

JULY 1990

EDITORIAL

If **EG** is to go forward into 1991 and beyond, good features must be preserved and shortcomings made good. Each of the dozen chapters of *TEST TUBE CHESS* was addressed to a different kind of enthusiast, but this pattern is far too elaborate and ambitious. Four, rather than twelve, running sections of **EG** are enough. The first section would be for the expert: composers and scholars around the globe are there with potential high-class studies and papers awaiting the right outlet. The second section - for the beginner: this is crucial for the long - term survival of the magazine with an appeal broader than to an elitist clique. It will be the most difficult section to write. There is no magic formula for the content, to produce which will test the combined talents of at least an *ASSIAC* and a Dr Benjamin Spock. A disciplined correspondence column will be an essential part of this second section. The third section is for the analyst, cook-hunter and endgame theorist: there is no shortage, there never has been, and there never will be, dearth of controversy about the soundness of studies (in contrast to problems, which can be computer-

tested), while we must expect computer-based research to continue to present important data that will confirm, contradict or clarify current verdicts of endgame theory. The fourth and final section will be the continuation of **EG**'s principal achievement, namely the chronicle of tourney awards world-wide.

This section is most conveniently created and distributed on diskette for home computer usage, complete with software for display, maintenance, and efficient retrieval. Of course, the other sections could also be on diskette, but the point is to reduce the physical bulk of, and the tedium of handling, relatively poor quality material that will not stand the test of time.

Tourney announcements, news about personalities, humour, and book reviews could be spread without duplication among the four sections with little consequential suffering. Readers with this area of interest - that of the 'Friend' of chapter 3 of *TEST TUBE CHESS* - will scan all sections. A modicum of overlap will be no bad thing since neighbours ought to look in on one another now and then!

The contributor of the following article is a senior Israeli master, by profession a psychologist, composer of studies characterised by collision counter-play, and author of the book "Creative Chess" recently published (in Hebrew).

Check and Counter-Check

Amatzia Avni

An artistic study needs the element of surprise. A sudden tactical point can open the solver's eyes in disbelief. The counter-checking motif can supply just this dose. One side threatens check. His opponent, instead of taking defensive measures, reacts with an attacking move. We are accustomed to one side being the attacker at a given juncture, so the idea of both sides attacking simultaneously is uncommon and hence surprising.

To concentrate the spotlight on the theme of check and counter-check we have peeled the outer skin off our dozen examples, leaving BTM in many cases. *A1* shows the simplest case. *A2* demonstrates stalemate, a state that has to be avoided in *A3*. *A4*, *A5* and *A6* illustrate counter-checking sacrifices by pieces that were about to be lost anyway, to bring about a favourable position. *A7* shows a mechanism interwoven into perpetual motion, but it lacks real interest because the emphasis is more on the technique than the content. This contrasts with *A8*, where the motif is not a goal in itself but a logical part of the play. We should not be surprised to find enhanced and duplicated examples: *A9* incorporates a series of three consecutive checks, while a repetition of a series takes the stage in the course of the solution to *A10*. Our final pair is characterised by great boldness, the coming counter-check in *A11* being not simply foreseen but forced, while in *A12* the riposte is mate. To sum up, the counter-check is a useful motif for its element of surprise. It contributes to the study's difficulty,

but in a sudden way that is at the opposite extreme from the difficulty of complexity, and for this reason it contributes to the solver's instantaneous pleasure. In its most artistic form the counter-check is not a goal *for its own sake* but integrates harmoniously in the play.

A1: If $Bc3 + 2.K-Bxf6 3.Ra6 +$, so $Kb7 2.Ra2!! Bc3 + 3.Rb2 + !$ wins.

A2: $Qf4 + 2.Bf6 + Qxf6 + 3.Sf7 +$ drawn.

A3: $Qxf4 + 2.Qxf6 + /i Qxf6 + 3.Kg8/ii$, with $Qd6 4.Rf7 +$ or $Qd4 4.Re6 +$.

i) $2.Ke8 Qa4 + 2.Kg8? Qf7 +$.

ii) It is zugzwang.

A4: 1. $Qh6 + /i Rh2 + 2.Qe3 Rh3 (Bxe3 + ; Sxe3 mate!)$ 3. $Sg3 + Rwg3 4.Rwg1 + Rwg1 5.Qh3$ mate.

i) $1.Kg3 + ? Sxg3 2.Qxf2 Sf1!!$

A5: $Bc4 + 2.Qd5 + !! Bxd5 + 3.Kf8/i Kd6 4.b7 Se6 + 5.Ke8 Sc7 + 6.Kd8 Sa6 7.Sc7 Sb8 8.Kc8 Sd7 9.Se8 + Ke7 10.Sf6$ wins.

i) Access to b7 is henceforth denied.

A6: 1. $d8Q Ba5 + 2.Kb3 Re3 + (Bxd8? Bb5)$ 3. $Qd3 + Rxd5 + 4.Ka4$ drawn.

A7: 1. $Rf5 + Kg4 + 2.Re5 + Kh5 3.Bf7 + Kg4 4.Be6 + Kf4 5.Rf5 + Kg4 6.Ke5 +$ drawn.

A8: 1. $d8Q + Sd5 + /i 2.Re5!!$

i) $Bxd8 2.Rxd8 + Ke4 3.Re8 +$.

