July, 1981

---

In December 1979 Alexander Herbstman (b. 1900) left the USSR as a Jewish emigrant accompanied by his wife and daughter. They now live in Sweden. The following article is original to EG and owes its existence not only to its emi-

nent author who has known personally so many of the study world's great Russian and Soviet composers, but also to his daughter Marina, who largely provided the translation, and to the good offices of Alexander Hildebrand.

**MEMORIES OF  
FAMOUS COMPOSERS**  
**by A. Herbstman**

In my childhood I lived for a long time in Switzerland. Weggis is near Lucerne, on the shore of the Vierwaldstätter Lake. It was there that I learned to play chess, but my interest in chess composition came much later when I lived in Moscow, working and studying at a Higher Institute of Literature and Art.

My first studies were composed in 1924. I took them to the *Shakhmaty* editorial staff. A very tall, slim man received me most warmly. It was Nikolay Grekov. Not only did Grekov pay my compositions the utmost attention, but he introduced me to Vasily Platov, then very famous, whom he asked to choose something for publication in the magazine. Platov stopped at one of the studies, the one that I myself thought the best. "To start with we'll publish that one", he said. "And meanwhile, carry on with the good work! ... By the way, do you know the studies of Alexey Troitzky, and have you seen the anthology by me and my brother?" I had to confess that apart from the studies published in *Shakhmaty* during 1923 I knew nothing. Platov whispered something to Grekov, who thereupon took two solid books from the cupboard, saying "These are for you

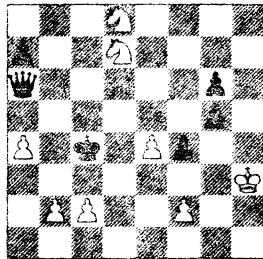

to learn from". After I had taken them I realised that they were indeed the collections of Troitzky and the brothers Platov.

Vasily Platov was of middle height, with brown hair and blue eyes. Later he introduced me to his brother Matvey (ie. Matthew). Matvey looked very like his brother except that his hair was reddish. As I was living in Moscow I met them time and again. In due course I found out that the majority of the ideas in their studies were Vasily's, but they always worked together and the attribution of a diagram was invariably "V. and M. Platov".

Their views on chess aesthetics could be learned from listening to them. Here is one of their pronouncements. "Like any other art form the study has to meet the criteria of form and content. The content is some idea or other expressed either as a combination or as positional play. Perfection of form lies in simplicity of construction. The simpler the introduction the stronger is the effect of highlighting the concealed ideas of the position."

The principal creative problem they saw to be the necessity "to display as fully as possible the struggle of assorted force, in order to show combinations and to reveal the special characteristics of the various pieces, and, with all this, methods of attack and of defence. Studies must have the appearance of a played game".

**H1** V. and M. Platov  
1st Prize, Shakmatnoe Obozrenie, 1911

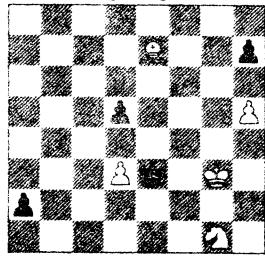

Win 8+6

**H1**

But why is this? Is it because the win is achieved by observing the strictest economy of means? Is it because Black, resisting with great effect, is nonetheless a victim of weaker white force? Or is it perhaps because White endeavours by every means to avoid a draw? Maybe so, but what really enthuses us is that the banal, the ordinary, is defeated by the power of the mind."

The brothers Platov continued working together for more than a quarter of a century.

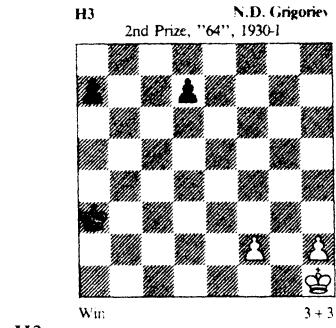

In that same year, 1924, I made the acquaintance of Nikolay Grigoriev, Moscow's chess champion of that time, who was already renowned for his amazing pawn ending positions. We became very close friends. He was five years older than I, having been born in 1895. His father was a violinist, and his grandfather an Armenian priest.

