

November, 1980

**SEPTEMBER 1980**

**4th World Chess Solving Championship**

This 2-person team event took place at Bled (Yugoslavia) on the 3rd and 4th.

Israel, who had a poor result in 1979, won by a convincing 2½ points over Finland, the respective teams being Ofer Komai and Yuri Avner, Pauli Perkonoja and Harri Hurme. The British pair, winners of the Lloyds Bank British Solving Championship, consisted of Graham Lee and David Friedgood and came 5th, a half-point behind Yugoslavia and the USSR. Komai took the individual title, scoring 15 points, which appears to have been a 100% score.

**FIDE Commission Meeting**

This year it was Austria (Wiener Neustadt) that hosted the meeting from 6-13th. It was very well attended. The FIDE titles that have a studies interest were awarded to:

Grandmaster:

Bo Lindgren (Sweden)

Gia Nadareishvili (USSR)

Master:

Emilian Dobrescu (Romania)

David Gurgenidze (USSR)

Anatoly G. Kuznetsov (USSR)

Leopold Mitrofanov (USSR)

Virgil Nestorescu (USSR)

Judge:

Vazha Neidze (USSR)

(We thank Barry P. Barnes for all the above details).

From left to right: AJR, Michael Stean, David Levy, Michael Basman, Lance Corporal Hopkins (Army Chess Association), and Bernard Cafferty. *Video Chess* is playing simultaneously against six invitees, in London on 25.vi.80.

(See p. 352)

## TOURNEY ANNOUNCEMENTS

### 1. Jubilee Tourney no. 6 of "EG"

To celebrate the 50 years of activity as a composer of Mr. C.J. de Feijter of Deventer (Netherlands), we have a great pleasure in announcing this international tourney for original endgame studies. The closing date for entries (maximum: 3 per entrant): 31.xii.80. The tourney is sponsored by the **Alexander Rueb Foundation**, with whose help the award will be published in EG. Judge: C.J. de Feijter. Send entries to: W.J.G. Mees, Harddraverslaan 60, 2082 HN Santpoort, Netherlands. (Do NOT send any entries to AJR - who is, incidentally, quite delighted by this tourney, as it makes him feel very young!)

The previous 5 "Jubilee" tourneys of EG were in celebration of: David Joseph, Harold Lommer, Heinrich Fraenkel ("ASSIAC"), J. Edmund Peckover and AJR. The "break" in tradition, by which we abandon the "British Connection" will, we trust, start a new, permanently international, tradition. **AJR**

2. To celebrate the 2050th anniversary of the first centralized and independent Dacian state: closing date - 31.xii.80. Maximum 3 studies per composer. Send to: "Tourney DACIADA", Revista Romana de Sah, str. Vasile Conta 16, Bucarest, ROMANIA.  
Judge: Paul Joitsa.

**Pitman Chess Teaching Scheme.** AJR is among the contributors to this long-awaited, two-volume aid to learning chess, designed especially for children at school. One volume is a "Teacher's Book" - and the teacher needs barely to know the moves! It gives the answers, with much background and back-up material, to the questions in the pupils' book.

3. "MONGOLIA" magazine. Entries (in 2 copies) by 31.x.80 to: 9 Sukhe-Bator Square Ulan Bator, MONGOLIA. Judge: S. Chimedtzen. (Too late!)

## OBITUARIES

+ **Jens Enevoldsen** (23.ix.07 - 23.v.80). The Danish master, author and composer possessed a remarkable collection of chess endgame rare books, including most of the editions of Stamma's endings, despite the loss by fire of a number of invaluable items. Among his projects was one to research in England to discover more about Stamma, but it never got under way. His Copenhagen hospitality and Danish pride are equally unforgettable.

+ **Freddy Reilly** (18.vii.29-12.v.80). A.M. (the 'Freddy' was from Alfred) Reilly was the son of Brian Reilly. Together they produced the monthly **British Chess Magazine**. He died of a heart attack. On many occasions Freddy gave me advice on the mystique of printing, beginning with EG1 and EG2, which were printed by the **BCM**. We have lost a very good friend.

