

AUTHORSHIP AND ATTRIBUTION IN CHESS COMPOSITIONS
by Alexander Hildebrand, Sweden.

(This article's contents apply to all branches of composition, but the examples are taken from the studies field).

What is plagiarism and what is adaptation? What is development of a theme and what is mere mastication or dilution of an idea? When is a composer justified in calling a composition with a "borrowed" theme his own and publishing it under his own name? When should one put "after NN" in the superscription?

The composer, and not only the inexperienced one, is often faced with these questions. There are excellent and respected authors who consider themselves morally justified in re-siting a pawn in the composition of another composer and then publishing the work under their own names. Is the original composer supposed to tolerate this act of theft? How should tourney judges regard such phenomena?

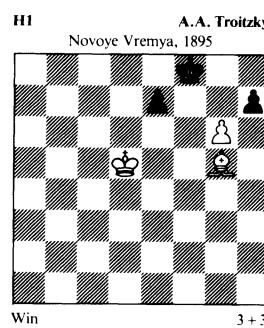

The aim of this article is to bring some clarity into this subject and to prompt discussion. The point of view brought forward here is, it goes without saying, my own personal point of view.

New ideas do not grow on trees, not today. The majority of ideas and themes handled by contemporary composers are already expressed in one way or another. It is through association that we stumble across new "idea impulses" and "combined themes" when we examine the works

of other authors. With the aid of our powers of imagination and creativity we hunt for new variations, forms, conglomerate ideas and so on. But, to insist upon the point, for the most part the paths we are on have already been well trodden. There is no sin in this, even when we are fully conscious of the fact. The problem is simply to know where to draw the line. That is, to know what is permissible and what is not, because it is a question of ethical behaviour, not of hard-and-fast rules. Let us take some examples.

THEME WITH VARIATIONS

It was in the year 1895 that Aleksey Troitzky (1866-1942), one of the pioneers of the modern study, discovered the **H1** mating position with a lone bishop against two pawns. The solution: 1. **Bh6+** **Kg8** 2. **g7 Kf7** 3. **g8Q + Kxg8** 4. **Ke6 Kh8** 5. **Kf7 e5** 6. **Bg7 mate**. The final position, achieved by dint of zugzwang, is of course a beautiful find. Then, 14 years later,

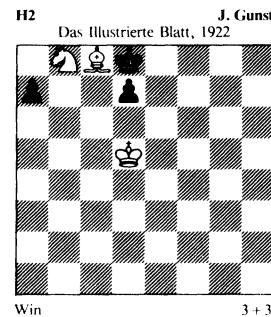

Troitzky himself published in **Niva** (St. Petersburg newspaper, 1909) a new version of the idea, in the following form: wKd7 wRb5 wBg5; bKf8 bRg8 bPe7, h7 - Win. The solution: 1. Bh6+ Kf7 2. Rf5+ Kg6 3. Rg5+ Kf7 4. Rxg8 Kxg8 5. Ke6 Kh8 6. Kf7 and 7. Bg7 mate. One may well ask why the composer published this study at all. It is less economical and as regards the solution less elegant by far than his 1895 work. Of course the composer is free to do what he wishes with his own output, giving it assorted configurations and variations, even if as here these are superfluous, as the second thematic version is clearly weaker than the first. However, it was not only the composer who concerned himself with this idea. Thus it was that in 1939 the following studies with the same idea were published. We give them in notation only.

J. Ohman, Revista Romana de Sah, 1939: wKf7 wBe7, c2 wPc7; bKc8 bBc3 bPa7, d7 - Win. The solution: 1. Bd6 Ba5 2. Bd3 Bxc7 3. Ba6+ Kb8 4. Ke7 Bxd6+ 5. Kxd6 etc. This study, published without even "after Troitzky" as acknowledgement, has scarcely any right to exist. It has an inferior form, and offers absolutely nothing new when compared with Troitzky's piece of 1895.

U. Gandolfi, L'Italia Scacchistica, 1939: wKe4 wBf8 wSf2 wPg7; bKg8 bRh8 bSe2 bPe6, e7, h6, h7 - Win. The solution: 1. Sg4 Sg3+ 2. Ke5 Sf5 3. Sxh6+ Sxh6 4. ghQ(R)+ Kxh8 5. Bxh6 Kg8 6. Kxe6 etc. Compared to Troitzky, this is a monster! The construction is horrible; a chained king and a walled-in rook that does not play. The introductory play is worthless and without finesse. After the first move mate in 1 threatened! Afterwards there is a slaughter of several "spectators". Here too the

composer (maybe this was a good thing!) omitted to mention "after Troitzky". I mean good for Troitzky for the present study could hardly give a good impression to anyone who did not already know Troitzky's studies on this theme.

In 1947 the present writer published this version of the Troitzky theme: **A. Hildebrand** (Skakbladet, 1947), "after Troitzky": wKd8 wBc1, d7; bKf8 bBh5 bPe7, h7 - Win. 1. Bh6+ Kg8 2. Be6+ Bf7 (Kh8; Kxe7; Bf7; Kf8) 3. Kd7 etc. I now consider this study as a youthful peccadillo, as I was at that time a mere beginner in composing. This version also adds nothing new to the Troitzky theme and were better forgotten. It does have nevertheless the form of a miniature, and the attribution is more accurate as it carries the appended wordt "after Troitzky". Perhaps that was right and proper. The question however is whether it would have been more correct to describe it as a study by Troitzky with the label "version by A. Hildebrand". Which is more appropriate must remain a matter of personal evaluation.