Having to choose between the violin and the chessboard he finally came to the conclusion that he should put chess first. He was not mistaken, for chess brought him world fame.

He was a person of rare appearance, quite tall, elegant, dark-complexioned, with regular features, and hair of the blackest hue. His eyes were also black, and were lively and kind. Over many years he was the head of the chess section of "Izvestiya", playing a major role in the development of chess composition in Russia during that period.

He and I spent the summer of 1925 in the Caucasus, at Nalchik, where

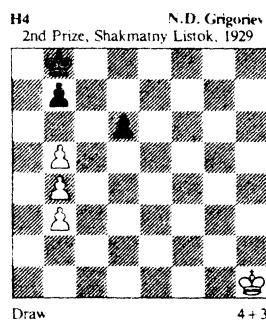

my parents had a country place. In the daytime we went riding in the valleys, while at night we monopolised a chessboard. His compositions were famous not only in Russia, but far beyond its boundaries. For instance when Grigoriev competed in "La Stratégie's" tourney he ran away with every one of the major prizes.

**H3** and **H4** should please all who can tune in to the wavelength of chess beauty. In **H4** the composer consummates two midboard stalemates, as echoes.

Grigoriev created unsurpassed examples of pawn studies, but he also paid attention to other configurations, such as bishops on the same colour, with a single pawn, a theme on which he composed several works. Our friendship lasted until 1938. In the early autumn Nikolay told me that the doctors had diagnosed appendicitis and that he had to go into hospital. I visited him there. One day they forbade me to see him. It turned out that they had operated but that Nikolay had caught an infection which turned septic. At that time medicine was not so advanced. There was no penicillin, and they could not save his life. He was 43 years old. You can imagine my distress.

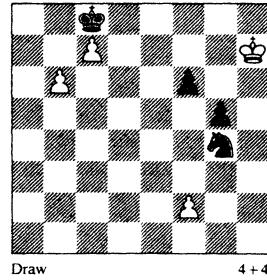

In 1934 I embarked upon a course of post-graduate study in Leningrad. It was there that I made friends with our greatest composers, Alexey Troitzky and Leonid Kubbel.

Troitzky was a forest warden in the backwoods. He was 68 in the year I moved to Leningrad, and that was when he came to live there too. It was the time when he prepared his collection of studies to be published. He was alone, and I helped him to check and annotate them. His ideas were fresh, but

because he had spent most of his life in out-of-the-way places his themes became known to the chess world only later, and often when worked up by other composers. Examples of this are: piece struggles, domination, systematic manoeuvres, stalemate, mate, underpromotion. All these were worked on by Troitzky much earlier than by other composers. In his theoretical articles the technique of the art of contemporary study composition is exhaustively expounded.

On the outbreak of war (ie, in 1941, when German forces invaded the USSR, not the earlier September 1939 date familiar to Britain and France. AJR) the threat to Leningrad became very real. I hurried to Alexey and tried to persuade him to leave with me. He rejected the idea. He died of starvation during the long blockade.

5. Kg4 g2
6. Kh3 g1B
7. Kg2, or
6. .... g1Q(R) stalemate.

**H5** is one of Troitzky's first endgame studies. **H6** was published in 1925, and shows a most ambitious theme: underpromotion to two minor pieces combi-

ned with the ending two knights against pawn. It is expressed here in classically simple form with lively, double-edged play.