+ **Erich Zepler** (27.i.98 - 13.v.80). Born in Germany, Dr. Zepler made England his home, living for many years in a Southampton suburb. He became President of The British Chess Problem Society. Better known for long-range problems, he composed a number of fine studies. Grandmaster Vladimir Pachman recommended me to seek Dr. Zepler's advice on translating some of the sticky technical terms in his "Logical Studies" paper but alas the good doctor was even then in special care.

+ **Juhani KOPPELOMÄKI** (6.xi.36-13.iv.80). This still young Finnish study composer had already establis-

hed a formidable reputation, and his death is a grievous loss. The diagram numbers of his work that appeared in EGI-60: 1486, 1686-93, 1751, 2123, 2195, 2555, 2993, 3202, 3209, 3257, 3306 and 3320.

Properties of the Rook", that should go far to remove fear of R-endgames; the translation by Philip J. Booth is excellent; and we find (p.132) "To play individual positions successfully it is often useful to have a knowledge of ideas from studies".

## SARGON IN THE USSR

Surely only a fool would cart a heavy wooden chessboard and accompanying loaded chessmen for several thousand miles round the USSR. Well, that is what I did in September. I demonstrated the "Auto-Response Board" version of SARGON 2.5 to about 200 people in all, in Baku, Tbilisi, Erevan and Leningrad. All audiences were very enthusiastic. What about Moscow? I didn't show it there, because they (or rather the representative of 'them') claimed it wasn't new...

AJR

**Correction to Diagram No. 4043:**  
Please place wK on g3 (instead of wB), and add wBh3.

**Reviews** ROOK ENDINGS (Levenfish and Smyslov) is now in its 4th impression, having first been published in English in 1971. It deserves special mention, I believe, because it **teaches** this endgame. Too often the outcome of a GBR class endgame **0400.nn** depends on what the notes call "one tempo". This is infuriating to read because it smacks of hindsight. Can **you** learn from someone else's hindsight? I can't. ROOK ENDINGS is far more helpful. We read, for instance (p.165) that bR is paralysed by having to guard waP - only active play by bK is any good. This advice is visibly corroborated by reference to the diagram. Such examples abound. Three final points: there is an introduction (far too short!) called "The

"**Advances in Computer Chess - 2**" (Ed. M.R.B. Clarke, Edinburgh University Press, 142 pages, 1980). This volume brings together the text of the 9, papers presented to a conference which took place in Edinburgh in iv.78. At least 5 papers relate to the endgame, and have been mentioned in EG. The GBR Class **0103** gets detailed attention.

"**Sila Peshky**" ("The Strength of the Pawn"), by G.M. Kasparyan (Erevan, 352 pages, 1980). The 1338 studies in this latest volume of the FIDE Grandmaster's classificatory anthologies are all wins, and all have at least one piece. All express the strength of one or more wPs. In other words, white pawns dictate the play, whether by actual promotion, threatened promotion, the setting up of typical pawn manoeuvres such as breakthroughs, the tying up of black force by the active use of Ps, and so on. The familiar Kasparyan sequencing technique of tables showing W force down the side and B1 force along the top has the interesting and valuable property of allowing a composer or other party searching for less explored fields to identify them at sight. One need only look for the intersections that are blank. SBB against RR is one example -- this would be GBR Class **0621**. The paper quality of this 30,000 copies edition anthology is good -- but unfortunately the diagram quality is variable.

AJR

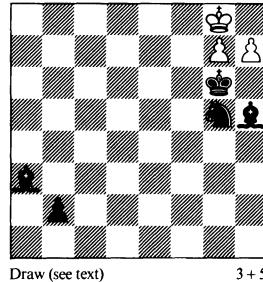

**Heuäcker Momorial Tourney** -- the closing date is now 31.xii.80. (See EG57, p. 234)

However, there is no information supplied or readily to be inferred (for instance, by testing its play) about the differences between the two modes.