The following **H2** study, also on the Troitzky theme, is something quite different. The solution: 1. Bb7, 1. Ba6? leads to a draw after 1. ..., Kc7 2. Kc5 d6+ 3. Kd5 Kxb8 4. Kxd6

Ka8, or 4. Kc6 d5. 1. ..., Kc7 2. Ba6 Kxb8 3. Kd6 Ka8 4. Kc7 d5 5. Bb7 mate. Indeed the Troitzky theme again, but in a quite independent form. The solution is enriched by a manoeuvre to lose a tempo, making a new and fresh impression. The study by the talented Finnish composer Julius Gunst needs no "after Troitzky" annotation. Even the famous Leonid Kubbel concerned himself with the theme. He gives us full details in his "250 Selected Studies". In his commentary to the study, published in **Shakmatny Listok** in 1929, he supplies the original Troitzky study and remarks that he, Kubbel, has always been fascinated by the theme. Kubbel's study has the following form: wKb5 wBa6, e5 wSc6; bKd5 bBf8 bPa7, d7 - Win. Solution: 1. Sb8 Bd6 2. Bxd6 Kxd6 3. Kc4 Kc7 4. Kd5 Kxb8 5. Kd6 Ka8 6. Kc7 and 7. Bb7 mate. As we can see, the struggle in this expression acquires intensity. The play is active, and wK participates in a witty persecution of his opposite number. This is what gives Kubbel's study its own right to exist, so that the appendage "after Troitzky" is superfluous. To this we may add Kubbel's further comment, that in fact he started, not from the work of Troitzky, but from the work of Gunst.

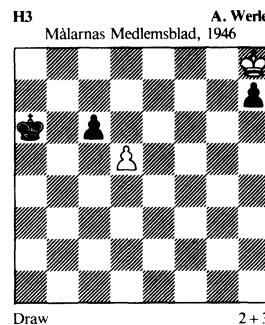

RIGHT AND WRONG

So we have the following possibilities when contemplating the publication of studies with themes that are already known.

1. **Under the composer's own name**, when the theme is varied in an original manner, or with a **significant** (!) improvement in construction.
2. **Under the composer's own name with the subscript "after NN"**, when the alteration (or alterations)

to the theme or construction by comparison with the original are clear, but small.

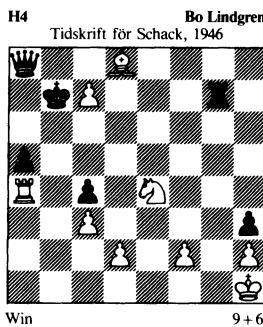

3. **Under the names of both composers**, as is done with collective, or joint, compositions. However, if it is **not** a joint composition, but only an improvement on another composer's work, then it is **mandatory** to obtain the permission of the other composer before publishing it under the two names (for example, Lindgren and Hildebrand).
4. **Under the name of the original composer**, with a subscript, as for example: A. Troitzky (version by A. Hildebrand).
5. As 4, but with the subscript "correction by NN".

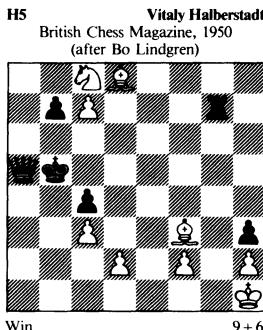

Let us consider **H3** as an example. We can see that we have to do with the famous Réti theme. What then has A. Werle added to vary this much worked on theme? Really not much. After 1. dc a5 we have the Réti position. The point here is the temptation 1. d6?, and nothing more. Thus it is a mere pitfall for the solver. Which of the above 5 possibilities would you, worthy reader, recommend for this case?

In my view it is No. 4 that is applicable. Or are we so generous that we can accept No. 2? This is naturally a

matter of judgement. However, I think that this version is not sufficiently distinct for No. 2 to be invoked.

Inadmissible is in my opinion an occurrence like the following. In 1946 Bo Lindgren published **H4**, a study with the all-4-promotions ("Allumwandlung") theme. The intended solutions: 1. Rxa5 Qxa5 2. Sd6+ Ka8 3. c8R+ and so on. If 2. ..., Ka6 3. c8B+. If 2. ..., Ka7 3. c8S+. If 2. ..., Kc6 3. c8Q+. However, the study was shown later to be defective.

Then, 4 years later, V. Halberstadt published the following study (**H5**). Here the solution runs: 1. Sd6+ Ka6 2. Bxb7+ Ka7 3. Sc8+ Kxb7 4. Sd6+ and so on, as in **H4**. Halberstadt was an extremely skilled and highly regarded composer. But in my view he has behaved incorrectly here.

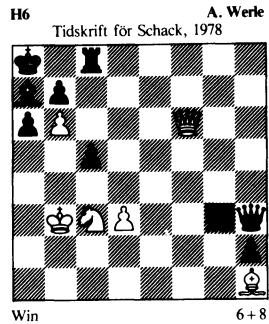

The study is, and remains, a study by Bo Lindgren. Halberstadt ought therefore to have weighed up the following alternatives, in order to be above reproach.

1. To publish the study under the name of Bo Lindgren with the subscript either "version by V. Halberstadt", or "correction by V. Halberstadt".
2. Make contact with Bo Lindgren and propose the new version under the names of both composers.

What is the opinion of readers? Naturally, the situation is different if one is innocently unaware of any anticipation. In such a case one speaks only of "an accident at work".

GREATER STRICTNESS IN TOURNEYS

Composers taking part in tournaments and intending to enter with adaptations of unoriginal ideas must be especially careful. They should specifically draw the attention of the judge to the earlier study, to facilitate comparison. This must apply to cases where there may be doubt about the originality of the entry. This is what A. Werle did, to take an example, when he sent **H6** in for the 1968 annual informal tournament of *Tidskrift för Schack*. The solution: 1. Qe7 Rb8 2. ba Kxa7 3. Qxc5+ Ka8 4. Qb6 Qxd3 5. Bg2 h1Q 6. Bxh1 Qf1 7. Bd5 Qd3 (a1) 8. Bg2 wins. Werle supplied the information that he had reworked an idea of N. Rossolimo published in 1931, namely: wKg2 wQe6 wBa1 wSf3; bKh7 bQb4 bRf8 bPg7, h6. The solution: 1. Qd7 Rg8 2. Qf5+ Kh8 3. Qg6 Qf4 4. Kf2 Qc1 5. Bd4 Qh1 6. Bb2 Qh3 7. Kg1 wins. Werle's study was accepted as an independent study on the Rossolimo theme for the purposes of the tournament.

There is much more that could be added, but the restricted article length does not allow this. It is therefore no more than an attempt to initiate a broader discussion of what is and is not admissible when publishing compositions with known anticipations of various degrees and kinds.

FIDE of this last bit is excessively verbose, to cover W and Bl, a-file and h-file, and the square-colour of the B.)