A9: 1. $Qf2 + Sg2 + 2.Qg1 + Sxg1 3.Sf2$ drawn.

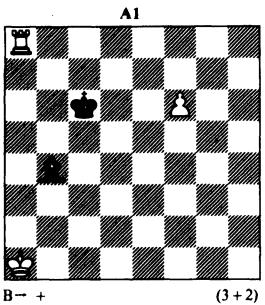

A10: $Rf8 + 2.Qxf8 + Kg6 + 3.Kg8 Rh8 + 4.Kxh8 Qh1 + 5.Qh6!! (Kg8? Q8 + ;) Qxh6 + 6.Kg8$ and B1 is helpless.

A11: 1. $Qe3 + Kxe3 + 2.Rg3 + K-$, stalemate, both W's attacking pieces being pinned.

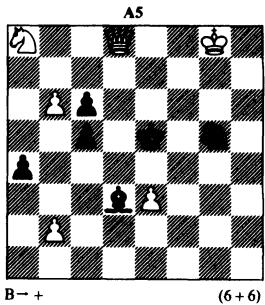

A12: $ab + 2.Kb3 b1Q + /i 3.Bb2$ mate.

i) $bcQ 3.Rxc1$ mate. $Rxa8 3.Bxb2$ mate.

Miniatures, by Jan van Reek, 1989, the second in the ARVES series of 64-page publications. A personal selection of smallwares from all sources is primarily just that, to be enjoyed. But the talented author here and there also comments thought-provokingly on the techniques, themes and expressions of style that are feasible when one more chessman is progressively added to the brew, for the little anthology progresses excitingly, chapter by chapter, from the simple 3-man study to the complex full-blown modern minature.

Encyclopaedia of Chess Endings, Vol. IV, Belgrade, 448 pages, 1989. Queen endings, Included among the 1800 examples are some 200 of the GBR class 4000.10 analysed by mortals, with here and there their shortcomings drily noted by Ken Thompson's *C* BELLE. One 1060 example is by BELLE, and a Pospisil of the same class is likewise 'annotated'. No other 5-man class has been computer-commented, though data bases for 1006, 1033, 4010 and 4010 have, as we know, been generated even before the reporting of Stiller's results in EG98.

Three contemporary composers from eastern Czechoslovakia, from top to bottom: Michal HLINKA (Košice, b. 25.x.53), L'uboš KEKELY (Žilina, b. 25.iv.59) and Ladislav SALAI (Žilina, b. 18.i.61).

Three contemporary composers from the U.S.S.R. Far East, from top to bottom: Vitaly Semyonovich KOVALENKO (Bolshoi Kamen, Primorsky krai), Vladimir KOZHAKIN (Magadan) and Vadim LOVSTOV (Magadan region).

HOW TO PLAY THE GBR CLASS 0023 ENDGAME

Part 5 (final): Phase 2

{For the phases, see EG74. Parts 1-4: EG83, EG84 and EG93.]

In this article we follow a computer session with the data base. The reader will encounter computer output, which generally follows a repetitive pattern, and commentary inserted by the author during either a live session or subsequent editing. The data base was online at Queen Mary and Westfield College, London and was accessed via a SUN 3/50 terminal using UNIX and a user interface developed jointly by AJR and Dr Alen Shapiro at The Turing Institute, Glasgow in 1985.

Script started on Fri Jan 19 12:07:18 1990
 Enter a WTM KBBKN position
 WK WB WB BK BN
 d8a6e7a5b8

Our starting point (R1) is one of the 32 positions that are at maximum depth (ie, 66, with no optimal antecedents within the data base). WK is about to be forced into the a8 corner. wBB will then play a short series of moves to release WK, whereupon the play enters a deep phase 2 - deeper than EG's pages have seen hitherto. Phase 1.

1. d8a6e7 a5b8 WTM (66) Bb7 ->
 The only move to save the light B and prevent Sc6+. The computer has chosen the single best move Bb7 and waits for the human to accept or overrule. Here we have the normal case - acceptance. Overruling occurs with W's move 3. Note that the computer uses N for knight, while EG prefers S.

1.Bb7 d8b7e7 a5b8 BTM (65) Kb6 BK:a5 -> b6
 1...Kb6 d8b7e7 b6b8 WTM (65) Kc8 ->

Precisely the same logic - but a move by WK this time.

2.Kc8 c8b7e7 b6b8 BTM (64) Nc6 BN:b8 -> c6
 2...Nc6 c8b7e7 b6c6 WTM (64) Bd6 -> e7h4

The dark wB will be needed in the h2-g1 'double corner'. One asks why d6 should be a better square than h4 - see later. In this sequence we shall mostly comment on the W (human) choices, to facilitate discussion. The machine's 'reasons' are as yet inaccessible - or incomprehensible: what are we to make of the fact that only the unintelligent machine can pass judgement here on 'intelligent' human choice?! ... The reader's eye can distinguish (on these pages) between the computer's and the human choice by looking for the four-character algebraic notation departure/arrival squares inserted after the -> input-prompting 'arrow'. This input is optionally inserted by the human operator when the machine pauses, and overrules the computer's choice. The up/down/no-change behaviour of the number within parentheses, which is always the computer's statement of the true, ie 'optimal', depth before the next move, provides another useful clue. In this session with the data base human choice was restricted to moves by W, though an optimal move was almost invariably chosen.