#### \*C\* Minis and Micros

The modes of presenting positions and moves show great variety and ingenuity. One (Atari) uses an ordinary TV set, the control comprising a joystick and button, making it simple to learn. Video Chess uses a non-TV screen, but the diagram representation is outstandingly clear, in colour; it is one unit of a genuine home computer. The pothograph on p. 349 shows Video Chess paying six strong players at once. It is claimed that it will underpromote, but when I tested it with the attached instant composition, it failed to find 1. h8B, and played instead 1. Kh8? Sargon 2.5 is now available in an "Auto-Response Board" ("ARB") version, using what looks and feels like a normal, tournament-size board and loaded and felted Staunton pattern men. A small LCD (liquid crystal display) light is inserted into a corner of each of the 64 squares. The ARB senses the player's move by means of magnets under the squares, and announces its own by lighting the departure and arrival squares. Sargon 2.5 has levels 0-6, '6' being the highest, but only up to level 4 is its speed of play tolerable. However, at level 4 it will deliver checkmate, after some trial and error of its own, with GBR Class 0020, which is impressive. It will not underpromote. Even at level 6 it plays the GBR Class 1300 weakly, being unable to recognise the zugzwang method of forcing the rook away from its king. After 30 moves of a game Sargon changes its mode of play to give the king(s) more activity for the endgame. To initiate this mode form a specially set up position one has to play 30 'moves'.

A.J. Roycroft  
Original (Composed 25.vi.80)

#### \*C\*

No computer has yet played chess to international standard. But, in vii.79 a computer program defeated the World Champion 7-1 in a match, and the match took place the day after the Champion had been crowned. The World Champion was Luigi Villa of Italy, and the game -- backgammon. The link with chess is that the program was written by Hans Berliner, 1968 Worlds Correspondence Chess Champion. The man-machine contest took place in Monte Carlo and Berliner has superbly written it up in a long article in SCIENTIFIC AMERICAN for vi.80.

#### Selman and Korolkov

A letter dated 15.vi.80 from FIDE Grandmaster Korolkov reads, in part and in translation: "Concerning the study J. Selman, 1st Prize, KNSB, 1949, I did not know of it, since at the time foreign studies did not reach me. When I did learn of J. Selman's study I wrote as follows in my 1958 book ('Selected Studies', Moscow, 1959), on p. 199: It transpired that the study has an anticipation (J. Selman, 1st Prize, tourney of 'Tijdschrift', 1949): White - Kc1, Ba1, Sd4, Pf6 Black - Kh8, Re3, Bc8, Pg4. Win. 1. Sf5 Re1 + 2. Kd2 Rxal 3. f6

Ra2+ 4. Ke1 Ra1+ 5. Kf2 g3+ 6. Ke3 Ra3+ 7. Kf4 Ra4+ 8. Kg5 Rg4+ 9. Kh6 etc." Mr. Korolkov continues: "In the book **555 Miniature Studies** the author G.M. Kasparyan wrote in a note to my study No. 277 on p. 163 - 'Although this study has an anticipation (J. Selman, Tijdschrift KNSB, 1949, 1st Prize), it is nevertheless more economical and significantly more interesting.' I should like to add that it enhances the value of J. Selman's study that the white knight lands on the vitally important square f5 in the course of play."

#### **... and Milescu (Israel)**

Although the Selman study's diagram was published (in v. 40), the solution was not. The very next issue, No. 6 of 1940, was the last, due to the War.

#### **... and Peckover**

Edmund Peckover writes that he distinctly recalls having seen the position (on p. 291) and play ... in the year 1919!! When he was in Egypt. We are trying to find some independent corroboration of this, but it is proving very difficult.

#### **Comment by AJR**

It is a sad thought that no one from the West seems to have written to Mr. Korolkov on this subject, and that we had to wait for John Selman's death to have it clarified. The incident lends weight to a pet theory of mine, that every problem is two problems -- a technical one and a communication one. Time, distance, language differences are communications factors. They explain much, are simple in themselves -- and yet are so frequently overlooked in making judgements.