This may seem to complicate the realm of studies, where many very clever compositions depend on the 50-move rule. However, there is another point of view, which I hold, namely that in studies there is no "game", there are no "players", and hence there can be no "claim" and no "commencement to a game". Hence, this view holds, the 50-move rules does not apply to studies, and solutions should proceed as if no such rule exists. But studies and the game have a common interest in endgame theory and all related discoveries.

AIR

THE LAWS OF CHESS

FIDE has amended Article 12.4 to read as follows, the single paragraph replacing the first 2 paragraphs of the existing Article.

"... when a player having the move claims a draw and demonstrates that at least 50 last consecutive moves have been made by each side without the capture of any piece nor the move of any pawn. This number of 50 moves can be increased for certain positions, provided that this increase in number and these positions have been clearly established in the Laws of Chess before the commencement of the game." The "2 Ss vs. P" paragraph is now classified as FIDE Interpretation 12.4 (1978). A new Interpretation 12.4 (1982) reads: "In endings consisting of king, rook and pawn versus king, bishop and pawn" (ie, GBR class **0130.11**) the 50-move rule will be extended to 100 moves if wPa2 and bPa3 and bB on black squares, or any equivalent configuration. (Note: the actual wording by

REVIEWS

Practical Rook Endings, by Edmar Mednis, 72 pages, Coraopolis (USA), 1982. There are only 2 studies here, incidental to the main purpose, namely to teach R-endings via principles, plans and examples, with copious text. Excellent.

De Wetten van het Eindspel, by N.V. Krogius, 70 pages, Amsterdam, in Dutch from original Russian, 1973. Just 5 studies here, where the aim is to help the player build on elementary knowledge to give him techniques in a wide (over-ambitious for such a small book?) variety of endgames.

Vom Mittelspiel ins Endspiel, by Vladimir Budde, 124 pages, J. Beyer Verlag, Hollfeld (W. Germany), 1982. No studies, just 32 well-chosen games illustrating various themes of exchanging into an endgame.

Pawns in Action, by A. Sokolsky, 86 pages, "The Chess Player", Nottingham, 1976 (translated into English). There is some endgame, but no study, material here. The reader is invited to consider aspects of pawn play in positions where most players might not consider the pawns at all.

Kunstschaach in der Schweiz, by Hans Henneberger, 154 pages, Lucerne, 1980, in German. This handsome anthology announces that it contains chess problems and studies of Swiss composers for the years 1966-1976. However, the 29 studies range wide of these dates. Fontana (7), M. Henneberger (7), Isenegger (7), Issler (1), Naef (7) are the enticing representatives.

Richtig und Falsch, by K. Richter and H. Staudte, 84 pages, 129 diagrams, 1978 (2nd edition), de Gruyter. Many endgames in this revision, but no studies -- they appear to have been deliberately expurgated on account of suspect soundness, although the book's title ("Right and Wrong") might have justified their retention?

Skladatel'ske Sutaze 1975-1979, Bratislava, 1981, 40 pages. Along with problem tourney awards for the period is the **Richard Réti Memorial** event for studies (EG70 Nos 4704-4710). Slovak tourneys only. 122 compositions.

Advances in Computer Chess 3, ed. M.R.B. Clarke, Pergamon Press, Oxford, 1982, 182 pages. The contents are 13 papers delivered at an international conference held in London in iv.81. 2 have importance for the endgame. Alan Shapiro and Tim Niblett presented 'Automatic Induction of Classification Rules for a Chess Endgame', a paper showing how communication between a chess-player and a computer for purposes

of 'teaching' the computer an endgame could be greatly speeded up by using certain techniques. Max Braemer's 'Machine-Aided Refinement of Correct Strategies for the Endgame' describes an iterative procedure for producing correct algorithms (for playing simple endgames). Naturally, only certain 3-man endings are treated in the papers (GBR classes: **0.10**, **0100** and **1000**). Very different is Alden and Braemer's 'Development of a Program for Solving Retrograde Analysis Chess Problem', breaking entirely new ground, even if of minimal value for the endgame.

Six Hundred Endings, by Portisch and Sárközy, Pergamon Press, Oxford, 1981, 198 pages. This is an English translation of the original Hungarian work already reviewed in EG. It is a pleasantly laid out treatise on the whole practical endgame field, with many examples of studies and games -- all in the English descriptive notation. Curiously, the games are given dated sources, the studies not.

Kevébábos Magyar Feladványok, Budapest, 1982, 320 pages, 840 diagrams. 26 miniatures and 45 others are studies in this anthology of Hungarian compositions of all sorts, from the 19th and 20th Centuries.

"Zamechatelnye Etyudy" (Superb Studies), by G.M. Kasparyan, Erevan 1982, 328 pages, 1062 diagrams. With 287 composers represented this is truly a labour of love by Kasparyan, no doubt relaxing from his classifying labours (when he is not continuing to compose!). The anthology has no chapters, making it ideal to browse in, provided that one takes care when turning the flimsy pages and keeps patience with the sometimes murky diagrams. Given that the selection is made from many styles, with different standards, out of assorted cultu-

res even in quite distinct epochs, what unifies them? The author gives his answer: originality of thought, a worthy finishing touch, vividness of the idea. ...And printed, a Westerner notes with envy, in 20.000 copies.

"The Best Endings of Capablanca and Fischer", under the general heading of "Classification of Chess Endings", Chess Informant, Belgrade, 1978, 136 pages, apparently edited by A. Matanovic.

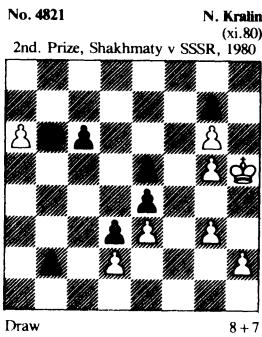

The book comprises the positions, moves, and some supporting analyses, of 204 endings played (or, in Capablanca's case, devised) by the two great players. All right. But what is this "classification" business? Let me quote from the preface: "All endgames are classified into four groups: PAWN ENDINGS, QUEEN ENDINGS, ROOK ENDINGS and MINOR PIECE ENDINGS. The strongest piece in a given position (except for the K) determines the group to which an endgame belongs. Further classification within these groups is done by process of elimination - the basis of the entire system

of information in chess -- developing from simple to more complex forms." Is everything clear now? Well, perhaps the succeeding pages will help: pages 11 to 64 (sic!) list what purport to be codes, accompanied by symbols (which mean "doubled pawns" or "pair of bishops", etc.). And the diagrams themselves are accompanied by the codes, sometimes with unexplained letter-suffixes. It seems that a "classification" comprises a piece-symbol, one or two digits, a "/" and sometimes a letter. Give me the GBR code any day!