3.Bh4 c8b7h4 b6c6 BTM (64) Na7+ BN:c6 -> a7+
 The depth number stayed at 64 after W's last move, telling us that our choice was minimally sub-optimal. An optimal move would have resulted in depth 63 instead of 64.

3...Na7+ c8b7h4 b6a7 WTM+ (64) Kb8 ->
 4.Kb8 b8b7h4 b6a7 BTM (63) Nc6+ BN:a7 -> c6+
 4...Nc6+ b8b7h4 b6c6 WTM+ (63) Ka8 ->
 5.Ka8 [R2] a8b7h4 b6c6 BTM (62) Kc5/Kc7 BK:b6 -> c5
 5...Kc5 a8b7h4 c5c6 WTM (62) Ba6/Bc8 -> k

Yes, we can now see that the immediate wBd6 (on move 3) would have 'squeezed' Bl one move sooner, covering the c7 and c5 squares. At least, that seems a reasonable conjecture. By occupying c8 now wBB will be able to blast on adjacent diagonals, which is one of our techniques for driving bK out of the centre. As a friendly feature, when the computer lists (as

it always does where there are any) more than one optimal move for W the human can enter a serial number. By entering 1 in this case the choice would be Ba6, and by entering 2 (as here, see in a jiffy) the choice is Bc8. This feature effectively eliminates a source of fingerslip error. Two other incidental points here are that the letter k, used as above, is entered by the user during a live session (ie, not an editing session) to tell the computer that comment text follows, and # in that text marks the end of the comment. #2

6.Bc8 a8c8h4 c5c6 BTM (61) Nd4/Kd6 BK:c5 -> d6
6...Kd6 a8c8h4 d6c6 WTM (61) Bh3/Kb7 -> k

Since wK must advance let's adopt the human-friendly plan of moving wK whenever it looks good, independent of moves by wBB. B1 seems to be under no constraint but is in fact in a dilemma: maintaining the wK's prison involves voluntary abandonment of the centre, while if bK centralises then wK emerges. It is now Phase 2. #2

7.Kb7 [R3] b7c8h4 d6c6 BTM (60) Ne7 BN:c6 -> e7
7...Ne7 b7c8h4 d6e7 WTM (60) Bg4/Bh3 -> k

And here we move an attacked wB either as far as possible (other things being equal) or adjacent to bS. The latter rationale not being sensible here, we follow the former. #2

8.Bh3 b7h3h4 d6e7 BTM (59) Nd5 BN:e7 -> d5
8...Nd5 b7h3h4 d6d5 WTM (59) Bg2/Bf2 -> k

B1 has prevented wK from making further advances, so let's play the 'jiggle' technique of covering bK's stay-put oscillation ploy and giving him the move. This won't always work, but it's effective here. The bishops are ideally suited for carrying out this manoeuvre. #2

9.Bf2 [R4] b7h3f2 d6d5 BTM (58)
 Nb4/Nc3/Ne7/Nf4/Nf6/Ke5 BN:d5 -> f6
9...Nf6 b7h3f2 d6f6 WTM (58) Bg2 -> k

We could try advancing wK again, but we observe that e4 is worth covering to stop bS checking later, and from g2 wB will exert control over bK's freedom in the centre. This makes us prefer the bishop move. #

10.Bg2 b7g2f2 d6f6 BTM (57) Nd5/Ng4/Ke5 BN:f6 -> g4
10...Ng4 [R5] b7g2f2 d6g4 WTM (57) Ba7/Bg1/Bg3+ -> k

wB is attacked, but it has a good retreat. A 'far-apart' principle works because it rules out bS harassing wBB on successive moves, one B being within the protective zone of wK. #1

11.Ba7 b7g2a7 d6g4 BTM (56) Nf6/Ke5 BN:g4 -> f6
11...Nf6 b7g2a7 d6f6 WTM (56) Ka6/Kb6 -> k

Now wK's moment has come - marching orders: wBB are far apart, they either control the centre or are ready (Bb8+) to do so, and do not obstruct the central squares. So wK has freedom of choice and can head for d4, for example. #2

12.Kb6 [R6] b6g2a7 d6f6 BTM (55) Ke5 BK:d6 -> e5
12...Ke5 b6g2a7 e5f6 WTM (55) Kb5/Kc5 -> k

We observe bS on f6 eyeing e8 and h5, with a g7 K&H in sight. But wBB are not yet placed to drive bK into that corner, so it is time to regroup. By the same token we must be prepared for bS to make a nuisance of himself. bK, though, has nowhere good to aim for. It seems that in phase 2 bS often occupies a square on one of the two longest diagonals. This hints at a defensive strength of symmetry, for if it's good (for B1) to play to one side of the diagonal it's likely to be good to play to the other. This means that W has somehow to be prepared for both possibilities. #2

13.Kc5 c5g2a7 e5f6 BTM (54) Ne4+ BN:f6 -> e4+
13...Ne4+ c5g2a7 e5e4 WTM+ (54) Kc4 -> k
wBB covering c5,f2 and c6,f3 is good news for wK, who might otherwise face an embarrassing checking sequence from bS. #
14.Kc4 c4g2a7 e5e4 BTM (53) Nd6+ BN:e4 -> d6+
14...Nd6+ c4g2a7 e5d6 WTM+ (53) Kd3 ->
15.Kd3 d3g2a7 e5d6 BTM (52)

Nb5/Ne8/Nf5/Nf7/Ke6/Kf4/Kf5/Kf6 BN:d6 -> f7
wK has evaded the checks by a brief outflanking march. The relationship of wK and bS at this moment is useful to remember. It is also worth noting that wK takes over from the light B the duty of covering e4, so that a

'hole' will not be left for bK to occupy. Such holes for bK towards the centre are especially important to cover.