#### **The "Ortueta vs. Sanz" Position.**

Although not a study, because it took place in a game, this famous combination 'might have been composed'. We are grateful to Mr. J.P. de Arriaga of Madrid for the full details.

The game was the 6th in the play-off match for the championship of Castille, and was played in iv.33 at the 'Centro Cultural de los Ejercitos y la Armada de Madrid (Casino Militar)'.

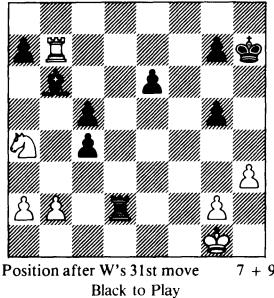

White: Martin de Ortueta

Black: José Sanz

1. e4 e6 2. d3 d5 3. Sc3. At San Sebastian in 1911 Nimzovich played 3. Sd2 here, to play the same formation as Black in the Hanham variation of Philidor's Defence. Capablanca, whose notes in **El Ajedrez Espanol** of ii.36 we are using, does not approve. 3. ..., Sf6. 3. ..., c5 is also excellent. 4. e5 fSd7 5. f4 Bb4. Of doubtful value, giving W the chance to play 6. a3. 6. Bd2 0-0 7. Sf3 f6 8. d4 c5 9. Sb5. Here W ought to try 9. a3 Ba5 (Bxc3; ba or cd; ab, dc; Bxc3) 10. b4 cb 11. ab Bxb4 12. Sb5 Bxd2+ 13. Qxd2. 9. ..., fe. A serious error. B1 should play 9. ..., Bxd2+ 11. Qxd2 cd 12. cd bSxd4 Sc5. 10. de. Another mistake. W has a good position after 10. Bxb4 cb 11. fe. 10. ..., Rxf4? 11. c3 Re4+ 12. Be2 Ba5 13. 0-0. B1 has won a P but his pieces are passive. A poor bargain. The only good move now would be 13. ..., c4 to stop wB from reaching d3. 13. ..., Sxe5 14. Sxe5 Rxe5 15. Bf4 Rf5 16. Bd3 Rf6 17. Qc2. W has a winning attack with 17. Qh5. 17. ..., h6 18. Be5 Sd7 19. Bxf6 Sxf6 20. Rxf6 Qxf6 21. Rf1 Qe7 22. Bh7+ Kh8 23. Qg6 Bd7 24. Rf7 Qg5 25. Qxg5 hg 26. Rxd7 Kxh7 27. Rxb7 Bb6. A weak move making a relatively easy ending difficult. Correct was 27. ..., c4 28. e4. In Capablanca's judgement B1 should not now win. 28. ..., dc 29. Sc3. But 29. Sd6 was the move to draw. 29. ..., Rd8 30. h3 Rd2 31. Sa4 (See Diagram). 31. ..., Rxb2. A very brilliant finish, even if B1 could win without any such recourse. 32. Sxb2 c3 33. Rxb6. Capablanca comments hereafter only at B1's 34th and 35th moves. If 33. Rd7 cb 34. Rd1 c4+

35. Kf1 c3 36. Ke2 c2. While if 33. Sd3 c4+ 34. Kf1 (Rxb6 cd;) 34. .... c2 35. Kd2 Be3+. 33. ..., e4. Or 33. Rc6 cb or 33. Sxc4 c2. It is common knowledge that a P on the 7th rank attacking a S is almost impossible to stop. Among the charms of this combination is that the P attacking the S is only on the 6th rank. This gives rise to the attractive variations. 34. Rb4 a5. The climax to the short but excellent combination. 35. Sxc4 c2. We do not need to give (writes Capablanca) the 3 or 4 more moves W made before resigning. From the 31st to 34th moves this ending is most beautiful. It is a pity that the rest of the game is not of this quality.

M. de Ortueta vs. J. Sanz  
Madrid, 1933

Position after W's 31st move  
Black to Play

7 + 9

Note: the position has frequently been printed with different P-configurations on the K-side, in particular with the e6 and g5 P's omitted. The probable reason is that the position is thereby made more study-like, with only one 'solution' - see 'Capablanca's comment to B1's 31st move.