"Encyclopedia of Chess Endings" (Belgrade, 1982, by Chess Informant, 384 pages, 1610 pawns-only diagrams) is apparently the first of five volumes of this classificatory exercise that employs a system that seems foreign to the material. There are numerous studies, indexes of players and composers, and the whole hard-cover volume is a pleasure to handle. What I do not yet know is what I shall use it for.

AJR

DIAGRAMS AND SOLUTIONS

No. 4821: N. Kralin.
1. a7/i Kxa7 2. g4 b1S (b1Q;h4 and stalemate) 3. h3/ii Sc3 4. h4 Kb7/iii

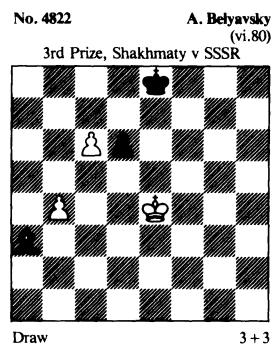

5. dc d2 6. c4 d1Q 7. c5/iv Qd4 8. ed e3 9. d5/v e2 10. d6/vi e1S/vii 11. d7 Sd3/viii 12. d8S +/ix K- 13. Se6 and the threat of Sxg7 forces B1 to give stalemate by 13. ..., Sf4 + 14. Sxf4 ef.

i) Not 1. g4? b1Q 2. a7 Qh1 3. h4 Qxh4 + 4. Kxh4 Kxa7. Why, however not 1. h4? The answer comes much later.

ii) This is the beginning of the answer. The square a7 is the best one for bK. It will win. So W loses a tempo, simply to force bK to move to some other square. That is, the position after 4. h4 is one of reciprocal zugzwang. (This explains 3. ..., Sc3; as B1 refrains from moving bK for as long as possible.)

iii) In the distant future W will promote, on c8 or d8 or e8. B1 tries to cope with all these possibilities. But the a7 square was the only one that would have succeeded.
 iv) This would have been an instantly drawing check had bK been on b6.
 v) 9. de? e2 10. e6 e1S and 12. ..., Sf4 mate.
 vi) 10. dc+? Kc8 11. c7 e1Q 12. c6 Qxh4+ 13. Kxh4 Kxc7 14. Kg3 Kxc6 15. Kf3 Kd5 and wins the (pawn-minus!) P-endgame by capturing all the gP's in exchange for eP, being careful that after wK eventually plays wKxbPe3 bK can play Kg6-g5. Had bK stood on a6 then 10. ..., Kc8 would have been impossible, and after 10. dc B1 would have to choose between 10. ..., e1Q 11. c7, when neither 11. ..., Kb7 12. c6+ Kc8 (or xc7) stalemate, nor 11. ..., Qxh4+ 12. Kxh4 Kxc7 13. Kg3 Kc6 14. Kf3 is to be recommended (W wins in this last line), and 10. ..., e1S 11. c7, when 11. ..., Sd3 is met (this is the very remote "point" about the square a6 for bK) by 12. c8Q with check.
 vii) 10. ..., e1Q 11. d7 and bK is out of range, so bQ must cover d8, with stalemate.
 viii) Showing why bK avoided the 8th rank. bS threatens mate on f4.
 ix) But this shows the final point of the original zugzwang: W promotes to S, with check, and gains the tempo to cover f4.
 "A multi-P study with long-distance and precisely calculated play by both sides that is a great pleasure to observe, with B1 promoting twice to bS, and W countering with precisely the same promotion, and that basic zugzwang that encompasses the whole breadth of the board from a-file to h-file!"

No. 4822: A. Belyavsky.
 1. b5 Bc5 (else b6) 2. Kd5 Ke7 (for Bb6;) 3. c7 Kd7 4. b6/i Ba3 5. Kc4/ii Kc8 6. Kd5/iii Kb7 7. Ke6 (for Kd7)

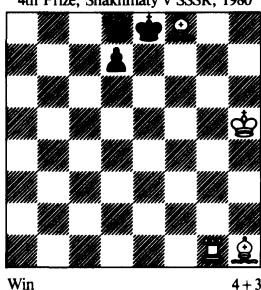

Kc8 8. Kd5 Kd7 9. Kc4/iv Bc1 10. Kb5 Be3 11. Ka6 Kc8 12. Ka7 d5/v 13. Ka8 Bxb6 stalemate.
 i) Clearly wP is safe, for 4. ..., Bxb6 5. c8Q+ Kxc8 6. Kxd6 drawn. But the move actually puts B1 into zugzwang: if bK were forced away from d5 (by having the move in this position) then bBxb6 would win.
 ii) And not 5. Kd4? Bc1 6. Ke4/iv Bd2 7. Kd5 Bf4 8. Ke4 Bh2 9. Kd5 (Kf3, Bg1; wins) Bg3 10. Ke4 Bf2 (to take on b6 while wK does not attack bPd6) 11. Kd5 Bc5.
 iii) And another "not": 6. Kb5? Kb7 7. Kc4 Bc1 8. Kd5 Bf4 9. Ke6 Kc8 10. Ke7 (to avoid sideline (ii)) 10. ..., d5 11. Ke6 d4 12. Kd5 d3 13. Kc6 Bxc7.
 iv) The position is now repeated, so B1 tries what succeeded in other variations -- playing bB over to the K-side, where is more space to manoeuvre. What could be the disadvantage here?
 v) bK had to play to c8 to prevent wKb7, and now bB wins wPb6. All is in order for dP to advance. 12. ..., Bxb6+ 13. Kxb6 d5 has no point.
 vi) 6. Kc4 Be3 7. Kb5 d5 8. Ka6 Kc8 9. Ka7 Bxb6+ and wins, as B1 is a vital tempo ahead of the main line.
 "To start with no one would think that wK, after clever manoeuvring to avoid clever zugzwang pitfalls, would stalemate himself on the apparently inaccessible square a8. The 'opening' of the author on the pages of **Shakhmaty v SSSR** was successful, and

it remains to hope for an equally promising 'middle game'." (Korolkov means that we want to hear more from this composer.)