15...Nf7 d3g2a7 e5f7 WTM (52) Bb8+ -> k
 Bl's wide choice of equi-optimals (on move 15) is tentatively explained by W having to reorganise to make progress, and Bl having no moves to improve his position. The check on b8 is in line with a hemming-in policy, indeed formula, with another check on h3 as a possibility (but bSg5 will stop this if W allows the time, which he may have to in order to cover the d5 square with his K). *

16.Bb8+ d3g2b8 e5f7 BTM+ (51) Nd6 BN:f7 -> d6
 16...Nd6 [R7] d3g2b8 e5d6 WTM (51) Bc6 -> k
 The voluntary interposition was a surprise, but it is useful for Bl in preventing wK from an immediate advance. On d6, too, bS is closer (in time, or 'S-space') to the K&H sanctuaries on b7 and g7 that it was on f7. Note that Bl has only two men, which works to his DISadvantage when he is forced by the Laws of Chess to move one of them. It's a positive ADVantage, however, if he is heading for a specific set-up, since he has only two men to manoeuvre while W has three, and the Laws do not permit consecutive moves by the same side! Here we need a tempo move for W, and the rule-of-thumb (proposed earlier) to play a B adjacent to bS can be applied. It may also be useful to W to cover both e8 and e4. *

17.Bc6 d3c6b8 e5d6 BTM (50) Ke6 BK:e5 -> e6
 17...Ke6 d3c6b8 e6d6 WTM (50) Ba4 -> k

W takes advantage of the fact that bK has just been forced to make an off-centre move (and is still tied to the defence of bS), to make an improving move creating a latent 'box' on de56 (Bb3+). The geometry of the board combined with the geometry of the bishop's move make it necessary for a B to spend two moves to travel from one side of the board to the other - so it is important for W to choose a time to do this when Bl is relatively passive. To play Kd3-d4 would revive bS's activity before the light wB was ready: the consequence would be a latent hole at d5 for bK, thus:

Kd4,Sf5+;Ke4,Sd6+;Kf4.

The checks would be at an end, but what would W do about d5? The point is that the B that gives the shove to bK (with a check) always leaves a square of its own colour unguarded and this guard duty can be undertaken only by wK.

18.Ba4 d3a4b8 e6d6 BTM (49) Kd5 BK:e6 -> d5
 18...Kd5 [R8] d3a4b8 d5d6 WTM (49) Bb3+ ->
 19.Bb3+ d3b3b8 d5d6 BTM+ (48) Kc6 BK:d5 -> c6
 19...Kc6 [R9] d3b3b8 c6d6 WTM (48) Ba7 -> k

We have not exactly been outsmarted, but it's a b7 K&H we shall be faced with, not a g7 one! And the de56 box was only latent, ruling out bKe5. Note that bKc5;Ba7+,Kb4; was possible, but not optimal because bK will have been enticed off-centre, leaving space for wK to consolidate his occupation thereof. Another way of looking at it is to say that bK takes two moves away from the centre to attack wB, but the latter needs (in general) just one to take up a useful post, Bl thereby losing both time and space. Note how bS takes up - is somehow forced to take up - room that bK would like to have. Another important weapon in our mental armoury is that we do not need to drive Bl into a specific corner of our choice: simply driving him out of the centre will force him to make the choice himself. What price free will?! This choice will always be a K&H (phase 3) position with the computer playing the Bl side, which in a very real sense makes playing the computer easier (when one has experience of all phases) than playing against a human. With a human opponent there is always the 'danger' that we shall face a 'phase 4' position. It is this that makes phase 2 so tricky, because it so often closely resembles phase 4. To be able to distinguish phase 2 from phase 4 is the major remaining challenge to the full understanding of this whole endgame. In future it may be useful to program the selection of a sub-optimal move to make matters more difficult - but only for a human opponent, since the notion of difficulty relates solely to (human) psychology.

20.Ba7 d3b3a7 c6d6 BTM (47)
 Nb7/Nc8/Nf5/Kb7 BN:d6 -> b7

20...Nb7 d3b3a7 c6b7 WTM (47) Kd4 -> k
 This position, R10, is poised between phases 2 and 3. #
 21.Kd4 d4b3a7 c6b7 BTM (46) Nd6 BN:b7 -> d6
 21...Nd6 d4b3a7 c6d6 WTM (46) Ba4+/Bd5+/Ke5 -> 1
 22.Ba4+ d4a4a7 c6d6 BTM+ (45) Kc7 BK:c6 -> c7
 22...Kc7 d4a4a7 c7d6 WTM (45) Kd3 -> k

