Kalashnikov – 2nd Honourable Mention (c2/f5 Win 4+3).

The theory such. There is a position (possible to name her key) when clear the sense actions white (the main plan), however, at once this plan not successful. It is necessary to strengthen itself or to weaken the contender.

Therefore white make logic maneuver (preliminary plan), after which the change of a key position is visible, her microscopic transformation is more preferable. It seems, that there are two opportunities of preparation of the main plan, but in process of display nuances of an positions of figures found out, that outcome of game in them is opposite. And the better, than this difference long imperceptible. Motives of transformation a lot of. In section A total 11 studies. 0 points have received: study N°1 and study N°10.

The judge proposes to include in the provisional award 8 studies.

Movement the pawn (main plan) – not successfully. For 2 move both knights are neutralized and 3.a5 is made. Black find chance for continuation of struggle. Sacrifice 3...Nf1! and following phase. White again before a choice. Movement and promotion the pawn (main plan) – not successfully. The prepare 7.a6 without a mistake and with surprise!? It is a win on a chess board. It is a victory in tournament. Double realization of theme!