No. 4823

i) 3. Kxg6? Rf8 4. Se5 de 5. Kxg7 Rh8 6. Kxh8 Kf8, and a draw only.
 ii) 9. Kxe5? e6 and zugzwang operates against W.

Comparing this with Troitzky (116 in TTC) Korolkov points out that the tempo play is similar, but with the mate being by wS in the Mamatiliev and by wB in the Troitzky. He also observes that the recent study has a romantic setting, the older one a classical.

No. 4832 S. Belokon
(iii.80 and ii.82)
4 Comm., Shakhmaty v SSSR, 1980

No. 4832: S. Belokon.
 1. b7 Rd2+ 2. Kb1 aRx a2 3. b8Q dRb2+ 4. Kc1 Rc2+ 5. Kb1 aRb2+ 6. Ka1 Kd1 7. Qb3 Rxb3 stalemate, but not 7. Qd6+? Rd2 8. Qa3 Ra2+ 9. Kb1 dRb2+ wins.
 "A simple garland of stalemates and a pleasant thematic try."

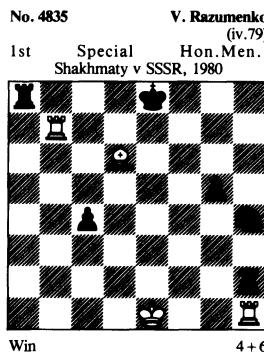

No. 4833: L. Katsnelson. 1. g7 Rg8 2. Rxh3 Be1/i 3. Bb8 (for Rh8) Bc3 4. Rxс3 Rxh8 (Rxg7; Rc8 mate) 5. Rh3 Kd8 6. b6 and now there really is no defence against wRh8.

i) 2. ..., 0-0-0 3. Rc3 is mate. Now, however, castling is a threat, and 3. Bc7? is met by 3., Bc3.
 "The normal way to prevent castling is to give check or to control the intervening square. Here, however, it is bR that is impeded. A fresh thought, works on us very well, and excellently executed."

This special prize was for the most original study.

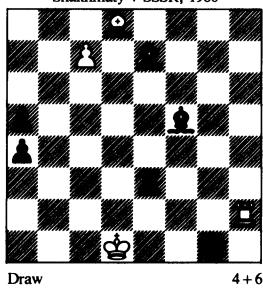

This special prize was for an "ultra-miniature", that is, one with 4 men.

immature", that is, one with 4 men.

"W castles short and B1 castles long, presented with unity and economy". This special prize was for an example of double castling.

The composer's article in which this study appeared as an original proposed a classification of castling studies based on the presence or absence of castling in the solution. If castling occurs, then naturally there are three possibilities: W castles, B1 castles, both castle; if castling does not occur, there are two possibilities: prevention in the course of the solution; demonstration of illegality by retrograde analysis. As the author's examples show, this classification is no restriction on ingenuity in devising reasons for castling -- indeed, his article led to the 10th Thematic Tourney of the magazine.

No. 4836 M. Matous
xi.80 and iii.81)
2nd Special Hon.Men.,
Shakhmaty v SSSR, 1980

No. 4876 Rolf Richter
 1st Prize, Tungsram Tourney
 (Hungary), 1980

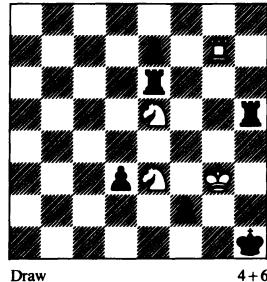

No. 4876: R. Richter (East Germany)
 The 60 entries were judged by Gia Nadareishvili of Tbilisi (USSR), who remarks that the standard was satisfactory. "Tungsram" is the United Incandescent Lamp and Electrical Company, who shared the sponsorship with the Hungarian Chess Federation. The 4 prize-winners were published in Magyar Sakkélet (v.81), but the complete award (including 3 non-studies sections) appeared in a smart brochure, in English but undated, received by AJR in vi.82.

1. Sf6/i Bg3/ii 2. Sg4 (Bg4? Be5;) 2. ..., Bf3/iii 3. gSe3 Be2 4. Kc6/iv d4 5. Bg4/v d3 6. Kd7 Kf8/vi 7. Bd4/vii Bf4 8. Be6/viii Bxe3 9. Bxe3 Bxd1 10. Bh6 mate.
- i) As 1. ..., Bf3 is now to be met by 2. Bg4, B1 must activate bBe1.
- ii) 1. ..., Bh4 2. Sg4 Kg8 3. Bb2 Bf3 4. gSe3 d4 5. Be6 Kf8 6. Bxd4 Bg5 7. Bb3.
- iii) 2. ..., d4 3. Bf5 Bf3 4. Sh6 and 5. Bg4.
- iv) 4. Kb4? d4 5. Bg4 Bd6 6. Kb3 d3 7. Bc3 Bf4.
- v) 5. Bxd4? Bf4 6. Bg4 Bxe3.
- vi) To avoid being checked. If 6. ..., Bf4 7. Be6 Kg6 8. Bb3.
- vii) There is a trap to avoid: 7. Be6? Bxd1 8. Sxd1 Be5 9. Bxe5 is stalemate.
- viii) Now W can meet 8. ..., Bxd1 9. Sxd1 Be5 with 10. Bc5.

