organizes an international composition tourney for endgame studies  
to celebrate its 25th Anniversary. No set theme.

Judge: Yochanan Afek

Three money prizes will be awarded:

1<sup>st</sup> prize: 300 euro

2<sup>nd</sup> prize: 200 euro

3<sup>rd</sup> prize: 100 euro

as well as honourable mentions and commendations

Entries

(not more than 3 per composer and only by e-mail)  
should be sent to the tourney director

Luc Palmans

[palmans.luc@skynet.be](mailto:palmans.luc@skynet.be)

before 30 June 2014

The award will be published in *EG* 199 (January 2015)