AJR

**DIAGRAM/SOLUTION** comments  
No. 3858. This AJR Jubilee entry (from Borisov) is in fact from a game Goldshtain vs. Shakhnovich, Moscow, 1946. The colours have been reversed. Eagle-eyed René Olthof (Rosmalen, Holland) points this out. Borisov has failed to respond to an invitation to comment.

No. 4043. Diagram misprint. Please add wKg3 (replacing wB), and add wBh3.

## THE PRESENTATION OF ARTISTIC STUDIES

by S.T. Sahasrabudhe, Bombay

The taste of an artistic study, as distinct from a didactic study, is in the pleasure it gives. I suggest that this pleasure can be enhanced by the addition of a diagram of the end-position, and, after it, an **inverted** solution.

### End-Position Diagram (EPD)

Anthologies invariably give a diagram for the set position, almost never one for the end-position. Providing an EPD for an artistic study would have at least 4 advantages.

1. The originality of the EPD will be highlighted. This is especially important for positional draws and for pure mates and stalemates.
2. Comparisons will be facilitated for:
  - (a) win/draw studies and their antiforms
  - (b) faulty studies and their corrected versions (where the EPD has undergone a change)
3. The developing composer's creative aspirations will be assisted and stimulated. He will have ready access to areas of composition new to him, and he will be inspired to set up his own EPDs.
4. EPDs will provide especial pleasure to connoisseurs.

### Grouping of EPDs

The types of studies enumerated in (1) and (2) above can naturally be presented in groups. For this purpose it may be thought that the EPD can be dispensed with. However, if the EPD is provided, there should be 2 advantages. First, the wealth of ideas in introductory play of studies in each group can be the more readily compared and appreciated. Second, the budding composer will be able to learn how the experts re-use known ideas, whether in 'embroidery' or in anti-forms.

If the configuration of men on the board at the end of the main line of the solution of two or more studies is the same man for man, then the EPDs are the same. But if two or more end-positions have the same basic features, e.g. a mate or stalemate with like forces (Ps being ignored) but the configurations are different, then the end-positions are similar.

Sameness or similarity may often be clouded by the effects of reflection, rotation, or reflection-rotation. The effect of reflection may be neutralised in the case of any study; that of rotation, only in P-less studies. To display the sameness or similarity with clarity, these effects should be neutralised wherever possible, with the set positions (and solutions) reorientated as desired.

Within each group the sequence may be chronological, but better would be the ascending order of solution length.

Where EPDs are **similar**, their points of similarity and difference should be discussed in explanatory notes, while still presenting them in a group.

The studies to be so presented, as groups, along with the EPDs for the main line, should have no or negligible supporting variations. In the case of a complex study having different terminations in different lines - such as a stalemate here and a positional draw there - one might cross-refer to another group of EPDs.

## The inverted solution

The full enjoyment of an artistic study depends not only on reaching the climax at the end of the main line, but also on following the invention of moves backwards from the EPD. Connoisseurs, serious solvers and cook-hunters are generally left to their own devices in appreciating

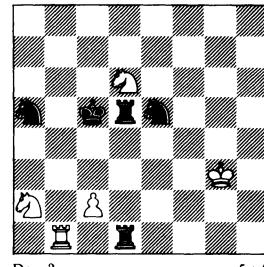

introductory play. As the process of creating introductory play frequently involves un-capturing, even un-casting, un-promoting Qs (and un-underpromoting other pieces) into Ps, pushing Ps away from the queening square, moving the K into check, the sudden dragon's teeth sprouting of pieces that were not there, the sacrificing of pieces that are not on the board... I have devised a modification of the conventional notation for this purpose.

The idea is applicable to all artistic studies. Presenting them with EPD, inverted solution and set position, but sans the composer's solution proper also merits attention.