No. 4877 A. Botokanov

2nd Prize, Tungsram 1980

Draw 4+6

No. 4877: A. Botokanov. The most logical move seems to be 1. Kxf2?, but then follows 1. ..., Rh2 2. Kf1 Rf6 3. Ke1 d2+ 4. Kd1 Rb6 with a win for B1. Neither does 1. S5g4? suffice, because of 1. ..., Kg1 2. Kf3 Rh3+. After the actual keymove 1. Sf3, there are two lines:
 i) 1. ..., Rh2 2. Sxh2 Rxe3+ 3. Kxf2 Re2 4. Kf1 Kxh2 5. Rg8 e5/i 6. Rd8 Re3/ii 7. Kf2 Re2/iii 8. Kf1 Rd2 9. Ke1/iv Re2+ 10. Kf1 draw, Or 1. ..., Rxe3 2. Kxf2 Rxf3 3. Kxf3 d2/v 4. Ke2 Rd5 5. Kd1 e5 (e6; Rg6) 6. Rg5 Kh2 7. Rg4 Kh3 (Rd8; Re4) 8. Rg5 Kh2 (Kh4; Rg2) 9. Rg4 drawn.
 ii) 5. ..., Kh3 6. Rd8 Re3 7. Kf2.
 iii) 6. ..., e4 7. Rxd3 ed is stalemate.
 iv) 7. ..., Rg3 8. Rh8 Rh3 9. Rg8 Rh7 10. Rg2 Kh3 11. Rg3+..
 v) 9. Re8? Kg3 10. Rxe5 Kf3.
 vi) 3. ..., e5 4. Rg4 Rh3 5. Kf2 Rh2 6. Kf1 Rh8 7. Re4.

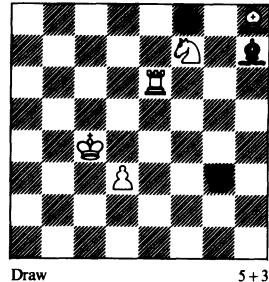

"The study shows the struggle, in two variations, of wR vs. bRPP, with stalemates that are unusual with this force. In addition, there is practical value for over-the-board play".

No. 4878: V. Nestorescu.

1. Se5 is obvious, as after 1. Sh6? Bg6 wins as wSh6 is soon lost. But what if now 1. ..., Bg8 2. Sd7+ Kf7, when 3. Sc5 draws? So B1 plays 1. ..., Qg8. There follows 2. Kd5/i Qxh8 (else 3. Sd7+) 3. Rf6+ Ke8 4. Re6+ Kf8 5. Rf6+ Kg7 6. Rf7+ Kh6. The

No. 4878 V. Nestorescu

3rd Prize, Tungsram 1980

Draw 5+3

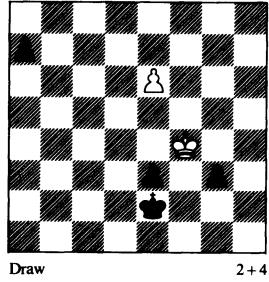

alternative 6. ..., Kg8 is refuted 7. Rf4, but not by 7. Rb7? Qf6 8. Rb8 Kg7 9. Rb7 Kh8, and not by 7. Ke6? Bxd3. 7. Rf6+ Kh5 8. Rh6+, with a draw.

i) 2. Sd7+? Kf7 3. Kd5 Qxh8 4. Se5+ Kg7 5. Re7+ Kf6.

"The repeated sacrifices and wR's perpetual check made an agreeable impression."

No. 4879 A. Koranyi

4th Prize, Tungsram 1980

Draw 2+4

No. 4879: A. Koranyi.

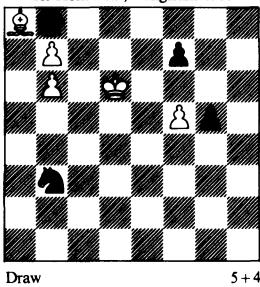

The introduction is clear, given that the P-endgame is hopeless for W after 1. Kxg3? Kd2 2. e7 e2 3. e8Q e1Q+. Therefore: 1. e7 g2 2. e8Q g1Q. At this point tempting is 3. Qb5+? Kf2 4. Qb2 e2 5. Qd4+ Kf1 6. Qa1+ e1Q 7. Qa6+ Qe2 8. Qa1+ Kg2 9. Qg7+ Kh1 10. Qb7+ eQg2 and will win. The situation is quite different after the right continuation: 3. Qh5+ Ke1 4. Qa5+ Kf2 5. Qa2+ e2 6. Qxa7+ Kf1 7. Qa1+

e1Q 8. Qa6+ Kf2. If 8. ..., Kg2 9. Qc6+ Kh3 10. Qd7+. In the try shown at move 3 Bl had the defence 8. ..., Qf2; but now the disappearance of bPa7 makes 9. Qa1+ Kg2 10. Qa8+ possible. 9. **Qa2+ Qe2 10. Qa7+ Kf1 11. Qa1+ Kg2 12. Qa8+ Kh3 13. Qh8+** draws.

"The successfull defence of wQ vs. bQQ has some theoretical importance".

Note by AJR: Michael Clarke, lecturer in computing science at Queen Mary College, London, told me in 1981 that he had solved the general Q ending Q vs. QQ with the aid of a computer. *C*

No. 4888: Emil Melnichenko (our New Zealand friend).

1. Be6 + Kh8/i 2. Sf7 + Kg8 3. Se5 + Kf8/ii 4. Rf7 + Ke8 5. Rxg7 ab (Rd8; Sg4) 6. Sd7 Ra2 7. Sf6 + Kd8 8. Ke5 Re2+ 9. Kd6 Rxe6+ 10. Kxe6 Ra4 11. Rg8 + Kc7 12. Sd5 + Kc6 13. Rc8 mate.

i) 1. ..., Kf8 2. Sxh7+ Ke8 3. Rxg7 Sb3 4. Sf6+ Kd8 5. Sd5 Sc5+ 6. Kf5 Sxe6 7. Kxe6 8. Rg8 mate.

"Mating attack with limited force."

No. 4889 **E.L. Pogosyants**
5th Commendation, Tungsram 1980

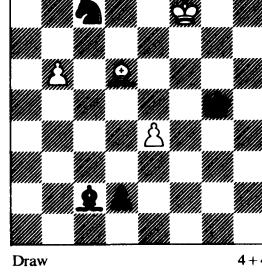

No. 4889: E.L. Pogosyants.

1. g7 + Kh7 2. f8S + Rxf8 + 3. gfS + Kh8 4. Sg6 + Kh7/i 5. Sf8 + Kh8 6. Sg6 + Qxg6 + 7. Kxg6 (Rxg6? Sxd4;) 7. ..., d5 (Ra5; Re4) 8. Kf6/ii Sc3 9. Kg6 Se2 (Se4; Rf4) 10. Kf6.

i) 4. ..., Kg8 5. Se7+ Kh8 6. Rg8+ Kh7 7. Rg7+.
 ii) But on no account. 8. Kxh5? Kh7 and W is in zugzwang.
 "A quite unusual positional draw."