A very nice pair of traps avoided! wKc5?? Sc8; drawn, because wBa7 has no moves, while wKd5?? Sc8; is just as drawn because of the fork on c6 after wBa7 moves away. wKe5 also looks bad because of Sc4; and Sb6; but I admit I can't be sure of the depth here. Well, maybe wKe5, Sc4+, Kd4! is the only..... Humm... THREE traps! wKe5?? Sc4+; and Sb6; and bKb7; drawing again! The position is well worth our last diagram (R11).#

23.Kd3 d3a4a7 c7d6 BTM (44) Nb7/Nf5 BN:d6 -> f5
 23...Nf5 d3a4a7 c7f5 WTM (44) Bc5 -> k

The B must emerge, but as this is, optimally speaking, unique we interpret the choice of c5 by the need to stop bSf5-e7-c6. On c5 wB covers e7. And bKd6 had to be stopped. #

24.Bc5 d3a4c5 c7f5 BTM (43) Nd6 BN:f5 -> d6
 24...Nd6 d3a4c5 c7d6 WTM (43) Bd4/Be3 -> k

Flavour of tempo again, as f2 is eschewed.... I do not claim to understand it. We are now solidly in phase 3 and give the remaining play in an optimal line - to allay curiosity - observing only that wBa4, well placed as it is (covering c6, a 'phase 2 square' for bS) is poorly placed for making tempo moves since on e8 it would be vulnerable. Tempoing has to be the responsibility of the other wB. #1

25.Bd4 d3a4d4 c7d6 BTM (42) Nb7/Nf7 BN:d6 -> b7
 25...Nb7 d3a4d4 c7b7 WTM (42) Kc4 ->
 26.Kc4 c4a4d4 c7b7 BTM (41) Nd6+/Nd8 BN:b7 -> d8
 26...Nd8 c4a4d4 c7d8 WTM (41) Bf2 -> k

A couple of moves later than anticipated. #

27.Bf2 c4a4f2 c7d8 BTM (40) Nb7 BN:d8 -> b7
 27...Nb7 c4a4f2 c7b7 WTM (40) Bg3+/Kb4 -> k

wKb4 would yield the recommended exit christened '90-degree side-prize' (see EG83). #1

28.Bg3+ c4a4g3 c7b7 BTM+ (39) Kb6 BK:c7 -> b6
 28...Kb6 c4a4g3 b6b7 WTM (39) Kb4 ->
 29.Kb4 b4a4g3 b6b7 BTM (38) Nd8 BN:b7 -> d8
 29...Nd8 b4a4g3 b6d8 WTM (38) Bf2+ ->

Phase 4. #

30.Bf2+ b4a4f2 b6d8 BTM+ (37) Kc7 BK:b6 -> c7
 30...Kc7 b4a4f2 c7d8 WTM (37) Kb5 ->
 31.Kb5 b5a4f2 c7d8 BTM (36) Ne6 BN:d8 -> e6
 31...Ne6 b5a4f2 c7e6 WTM (36) Bd1/Bg3+ -> 1
 32.Bd1 b5d1f2 c7e6 BTM (35) Kd7 BK:c7 -> d7
 32...Kd7 b5d1f2 d7e6 WTM (35) Bg3 -> k

Besides this move there are three others that keep play in phase 4:

wKb6, Bb3 and Bd1.

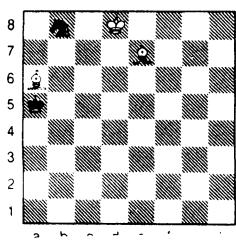

All others drop back, snakes-and-ladders fashion, to an earlier phase, generally phase 2. If in a phase 4 position there is just a single W move that 'maintains the phase' then this shows how close to a draw the 0023 class ending is. There are such positions. #

33.Bg3 b5d1g3 d7e6 BTM (34) Nd4+ BN:e6 -> d4+
 33...Nd4+ b5d1g3 d7d4 WTM+ (34) Kc5 ->
 34.Kc5 c5d1g3 d7d4 BTM (33) Nf5 BN:d4 -> f5
 34...Nf5 c5d1g3 d7f5 WTM (33) Bd1/Be5 -> 1
 35.Bel c5d1el d7f5 BTM (32) Ke6 BK:d7 -> e6
 35...Ke6 c5d1el e6f5 WTM (32) Bc3 ->
 36.Bc3 c5d1c3 e6f5 BTM (31) Ne3 BN:f5 -> e3
 36...Ne3 c5d1c3 e6e3 WTM (31) Bf3 ->
 37.Bf3 c5f3c3 e6e3 BTM (30) Kf5 BK:e6 -> f5
 37...Kf5 c5f3c3 f5e3 WTM (30) Bc6 ->
 38.Bc6 c5c6c3 f5e3 BTM (29) Nf1/Ke6 BN:e3 -> f1
 38...Nf1 c5c6c3 f5f1 WTM (29) Kd5 ->
 39.Kd5 d5c6c3 f5f1 BTM (28) Ng3 BN:f1 -> g3

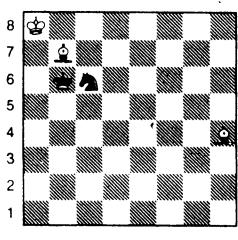

39...Ng3	d5c6c3 f5g3 WTM (28)	Ba4/Bd7+ -> 1
40.Ba4	d5a4c3 f5g3 BTM (27)	Ne2/Nf1 BN:g3 -> f1
40...Nf1	d5a4c3 f5f1 WTM (27)	Bd7+/Ba5 -> 2
41.Ba5	d5a4a5 f5f1 BTM (26)	Ne3+ BN:f1 -> e3+

"The road to draw is full of pitfalls, but wS displays incredible activity. wK starting in check is a minor flaw." The prolongation of the solution by exploring repetition has the disadvantage (if 'length of solution' is seen as a merit) of artificially extending the length, but the practical advantage of reducing the number of notes.