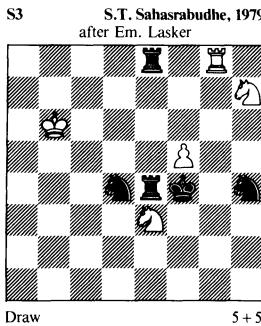

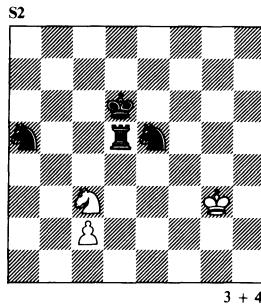

With a collection of studies with EPDs and inverted solutions at his elbow, a solver can set up EPDs, give his imagination free play to look for different departure squares, different pieces, different sequences of moves and orders of moves. He can, on his own, perform the 'Experiment with Barnes' described in TTC.

Some of the points are illustrated with a few examples.

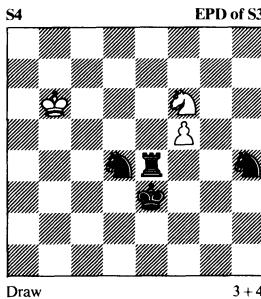

**S1 Position by Em. Lasker**  
(No. 72 in American Chess Art)

The author's claim for a draw by 1. Rb5+ Kxd6 2. Rxd5+ Rxd5 3. Sc3 (see S2) was later found to be wrong: the "horses are Trojan" and give B1 a book win after 3. ..., aSc4 4. Sxd5 Kxd5 5. c3 Ke4.

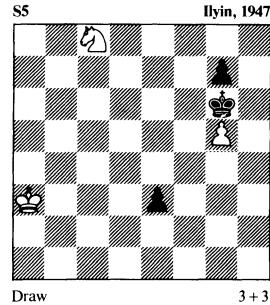

1. Rg4+ Kxe3
2. Rxе4+ Rxе4
3. Sf6 draw.

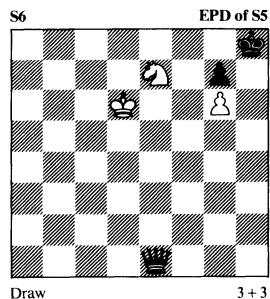

If one could ignore the wP in S2 and S4, the positions are the same. With the P, however, the rotation-effect cannot be neutralised, and the positions are in fact similar.

Let us look at S2 and S4 more closely. In S1 the solution shows that

wPc2 prevents 3. ..., Rd3. But it is the very presence of wPc2 in S2 that gives B1 his win. In S3/4 wPf5 indeed also prevents 3. ..., Re6 (the square e6 corresponding by rotation to d3), but the changed position of the pawn from the 2nd to 5th rank ensures the draw for W. It is thus the rotation effect and change in the position of wP that made the cure possible!

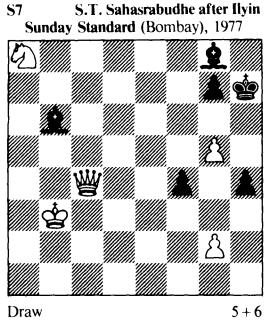

1. Se7+! Kh7!
2. g6+ Kh8
3. Kb4! e2
4. Kc5 e1Q
5. Kd6, and a positional draw.

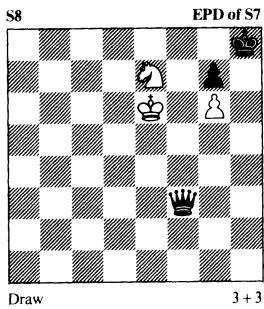

**Inverted solution**  
bPg7 does not move.

1. Kd6-c5 Qe1 = bPe2
2. Kc5-b4 e2-e3
3. Kb4-a3 Kh8-h7
4. g6+ -g5 Kh7-g6
5. Se7+ -c8

S7 S.T. Sahasrabudhe after Ilyin  
Sunday Standard (Bombay), 1977

1. g6+! Kh8
  2. Sxb6 Bxc4+
  3. Kxc4! f3
  4. fg h3
  5. Sd5(c8) h2
  6. Se7 h1Q
  7. Kd5 Qxf3+
  8. Ke6 draw.