"A quite unusual positional draw."

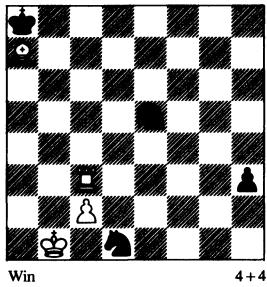

No. 4890 N.D.Mansariinsky
6th Commendation, Tungsram 1980

No. 4890: N.D. Mansarlinksy.
 1. Bf4 +/i Kxf4 2. b7 Sd6/ii 3. b8Q d1Q 4. Ke7 Ke5 5. Qb2 +/iii Kxe4 (Kf4; Qb8) 6. Qb4 + Ke5 7. Qc3 +/iv Kd5 8. Qa5 + Kc6 (Kc4; Qc7+) 9. Qc3 + Kb7 10. Qb4 + Kc6 11. Qc3 + Kb5 12. Qe5 + Kc6 13. Qc3 + Kb6 14. Qf6 Kc5 15. Qe5 + Qd5 16. Qc3 + Qc4 17. Qe5 + draw.
 i) 1. b7? Sxd6 2. b8Q d1Q.
 ii) 2. ..., Sa7 (b6) 3. b8Q + and 4. QxS.
 iii) 5. Qh8 +? Kxe4 6. Qh7 (h4) + Kd5 wins.
 iv) 7. Qb2 +? Kf4 8. Qb8 Qe2 + wins.

"Interesting perpetual attack against 2 Bl pieces."

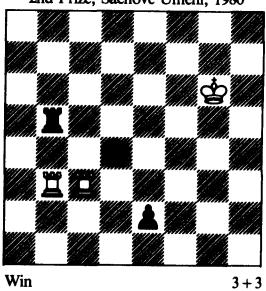

No. 4891 V. Pachman
(x.80)
1st Prize, Sachove Umeni, 1980
Award: ii.82

No. 4891: V. Pachman.
 Judge: J. Fritz. There were 48 originals in this informal tourney. 12 were unsound, and 1 anticipated.
 1. Ra3 Sc4 2. Ra1 Sc3 + 3. Kc1 h2 4. Bf2 +/i Kb8 5. Bg3 + Kb7 6. Bxh2, and, compared with the thematic try in (i), it is now Bl to move - and W wins.
 i) Thematic try: 4. Bg1 +? Kb8 5. Bxh2 + Kb7 and W has no good move, 6. Bg3 being met by 6. ..., Se2 +.
 If 4. Be3 +? Kb7 5. Ra7 + Kc6 6. Rh7 Sxe3.

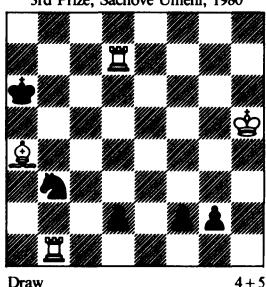

No. 4892: D. Gurgenidze.
 1. Rd3 + Ke4 2. Re3 + Kf4 3. Rf3 +

No. 4892 D. Gurgenidze
(x.80)
2nd Prize, Sachove Umeni, 1980

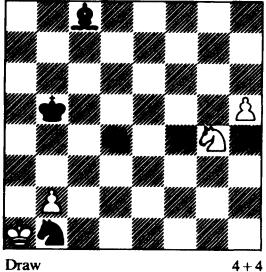

Kg4 4. Rg3 + Kh4 5. Rh3 + Kg4 6. bRg3 + Kf4 7. Re3 Rb3 8. hRf3 Kg4 9. Rxb3 e1Q 10. fRe3 and so on.

No. 4893 V. Novikov
(x.80)
3rd Prize, Sachove Umeni, 1980

No. 4893: Viktor Novikov.
 1. Bb5 + Kxb5 2. Rxb3 + Kc4/i 3. bRd3 d1Q + 4. Rxd1 f1Q 5. Rc7 + Kb3 6. R7c1 Qf5 + 7. Kh4 Ka2 8. Kg3.
 i) 2. ..., Kc6 3. dRd3 d1Q + 4. Rxd1 and the possibility 5. bRb1 draws.

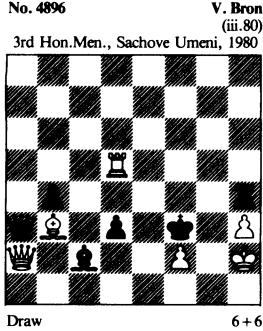

No. 4894 J. Rusinek
(i.80)
1st Hon.Men., Sachove Umeni, 1980

No. 4894: J. Rusinek.
 1. Se3 Sd2 2. h6 S4b3 + 3. Ka2 Sc1 +
 4. Ka1 Bb7 5. h7 dSb3 + 6. Kb1
 Be4 + 7. Sc2 Bxh7 stalemate.

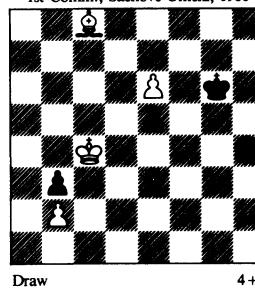

No. 4895: Mario Matous.
 1. Sf3 + Kf1 2. Qa6 + Qe2 3. Qa1 +
 Qe1 4. Qa2 Qd1 5. Qc4 + Qe2 6. Qd5
 Qc2 7. Qd7 Qb1 8. Sd2 + Ke2 9.
 Sxb1 f1Q 10. Qb5 + Ke1 11. Qb4 +
 Ke2 12. Qc4 + Ke1 13. Qc1 + Ke2 14.
 Sc3 + Kf2 15. Qf4 + Ke1 16. Qe3 +.
 The judge draws attention to the 2 quiet moves. 6. Qd5 and 7. Qd7.

No. 4896: V. Bron.
 1. Rxd3 + Bxd3 2. Qd2 Rxh3 + 3.
 Kxh3 leads to two echo-variations: 3.
 ..., Bf1 + 4. Kh4 Qxb3 5. Qd5 +
 Qxd5 stalemate, and 3. ..., Bf5 + 4.
 Kh2 Qxb3 5. Qd1 + Qxd1 stalemate.