No. 7974 P. Perkonoja
 1st Prize,
 Dunder MT, 1989
 award: Suomen Tchtevankiekat
 No.4, x89

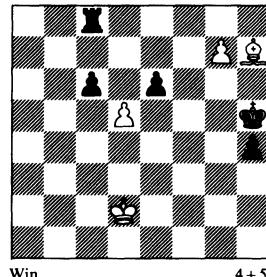

No.7974: Pauli Perkonoja (Turku, Finland). This was a national tournament for Finnish composers. Judge: Aleksandr Maksimovskikh (Zagainovo, USSR). For practical reasons of quantity (14 entries) and quality (50% unsound) the award is in two parts, the extra part, which we shall

here call 'special', being for new composers. 1.Qf7 Rh8 2.Qxf6+ Kg4+ 3.Qxh8 g1Q+ 4.Kxg1 f2+ 5.Kxf2 Qa7+/i 6.Bb6 Qa2+ 7.Re2 Qf7+ 8.Kg1/ii Sxh8 9.Rg2+ Kh5 10.Rh2+ Kg6 11.Bd4/iii Qe6 12.Bxh8 drawn.

- i) This explains the P-sacrifices by Bl.
- ii) With bQ on a safe spot wQ can be captured.
- iii) In the course of play bSh8 has been deprived of the squares g6 and f7. An original cornering idea.

No. 7975 H. Sokka
 2nd Prize,

No. 7981

P. Benko(iii.86)

1st Prize,
Sakkélet, 1986
award: v.87

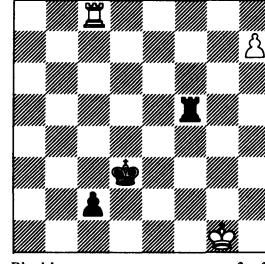

Draw

3 + 3

No. 7981a

Position after 3. h7
in No. 7981

Black's move

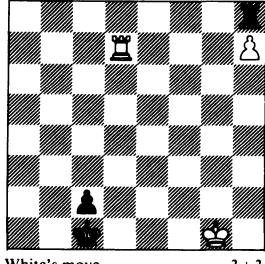

3 + 3

No.7981: Pal Benko (USA and Hungary). Judge: Ervin Janosi (Budapest, iii.87). For Benko's study we draw on the Sakkélet (iii.86) notes and those in a 2-page article by IM Rudolf Maric in Europe-Echecs (xi.89). In 1985 Maric, who had been Benko's second in the 1959 Candidates, met Benko who, so the story goes, challenged him 'for old analytical times' sake' to solve this formidable study. The IM succeeded, but only at the expense of his performance in the Bad Whrishofen tournament. ... W is 2-3 tempi behind, and Bl threatens to promote with check. **1.Rc8.** The only move to force Bl onto the defensive. 1.h6? Rg5 + 2.Kf1/i Rc5 3.Re8 + Kf3 4.Rf8 + Kg4 5.Rg8 + Kf5 6.h7 c2 7.Rf8 + Kg6 and W will be mated. **Kd3.** Or Kd2 2.h6 c2/ii 3.h7 Rf8 4.Rxf8 c1Q + 5.Rf1 Qc3 6.Rf7, with a position that is a draw, reasonably enough. **2.h6 c2 3.h7.** See Diagram

Kf3 12.Rh3 + Kf2 13.Rh2 + Kf1 wins. **Rh8.** Or Rd8 5.Kf2 Kd2 (Rh8; Kf3) 6.Rd7 +, when Bl does best to accept perpetual check by Rxd7 7.h8Q c1Q 8.Qh6 + Kd1 9.Qh1 +. The other logical looking move is Rb8 5.Kf2 Kd2 6.Rd7 + Kc1 7.Rb7 Rxb7 8.h8Q Kb1 9.Qh1 + with a draw. Now Bl threatens to take on h7. **5.Rd7 + Kc3 6.Rc7 + Kd2 7.Rd7 + Kc1.** See Diagram

No. 7981b

Position after 7. ..., Kc1
in No. 7981

White's move

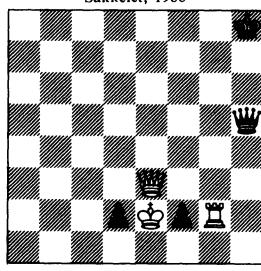

3 + 3

No.7981a. 3.Kg2? to avoid later checks fails: Rf8 4.Rc7 (Rc6? Rf6;) Rh8 5.Rd7 + Kc3 6.Rc7 + Kd2 7.Rd7 + Kc1 8.Rd6/iii Rc8/iv 9.h7 Kb1 and wins. **Rf8 4.Rc7.** Clearly the best. 4.Rxf8? c1Q + 5.Kg2 Qd2 + 6.Rf2 Qg5 + 7.Kh1 (Kf1,Qh5;) Qd5 + 8.Rg2/v Qa8 9.Kh2 Qb8 + 10.Kh1/vi Ke3 11.Rh2 (else Qb1 +;)