Having failed to rescue Troitzky I then telephoned Kubbel, asking him to help me with my suitcases to the railway station. He agreed. On the way to the train I already knew (Herbstman was a major in the Soviet Army. AJR) that that train was the last to leave Leningrad, and that there was grave doubt whether it would get past Bologoye, a station on the route to Moscow, as it was invested by the Germans. Leonid helped me with the baggage and we found ourselves alone in a compartment. I locked the door and announced that I would not let him out, because he would die if he remained in Leningrad. In a few days the German forces would be there. He began to make objections, saying that he could not leave his brothers behind just like that. He wished me a

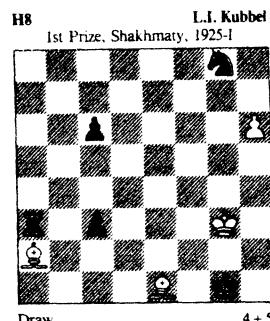

good trip, and a safe one, and descended to the platform. The train moved off. I never saw him again. All three brothers died in the siege, just as Alexey Troitzky died. (Ex-Leningrader Alexander Sarychev told me when I was in Baku that there were no gravestones to the memory of the two great composers. "There aren't any gravestones. There were so many bodies that bulldozers had to be used to pile them into mass graves..." AJR).

It is hard to select one study from Kubbels legacy, so remarkable are absolutely all of them! (**H7** and **H8**).

My friendship with Nikolay Grigoriev and the most cordial relations with Vasily Piatov, Alexey Troitzky and Leonid Kubbels contributed enormously to my development as a chess composer. It was their guidance that enabled me to work out ideas, to polish them, and to eliminate flaws.

 viii) There are duals after other moves, so we may consider this move as "dual avoidance".  
 10. ..., Qd5 11. Be2+ Ka5 12. Qa3+ Kb5 13. Bd3+ or 13. Ba4+ Ke4 14. Bb3+: - 10. ..., Qf(h)3 11. Be2+ Ka5 12. Qb6 mate or 11. Qc2+ Kb4 12. Qc4+ k- 13. Qc3+  
 ix) 12. Qc3+ Kb5 13. Bd3+ Ka4 14. Be4(f5) Qf4.

P.S.: I forgot to point out that my 'variation' on the Kozirev is a 'locus unicum'. This is obvious, of course, for Bg6, Pa6 and Pg3. Now bK has to block his B to prevent the drawing 1. ..., Bb5, and bK having to be on the e-file, the only square for b8 is behind the K, i.e. on f1. Nor can wK be on d7, for this would allow for the minor 2. Kc6 Bd7+.

No. 4310: P.C. Wason, a Londoner who has not composed much, but who certainly came up with a puzzler here. Players find this difficult to solve.  
 1. Bf5/i Rg6/ii 2. Be4/iii Rh6+/iv 3. Kg7 Rg6+ 4. Bxg6 fg 5. Kh7 g5 6. f5 g4 7. f6 g3/v 8. f7 g2 9. f8Q glQ 10. Qh6 mate.

- i) 2. ..., Bc5 3. Be5+ and 4. Sxc5.
- ii) 3. ..., e5 4. Bg3 Bc5 5. Se6+ Kc4 6. Bf1+ Kb4 7. Bf1 Ka4+ 8. Sxc5+.
- iii) 5. ..., Kb4 6. Bd2+ and 6. Sxc5.

The reason that none of these studies was originally published early in 1979, and many were published only in 1980, is that the KNSB runs its tournament on the basis of when entries are received. Due to pressure on space, many entries received in 1979 are published only in 1980.

12 studies not in the actual award were nevertheless specially mentioned as being of excellent quality. We reprint them below.

No. 4359 J. Vandiest  
Schakend Nederland, ix.79)

No. 4359: J. Vandiest. 1. Se8+/i Kg6/ii 2. Ke5+/iii Kf7/iv 3. Sd6+/v Kg7/vi 4. Sf5+ Kf8 5. Qf6+ Ke8 6. Sd6+ Kd7 7. Qe6+ Kc7 8. Qc8+ Kb6 9. Qb8+ Ka6 10. Qb5+ Ka7 11. Qa5+ Kb8 12. Qd8+ Ka7 13.