No. 4897: Jaroslav Polasek.
 1. Kd5 2. Sf5 2. Kxe5 Bc1 3. e7
 Bxb2 + 4. Ke6 Sxe7 5. Kxe7 Bf6 +/i

No. 4897 J. Polasek
 (vi.80)
 1st Comm., Sachove Umeni, 1980

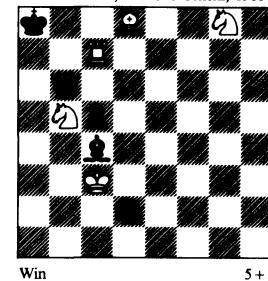

6. Ke6 b2 7. Ba6 b1Q 8. Bd3 + Qxd3
 stalemate.

i) 5. ..., Ba3 + 6. Ke8 b2 7. Ba6 b1Q
 8. Bd3 + Qxd3 stalemate.

The judge draws attention to J. Fritz
 (Tijdschrift KNSB, ix.55): wKd7
 wRa7 wBf1; bKc5 bRb1 bSe3 bBf3
 (3 + 4 =). 1. Bh3 Rh1 2. Rc7 + Kb6 3.
 Rc3 Rxh3 4. Rxe3 with 4. ..., Bg4 +
 5. Kd8 or 4. ..., Bc6 + 5. Kd6, and
 similarly 2 stalemates after 5. ...,
 Rxe3 in either case.

No. 4898 E. Vlasak
 (ix.80)
 2nd. Comm., Sachove Umeni, 1980

No. 4898: Emil Vlasak.
 1. Rc8 + Qb8 2. Sc7 + Ka7 3.
 Rxb8 Kxb8 4. Se7 Se4 + 5. Kxc4
 Sd6 + 6. Kxc5 Sf7 7. Kc6 Sxd8 + 8.
 Kb6 Se6 9. Sa6 + Ka8 10. Sd5 and
 11. S5c7 mate.

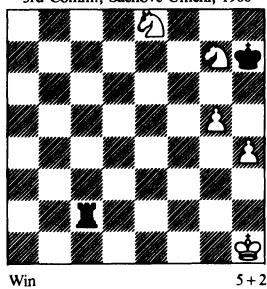

The judge draws attention to the
 tempo moves 7. Kc6 and 8. Kb6.

No. 4899: V. Pachman.
 1. Se6 Rc4 2. h5 Rh4 + 3. Kg2 Rg4 +
 4. Kh3 Rxg5 5. Sf6 + Kh6 6. Sg4 +
 Kxh5 7. Sf4 mate.

No. 4900

J.H. Marwitz

(iii.81)

1st Prize, KNSB, 1980/81
Award: Schakend Nederland, vii-vii.82

Black to Move, White Wins

5+4

No. 4900: Jan H. Marwitz.
F. Spinhoven, *Schakend Nederland*'s studies columnist, and Pauli Perkojona of Finland, were the judges. Enormous labour went into the remarkable award, which laid out in detail anticipations and analytical flaws in practically all the rejected studies. 13 having been eliminated, this left 41 for consideration, and the award in fact contains 15. Readers can judge for themselves the quality, not only of the winners, but of the solution presentation, which naturally we have not changed, only translated (or tried to!) and EG-ified.

1. ..., Ra2+. 1. ..., Ra7 2. Sg7+ Kxe7 3. Sh5+. 1. ..., Sd5 2. Sc3. 2. Kh1 Not 2. Kh3? Sd5 3. Sc3 Ra3. 2. ..., Sd5 3. Sc3 Ra1+ 4. Kg2 Sxe7 5. Se4 Kd7. The threat was Sf6 mate. If 5. ..., Ra2+ there follows 6. Kf3 Kd7 7. S6c5+ Kd8 8. Sb7+ Kd7 9. Scc5+ Ke8 10. Sd6+ Kd8 11. Scb7+

Kd7 12. Sf5 wins. If here 8. ..., Ke8 9. Sf6+ Kf8 10. Sd8 and mate follows. 6. S6c5+ Kd8 7. Sf6. Threatens Se6+ and Rxе7. Now we have A, B, C, D.

A: 7. ..., Re1 8. Kf2 Re5 9. Rh8+ Kc7 10. Se8+ Kd8 11. Sg7+ Kc7 12. Sge6+ Kd6 13. Rd8 mate.

B: 7. ..., Sd5 8. Sb7+ Kc8 9. Sd6+ Kb8 10. Rb7+ Ka8 11. Sd7 Ra5. If 11. ..., Rc1 12. Rb3 Rc3 13. Rb1 Ra3 14. Rb8+ Ka7 15. Sc8+ and 16. Ra8+. 12. Rb2 c5 13. Rb8+ Ka7 14. Sb5+ Ka6 15. Sxc5 mate.

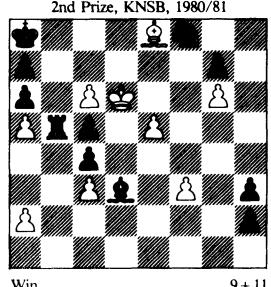

C: 7. ..., Ra7 8. Kf3. Not 8. Sg8? Ra2+. 8. ..., Kc8 9. Ke4 Kd8 10. Rg7 Kc8 11. Sg8 Kd8 12. Se6+ Ke8 13. Sf6 mate.

D: 7. ..., Sf5 8. Se6+ Kc8 9. Re7+ Kb8 10. Sd7+ Ka8 11. Sec5. Threatens Sb6+ and Rb7 mate. 11. ..., Se3+ 12. Kf3 Sd5 13. Rc8+ Ka7 14. Rxc6 wins. bR is tied to a-file, and if bS moves it is mate in 3, so all W has to do is deflect bS with wK. For instance 14. ..., Ra2(a3+) 15. Ke4. Although 14. ..., Ra5 15. Ke4? is bad because of 15. ..., Sc3+ and 16. ..., Sa4, nevertheless wK can approach bS by the longer g4-g5-h6-g7-f7-e6 route. (Harring bR on a-file fails because of ..., Sb4+; tactics: AJR)
"A study with rich content and a surprise mid-board checkmate in Variation A."

No. 4901