No.7981b. W seems to have spent his last cartridge and faces the threat bRb8;, while Rb7,Rd8; is a similar denouement. Specifically, 8.Kf2? Kb2 9.Rb7 + Kc3 10.Rc7 + Kb3/vii 11.Rb7 + Ka4 12.Ra7 + Kb5 13.Rc7 Rxh7 14.Rc8 Rh1 wins. 8.Kh2? is bad because wPh7 will be lost with a check. 8.Kg2? Rb8 9.Rg7 Kb1 10.Rg8 Rb2 and W will be mated. 8.Rb7? Rd8 9.Kf2 Kd1 10.Rd7 +

Rxd7 11.h8Q Rd2+ 12.Kg3 c1Q is more than enough. Maric observes at this point that the foregoing lines show that W is forced to liberate bK but in return wR can take up a position of maximum effectiveness. **8.Rg7.** There are now two variations, in each of which the wK moves that have just been shown to fail, succeed! Either:
Rb8 9.Kh2. Here 9.Kf2? Kb1 10.Rg8 Rb2 wins. 9.Rg8? Kd2 10.h8Q/viii c1Q+ 11.Kh2 Qc7+ 12.Kg2 Qc6+ 13.Kh2 Qd6+ leaves W defenceless.
Kb1. Nothing else is better: Kd2 10.Rg2+, whereafter bK can neither quit the c-file nor step onto the b-file, because of wRg8. **10.Rg8 Rb2.** Clearly the strongest, but we shall see that the discovered check is for once not fatal. 11.h8Q c1Q+ 12.Rg2 Qf4+ 13.Kh1, and the only checks left to Bl(Qc1+; or Qf1+;) would be fatal. This really is the end! Or:
Rd8 9.Kf2. Not 9.Kh2? Kb1 10.Rg8 c1Q. **Kb1 10.Rb7+ Ka2 11.Ra7+ Kb3 12.Rb7+ Kc3 13.Rc7+ Kd2 14.Rd7+ Rxd7 15.h8Q c1Q 16.Qh6+ Kd1 17.Qh1+ Kc2 18.Qc6+,** with capture of bR.
 i) 2.Kh2 c2 3.Rc8 Kd2 4.Rd8+ Kc1 5.Rd6 Rc5 6.Kg3 Kb1 7.Rb6+ Ka2 8.Ra6+ Kb3.
 ii) Rh5 3.Rd8+ Kc1 4.Rd6 c2 5.Kg2, ‘drawing because bR has no way to gain a tempo’.
 iii) 8.h7 Rb8 9.Rb7 Rxh7 10.h8Q Kb1 11.Qc8 Rg7+ and c1Q, while if, in this, 9.Rg7 Kb1 10.Rg8 Rb2 with a mating attack.
 iv) Here, Rb8; fails to 9.Rc6 Kd2 10.Kg3, supporting whP to draw.
 v) 8.Kg1 Qd4 9.Kf1 Qa1+ 10.Kg2 Qg7+.
 vi) 10.Rg3+ Ke2 11.Kh3 Qh8.
 vii) Kd3? 11.Kf3 Rxh7 12.Rxh7 c1Q 13.Rd7+.
 viii) 10.Rxb8 c1Q+ capturing either wR or wP. 10.Rg2+ Kd1 11.Rg8 c1Q wins.

DVH: neat.

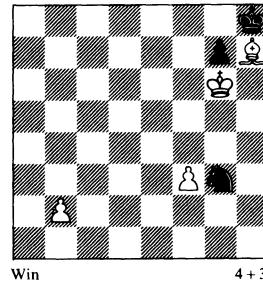

No. 7997 Jan Lerch(xii.88)
1st Prize,
Sakkélet, 1988
award: x.89

No.7997: Jan Lerch (Czechoslovakia). Judge: László Zoltán (Budapest). 1.d6 Be8 2.Sf6 Bc6 (Bb5; Kc5) 3.Kc5 Bb5 4.Kb6 Kb4 5.Sd5 + Kc4 6.Se3 + Kb4 7.Sc2 + Ka4 8.Kc7 Be8 9.Kd8 Bh5 10.Se3 Be2 11.Ke7 Bb5 12.Sc2 Bc6 13.Sd4 Bb5 14.Sxb5 wins. Wonderfully aesthetic gyrations of

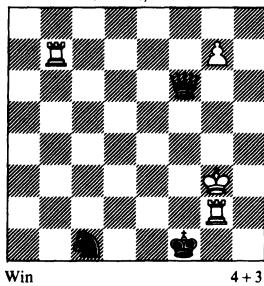

both K's and both pieces in this unique solution to an utterly natural position which looks as if it is straight out of Basic Chess Endings - but it isn't! The composer demonstrated the solution at the October 1989 CESC meeting and confirmed that without bPa5 the position would be drawn.

