

FIDE COMMISSION, 1977

Malinska, on the island of Krk in Yugoslavia, was the site of the 20th meeting of the FIDE Compositions Commission, from 6-13.ix.77. FIDE Master titles were awarded to, among others, Alexander Hildebrand and the President, Jan Hannelius.

A second WCCT seems to be on the cards, with the organisation split between West Germany and Czechoslovakia (4 sections each): Israel will set the studies theme and be responsible for judging it. An exciting event was the first World Solving Championship (for teams of two). There were 6 rounds, with favourites, Finland, winning only in the last round (helpmates), when Israel lapsed. Yugoslavia were third, West Germany fourth, the USSR fifth. John Beasley and Ron Brain represented Britain, who came eighth out of nine.

In 1978 the meeting will be in early September, at Canterbury. Do plan to be there! Any Briton willing to assist (and not just with money), please get in touch as soon as possible with Barry P. Barnes, Marsh House, Marsh Road, Halling, Rochester, Kent ME2 1DB.

Tourney details.

Send your best (ie, not all!) studies published in this 3-year period to the Tourney Director: AJR. The following instructions **must** be followed: 5 copies (on separate sheets) with clear position and full solution, stipulation, date and place of first publication, rank (if

any) in tourney award, dedication; full name and address and nationality. Use one side of the paper only. Closing date 30.vi.78.

PROBLEM 181-187 (viii.77).

Articles by Bondarenko, Gorgiev, Maksimovskikh, Pogosjants and AJR are included. The AJR article is in English, proposing (see p. 453 of EG 48) a systematic approach to identifying and filling all the gaps in endgame theory. Despite a couple of diagram misprints and several other confusions you should be able to follow it! From this issue we learn of the passing of Andrei Maksimovich **Bogomaz** (13.xii.10 to 13.ix.75) in Odessa, and of Nikolai Fedorovich **Zababurin** (1925 to 12.vi.75) in Simferopol.

A Basic Idea (Matrix) Expressed in Different Ways (Settings).

by Jehuda Hoch (Petakh Tikva, Israel).

H1 and **H2** show the basic idea: bQ cannot check on rank or diagonal, but only on the c-file. So we need to "add something" that will both prevent the check on the c-file and threaten a mate that bQ cannot prevent. This is an idea for a study.

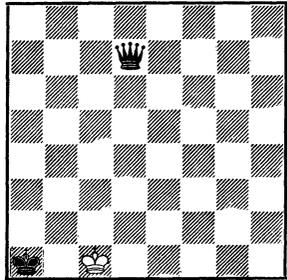

What is this "something" to be? The natural candidate is wQ, as in **H3**, where W wins by two quiet moves (with only K's and Q's on the board). After composing **H3** I found a way to replace wQ with wR+wP, as in **H4**.

But **H5** was a real surprise, using wS+wP (and in bP). The resemblance between **H3** and **H5** was unnoticed at the time of composing

H5, because bPc3 (preventing a bQ check on the diagonal) disguises the connection, so that **H5** does not show the idea clearly. However, **H6** shows the idea clearly, using just wS+wP.

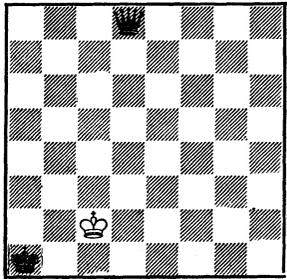

We have seen the idea expressed with wQ, wR and wS (wB does not look promising). Is it possible to use the same setting with less material? Surprisingly, the answer is 'yes', for instance in **H7**, one of the most beautiful settings ever seen on the chessboard, where W, with only 2P's wins (not draws!) against bQ+bB+bS on an open board. As can be seen from **H8**, B1 would draw if he did not have bS. This is all that I know about the settings using the basic situation shown in **H1** and **H2**. I do not believe that it is possible to show it with less material than in **H7**, but is it possible to use it with **other** material that that shown in this article? This I leave to the reader.

JRH comments from the viewpoint of anticipations: " ... interesting as showing how a composer's mind works, but I do not think the approach is of value to the craft of finding anticipations. Would any judge be impressed if it were suggested that **H8** were an anticipation of **H5**? Even the anticipations I cite in EG are sometimes discounted (True! AJR), so that such an esoteric citation of **H8** against **H5** would clearly be met with derision. All this is not to be taken as meaning that the article is of no value; but I think its value lies in guiding composers to new ideas rather than to showing relationship between studies. At this stage of study development, I do not think anyone is likely to say that **H5** is significantly related to **H8**.

The relationship between **H5** and Kubbel (1917, No. 1281 in '2545') appears to me to be much closer. Is Pogosjants (1976: wKg6, wPe2 bKh8, bPg7 - 1, Kf7 g5 ... 5. ... g1Q 6. e8Q† Kh7 7. Qe4† Kh6 8. Qh4 mate) one of this group? Perhaps not, as W is to move, perhaps B1 should be to move."

Special Prize for Best U.S.A. entry: No. 3213, by P. Monsky. The prize-and-publication fund was subscribed by **Walter Korn**, Neil McKelvie, Chris Becker and Edmund Peckover himself. The whole idea originated in the U.S.A. too.

THEMES-64, 1974-1976 is available, bound, at Fr. Francs 60.— from: Francois Fargette, 10 Allee de la Closerie, F. 78240 Chambourcy, FRANCE.

As well as problems (many kinds), studies and reviews there are interesting articles, such as those on the USSR Code of Composition.

Tourney Announcements.

2. Thematic tourney: "one or more pieces, W or B1, play far from bK". By 31.vii.78. To: MONGOLIA, 9 Sukhe-Bator Square, Ulan Bator, MONGOLIA. Judge: E. Pogosjants.

Gandolfi (see p. 495 of EG 48). Dr. Adriano Chicco refers to an article he contributed to **Sinfonie Scacchistiche** (iv-vii.75), in which it is made clear that Gandolfi composed about 100 studies.

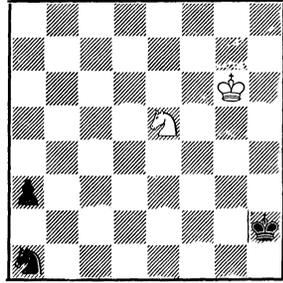

NEW BOOKS.

Encyclopedia of Chess, H. Golombek (Ed.). Articles in this sumptuous production include one by David Hooper on the endgame, and one by AJR on the endgame study.

Nieuwe Schaakkuriosa, Tim Krabbé, 1977 (in Dutch). Games, problems and studies figure in this collection of 265 positions presented in the Assiac style but with rather more analyses. Included is Krabbé's demolition of a famous Zepler 1st Prize study (Kc2/a8 =).
