Section A

Report

First of all, I would like to thank Mario Garcia for organizing for many years the International Internet Tournament UAPA for endgame study composers. This is an excellent example of the popularization of chess endgame study composition in the world. I will add that 12 studies from 5 different UAPA tournaments were selected for the last FIDE Album 2016-2018...

It was very hard for me to prepare this award. Waking up early in the morning on February 24 and realizing that a full-scale war had begun in Ukraine was an unexpected and terrible shock for me and my compatriots. After more than three months, woe and misfortune continue knocking on the doors of Ukrainian families – each day brings death and suffering to absolutely innocent people living in their own land...

Section A was not easy for endgame study composers, but the judge is grateful to all authors for their painstaking work and for submitting the resulting products. A total of 11 endgame studies composed by 6 authors from 4 countries were published. When preparing the award, I focused primarily on assessing the originality of the play and then the technical implementation of the idea. Frankly speaking, the creative level of the endgame studies in the thematic section was not high. Many participants failed to understand the wording of the theme and sent studies with the same balance of forces (two rooks with a minor piece) on each side. This was an optional point and it was possible to present works with the thematic set of pieces either for White or for Black, but with approximately equal material for the opponent...

The award reveals the level of the works presented therein. It is as follows.

A holistic play scenario with unexpected attraction of the black king to a mine-square. The non-playing black bishop a7 somewhat detracts from the overall artistic impression, but the brilliancy of the exquisite and original mate with two active square-blocks is inspiring. An interesting detail: the encounter begins and ends with moves of different rooks to the e6-square.

An enlightening endgame study in which White easily blocks the opponent's king in the corner of the board. Step by step, White takes advantage of his tightness and achieves his goal with subtle moves of his own king. The rook mates 4.Rh3# and 12...Rxa4# form an exact echo. And yet, against the background of the prosaic final play, the study lacks at least a small highpoint.

A bishop mate with two pinned rooks is not new and was presented many times, for example in Kvezereli=E (HHdbVI#32528) or Garayazli=I (HHdbVI#34218). The author added active blocking of the black bishop to the mate pattern, but the technical a8-bishop which is exchanged in the opening phase has an adverse effect on the overall impression. The following version can be proposed: Kc1, Rc6, Rd3, Ba6, pb6 – Kb4, Rg5, Rg7, Be7; win. **1.Rd4+ Kb3 2.Bc4+ Ka4 3.b7 Ba3+ 4.Kc2 Rxb7 5.Ra6+ Ra5 6.Bd5+ Rb4 7.Bc6#**

Logical study with foresight effect (refusal to capture bPb7) ends in a model mate with two self-blocks.

A memorable etude with an unobvious refusal to capture the black pawn b7.

The struggle of the white team against a passed pawn that has reached the second rank.

This classic plot sparkled with new facets, due to Bishop's features as a minor figure.

And also mutual sacrifices and mutual refusals of captures in limited material!