No. 7998 P. Benko(viii.88)
2nd Prize,
Sakkélet, 1988

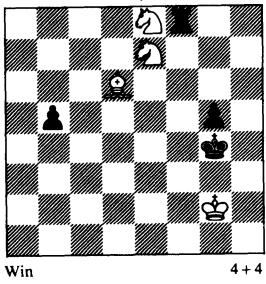

No.7998: P 1 Benk (USA and Hungary). 1.b4 Se2/i 2.b5 Sd4/ii 3.b6 Sc6/iii 4.b7 Sd8/iv 5.b8B, with: Sc6 6.Bg3/v Se7 + 7.Kf7 Sg6 8.Bg8 Se5 + 9.Ke8/vi wins, or Se6 6.Bd6/vii Sf8 + 7.Kf7 Sxh7 8.Be7 wins.
i) Se4 2.Kf5 Sd2 3.Bg6 Sxf3 4.Ke4 wins.

No. 8007 M. Matous
1st Prize,
Molodoy Leninets (Kurgan)
C.31.iii.89
award: 16.xii.89

Draw 3 + 3

No.8007: Mario Matous (Prague). The event was the second international tourney for miniatures organised by the Kurgan newspaper. The tourney may also be referred to as 'Komsomol-70'. Judge: Aleksandr Petrovich Maksimovskikh (Kurgan, USSR), who confesses in an interview in Shakhmatisty Rossii (9/89) to a weakness for miniatures. Over 100 entries were received, from Czechoslovakia, Yugoslavia and Sweden as well as from the USSR.

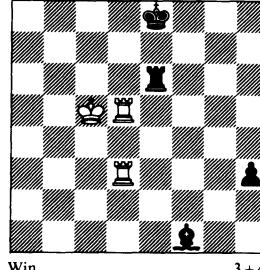

The diagram shows a draw on material but wR is en prise, and wS could also be lost. 1.Rh3/i Ra5 + 2.Kg4/ii Ra4 + 3.Kg5/iii Rb6 4.Rf3/iv Rh6 5.Sg4/v Rg6 + 6.Kh5 gRxg4/vi 7.Rg3 and stalemate comes to W's rescue. i) 1.Rb8? Rg6 + 2.Kf4/vii aRf6 + 3.Ke4 Rg2 4.Sf3 Rg4 + 5.Ke3 Rg3 and wS is lost. 1.Rh5? Ra5 + 2.Kg4 Rxh5 3.Kxh5 Rh6 + . ii) 2.Kh4? Rh6 + 3.Kg3 Ra3 + . iii) 3.Kg3? Ra3 + 4.Kg2 Rg6 + 5.Kh1 Ra1 + (Rxh3?). iv) 4.Kf5? Rb5 + 5.Ke6 Ra6 + 6.Kd7 Rb7 + 7.Kc8 Rf7 8.Rg3 + Kf8 9.Kb8 Re6 10.Rc3 Re8 + 11.Rc8 Rxc8 + 12.Kxc8 Rf4 and wS is lost. v) 5.Rf2? or 5.Sf1? are met by Rg6 + 6.Kh5 Ra8 and Rh8 mate. vi) aRxg4 7.Rf7 + Kh8 8.Rh7 + Kg8 9.Rh8 + Kf7 10.Rf8 + and draws by perpetual check, for example, Ke6 11.Re8 + Kf5 12.Re5 + Kf4 13.Rf5 + Kg3 14.Rf3 + Kh2 15.Rh3 + Kg1 16.Rh1 + Kf2 17.Rf1 + .

No.8008: Leonard Katsnelson and Leopold Mitrofanov (Leningrad). 1.Rd8 + Kf7/i 2.Rf3 + Ke7/ii 3.R8f8 Rc6 + 4.Kxc6 Bg2 5.R8f4 h2 6.Re4 + Kd8 7.Rf8 mate. i) Ke7 2.R3d7 + Kf6 3.Rf8 + and 4.Rxf1. ii) Rf6 3.Rxf8 + Kxf8 4.Rxf6 + Kg7 5.Rxf1 wins.

No. 8008 L. Katsnelson
and L. Mitrofanov

2nd Prize,

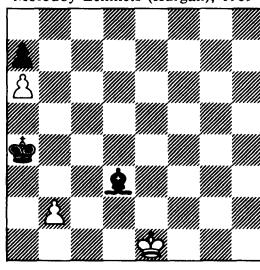

Molodoy Leninets (Kurgan), 1989

Win

3 + 4

No. 8009 V. Vlasenko
3rd Prize,
Molodoy Leninets (Kurgan), 1989

Draw

3 + 3

No.8009: Valery Vlasenko (Komsmolsky, Kharkov region). 1.Kd2 Bh7 2.Kc3 Bf5 3.Kc4 Be6 + 4.Kc3 Bb3 5.Kd2 Kb4 6.Kc1 Bd5 7.Kb1 Kb3 8.Ka1 Bg8 9.Kb1 Bc4 10.Ka1 Kc2 11.b3 Bd3 (Bxb3 stalemate) 12.Ka2 Kc1 13.Ka3 Kb1 14.Ka4/i Kb2/ii 15.Ka5 Kc3 (Kxb3 stalemate) 16.Ka4 Kb2 17.Ka5, positional draw. The award draws attention to an article by the composer (64-Sh.Ob. 3/1989) where the failure of 3.b4? is demonstrated.

- i) 14.Kb4? Bxa6 15.Ka5 Bf1 16.b4 a6 and B1 wins.
- ii) Bxa6 15.b4 Bf1 16.b5 draws.

DVH: a new contribution to theory.