EPD of S7

### Inverted solution

bPg7 does not move

- |               |             |
|---------------|-------------|
| 1. Ke6-d5     | QxPf3 + -h1 |
| 2. Kd5-c4     | Qh1 = bPh2  |
| 3. Se7-d5(c8) | h2-h3       |
| 4. Sd5(c8)-b6 | h3-h4       |
| 5. PxPf3-g2   | f3-f4       |
| 6. KxBc4-b3   | BxQc4 + -g8 |
| 7. SxBb6-a8   | Kh8-h7      |
| 8. g6 + -g5.  |             |

**S6** and **S8** are similar. Besides the difference in the length of the introductory play, there is another point of difference between the two positions. **S6** does not give expression to the enriching possibility that bQ can win should she occupy, and stay on, the h3-c8 diagonal, with wKd6. In **S7/8**, the move 8. Kd6? would lose to 8. ..., Qh3(g4)! On the other hand, B1's try by 7. ..., Qh3 (instead of 7. ..., Qxf3 +) fails to win after 8. Kd6! because, having the move, B1 has no way to remain on the diagonal. He has to allow W the draw after 9. Ke6(d7).

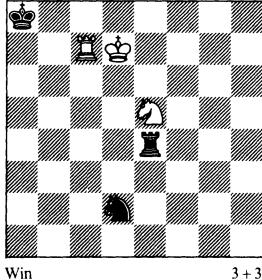

**Reviews** "The Colours of the Chess Spectrum" (in Russian), by An.G. Kuznetsov, 96 pages, 1980. This memorial to the late Boris A. Sakharov (1914-1973) comprises a long illustrated essay, followed by 50 of the best of Sakharov's studies, excellently annotated by the author, who was also a frequent collaborator of Sakharov's. The text reads like a true labour of love.

**Shakhmatnye Okonchaniya**, 2nd edition. Ed. Y. Averbakh, Moscow, 1980. 126 pages, 548 diagrams. This volume deals with B-endings and S-endings, incorporating revisions and corrections.

Regular, but not international, tournaments are: **Bulletin of Central Chess Club of USSR**, Chervony Girnik. These are informal. Other tournaments are irregular, or 'one-off'.

\*C\* denotes, in EG, either an article relating to electronic computers or, when above a diagram, a position generated by computer.

The Chess Endgame Study Circle and EG 4 issues p.a. EG59-62 for 1980 £ 4.00 or \$ 10.00. Calendar year.

How to subscribe:

1. Send money (cheques, dollar bills, International Money Orders) direct to A.J. Roycroft.

Or

2. Arrange for your Bank to transfer your subscription to the credit of: A.J. Roycroft Chess Account, National Westminster Bank Ltd., 21 Lombard St., London EC3P 3AR, England.

Or

3. If you heard about EG through an agent in your country you may, if you prefer, pay direct to him.

New subscribers, donations, changes of address, ideas, special subscription arrangements (if your country's Exchange Control regulations prevent you subscribing directly):

A.J. Roycroft, 17 New Way Road, London England, NW9 6PL.

Editor: A.J. Roycroft.

"Analytical Notes": all analytical queries arising out of studies published in EG should be addressed to: Prof. Neil McKelvie, Dept. of Chemistry, The City College, New York, NY 10031 USA.

"Anticipations", and anticipations service to tourney judges: J.R. Harman, 20 Oakfield Road, Stroud Green, London, England, N4 4NL.

To magazine and study editors: Please arrange to send the complimentary copy of your magazine, marked "EG Exchange", to: C.M. Bent, Black Latches, Inkpen Common, Newbury, Berkshire, England.

THE CHESS ENDGAME STUDY CIRCLE

Next meeting: Friday 9th January, 1981, 6.15 p.m. Adam Sobey will talk about "A Tourney". At: 101 Wigmore Street. (IBM building, behind Selfridge's in Oxford Street).
